college—instruction—will fail to achieve its purpose of ensuring that students succeed in navigating the curriculum to completion. The purpose of academic advising is to help students select a program of study to meet their life and vocational goals. As such, academic advising is a central and important activity in the process of education. Academic advising occurs at least once each term for every student in the college; few student support functions occur as often or affect so many students. But while there is general agreement concerning the importance of academic advising for the

efficient functioning of the institution and the effective functioning of the student, there is little agreement regarding the nature of academic advising and who should perform the function. In this seminal work on academic advising, the authors of three overarching chapters address the key issues and challenges of academic advising followed by the authors of four of the most innovative and successful programs of academic advising in the nation.

Nearly two-thirds of students require some form of remediation before taking college-level classes, and community colleges have

become increasingly important in providing this education. Unfortunately, relatively few students complete the developmental courses required to make a transition to college-level work. Based on a three-year study of over twenty community colleges, Basic Skills Education in Community Colleges analyzes developmental education practices, exploring what goes wrong and what goes right, and provides a series of recommendations for improved practice. Including both classroom observations and interviews with administrators, faculty, and students, this valuable book balances critique

with examples of innovation. Part One explores the instructional settings of basic skills—the use of drill and practice and remedial pedagogy in math, reading, writing, and ESL, as well as innovations in colleges that show developmental education need not follow remedial pedagogy. Part Two examines institutional factors shaping basic skills and provides recommendations for improving the quality of basic skills instruction. The research-grounded observations and recommendations in Basic Skills Education in Community Colleges make this an invaluable resource for scholars,

Community colleges
across the United States
face a difficult
challenge. On the one

college readiness. On the other hand, they must uphold high academic standards in order to maintain accreditation and prepare students for employment or transfer to four-year schools. How, then, can community colleges best serve students who want to learn but do not meet minimum academic standards? Chaffey College, a large community college located about 40 miles east of Los Angeles,

began to wrestle with this question early in the twenty-first century. Under the auspices of a national demonstration project called Opening Doors, Chaffey developed a program designed to increase probationary students' chances of succeeding in college. Chaffey's program included a "College Success" course, taught by a counselor, which provided basic information on study skills and the

requirements of college. As part of the course, students were expected to complete five visits to "Success Centers," where their assignments, linked to the College Success course, covered skills assessment, learning styles, time management, use of resources, and test preparation. In 2005, MDRC collaborated with Chaffey College to evaluate the one-semester, voluntary Opening Doors program. In 2006, the program was

improved to form the two-semester Enhanced Opening Doors program, in which probationary students were told that they were required to take the College Success course. In MDRC's evaluation of each program, students were randomly assigned either to a program group that had the opportunity to participate in the program or to a control group that received the college's standard courses and services. This report presents the

outcomes for both groups of students in the Enhanced Opening Doors evaluation for four years after they entered the study. The findings include: (1) The message matters--optional program activities had lower participation rates compared with required program activities; (2) Chaffey's Enhanced Opening Doors program had positive short-term effects; and (3) Despite the program's encouraging short-term

effects, it did not meaningfully improve students' long-term academic outcomes. This report presents detailed findings from Chaffey's Enhanced Opening Doors initiative, including the cost and cost-effectiveness of the program, and considers the implications of this research for designing services for probationary students in community college.
