

## Cehrs Exam Study Guide

The **CET Study Guide** is comprehensive review module for Certified EKG Technicians with 89 pages of concise core content to prepare candidates for their CET exam.

**Theme: Hi-Lo, life skills, career, achieve independence, skills, job success, job skills, There's more to finding a job than simply applying. First, figure out what you'd like to do for a living. Think ahead and set career goals. Understand what training and education you'll need to reach your dream. Then begin your job search, looking for work that aligns with your goals. Grab potential employers' interest with a polished cover letter and resume, then impress them further in an interview. You'll be ready for the workplace in no time. Combining practical content with visual appeal, the Life Skills Handbooks read more like magazines than books. These 120-page handbooks are designed to teach life skills to today's teens in an approachable and non-threatening way. Realistic scenarios help teens grasp the relevance of the information in these books, and tables, graphs, and charts add to students' understanding. Essential vocabulary is featured to help students build real-world literacy.**

**This book is a simplified study guide for the Electronic Health Record Specialist Exam. Concise and straight to the points that the student needs for the test**

**This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DECIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.**

**Pearson's Comprehensive Medical Coding: A Path to Success offers comprehensive coverage of all code sets (ICD-10-CM/PCS, ICD-9-CM, CPT, HCPCS) and can be used for three coding courses: diagnosis coding, physician procedure coding, and inpatient hospital coding. Designed to give readers a strong foundation in essential competencies, Pearson's Comprehensive Medical Coding organizes chapters around three basic coding skills—abstracting, assigning, and arranging codes. Students are guided through the entire coding process in each chapter. Flexible in its organization and progressive in its numerous exercises of varying levels, the book is appropriate for traditional, modular, linear, and wheel courses. Guided Examples teach the coding process, while Mini-medical Records help students learn how to identify and abstract pertinent information from medical documentation. Throughout the book, superior in-text features provide a clear learning path to student success. Also available with MyHealthProfessionalsLab This title is also available with MyHealthProfessionalsLab—an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn and test their understanding to help them better absorb course material and understand difficult concepts. Comprehensive content spans the entire MIBC curriculum, allowing instructors to customize their course and providing students with a consistent learning experience across the program. Students, if interested in purchasing this title with MyHealthProfessionalsLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. NOTE: You are purchasing a standalone product; MyHealthProfessionalsLab™ does not come packaged with this content. **The NHA Electronic Health Records Specialist Certification Exam aims at assessing the competencies of the Electronic Health Records Specialist. The exam tests the knowledge and abilities to effectively manage medical records in different healthcare settings. The exam has multiple-choice items covering these topics: - Demonstrate knowledge of the health care delivery system and medical terminology. - Demonstrate an understanding of the transition to an Electronic Health Record (EHR). - Demonstrate the ability to maintain an EHR within a physician's office. - Demonstrate the ability to maintain an EHR within a hospital setting. - Demonstrate an understanding of the usage of personal health records. - Demonstrate knowledge of compliance and ethics. - Demonstrate an understanding of the Practice Partner (the ambulatory EHR). This book focuses on the technology topics of the exam.**

**Medical Insurance is designed around the revenue cycle with each part of the book dedicated to a section of the cycle followed by case studies to apply the skills discussed in each section. The revenue cycle now follows the overall medical documentation and revenue cycle used in practice management/electronic health records environments and applications. Because of the mandate to the healthcare industry to adopt ICD-10-CM/PCS on October 1, 2015, you must work to gain expertise using this coding system. For this reason, ICD-10 is the diagnostic coding system taught and exemplified in Medical Insurance: A Revenue Cycle Process Approach.**

**ELECTRONIC HEALTH RECORDS: UNDERSTANDING AND USING COMPUTERIZED MEDICAL RECORDS, 2/e** is the complete “learn by doing” text for everyone who must use an electronic health records system, including doctors, nurses, medical assistants, physician assistants, and other medical office staff. It provides a thorough understanding of EHR tasks and functional benefits that is continuously reinforced by actual EHR experiences. Updated to reflect the latest EHR rules, regulations, and innovations, this new edition also contains 50% more hands-on guided and critical thinking exercises utilizing real EHR software. Improvements also include a full chapter on electronic orders and results; new workflow examples; shorter chapters that more easily accommodate 12-week courses; and a revised, clarified discussion of E&M billing codes. **The Certified Electronic Health Records Specialist CEHRS is a professional who has the duty of maintaining the integrity and protecting the privacy/security of all patient information. There are questions on technology, procedures and legal compliance. We create these self-practice test questions referencing the concepts and principles currently valid in the exam. Each question comes with an answer and a short explanation which aids you in seeking further study information. For purpose of exam readiness drilling, this product includes questions that have varying numbers of choices. Some have 2 while some have 5 or 6. We want to make sure these questions are tough enough to really test your readiness and draw your focus to the weak areas. Think of these as challenges presented to you so to assess your comprehension of the subject matters. The goal is to reinforce learning, to validate successful transference of knowledge and to identify areas of weakness that require remediation. The questions are NOT designed to "simulate" actual exam questions. "realistic" or actual questions that are for cheating purpose are not available in any of our products.**
