Second edition of a highly readable synthesis of the major determining features of the Renaissance.

The creator of the hit podcast series *Tides of History* and *Fall of Rome* explores the four explosive decades between 1490 and 1530, bringing to life the dramatic and deeply human story of how the West was reborn. In the bestselling tradition of *The Swerve* and *A Distant Mirror*, *The Verge* tells the story of a period that marked a decisive turning point for both European and world history. Here, author Patrick Wyman examines two complementary and contradictory sides of the same historical coin: the world-altering implications of the developments of printed mass media, extreme taxation, exploitative globalization, humanistic learning, gunpowder warfare, and mass religious conflict in the long term, and their intensely disruptive consequences in the short-term. As told through the lives of ten real people--from famous figures like Christopher Columbus and wealthy banker Jakob Fugger to a ruthless small-time merchant and a one-armed mercenary captain--*The Verge* illustrates how their lives, and the times in which they lived, set the stage for an

unprecedented globalized future. Over an intense forty-year period, the seeds for the so-called "Great Divergence" between Western Europe and the rest of the globe would be planted. From Columbus's voyage across the Atlantic to Martin Luther's sparking the Protestant Reformation, the foundations of our own, recognizably modern world came into being. For the past 500 years, historians, economists, and the policy-oriented have argued which of these individual developments best explains the West's rise from backwater periphery to global dominance. As *The Verge* presents it, however, the answer is far more nuanced.

A riveting account of the Saint Bartholomew ' s Day Massacre, its origins, and its aftermath, this volume by Barbara B. Diefendorf introduces students to the most notorious episode in France ' s sixteenth century civil and religious wars and an event of lasting historical importance. The murder of thousands of French Protestants by Catholics in August 1572 influenced not only the subsequent course of France ' s civil wars and state building, but also patterns of international alliance and long-standing cultural values across Europe. The book begins with an introduction that explores the political and religious context for the massacre and traces the course of the massacre and its aftermath. The featured documents offer a rich array of sources on the conflict — including royal edicts, popular songs, polemics, eyewitness accounts, memoirs, paintings, and engravings — to enable students to explore the massacre, the nature of church-state relations, the moral responsibility of secular and religious authorities, and

With Italy at its centre, but encompassing the whole of Renaissance Europe, this evocative history challenges some of the popularly-held views on the Renaissance period. In particular, whilst always acknowledging the brilliance and exuberance of Renaissance culture, Robin Kirkpatrick draws equal attention to the strangeness and often unresolved tensions that lay beneath the surface of that culture. Insisting on a European rather than purely Italian viewpoint, he embraces Renaissance thinking and culture in all its diversity: from Northern thinkers such as Cusanus, Luther and Calvin, to the

painting of Van der Weyden and El Greco, and the music of the Flemish musicians, Josquin des Prez and Orlando Lassus. Special attention is also paid to the unique contribution made by Margueritte of Navarre to the development of humanist culture. The book concludes with a study of Shakespeare in which his plays are viewed as a searching critique of some of the main principles of Renaissance culture.

This beautifully produced volume presents a fascinating survey of two great traditions in human history--the Italian Renaissance and the age of the Reformation. Thomson's description of these periods and their major figures are illustrated with numerous images of personalities, art, and architecture of the times.

The early modern and modern cultural world in the West would be unthinkable without Petrarch and Boccaccio. Despite this fact, there is still no scholarly contribution entirely devoted to analysing their intellectual revolution. Internationally renowned scholars are invited to discuss and rethink the historical, intellectual, and literary roles of Petrarch and Boccaccio between the great model of Dante's encyclopedia and

the ideas of a double or multifaceted culture in the era of Italian Renaissance Humanism. In his lyrical poems and Latin treatises, Petrarch created a cultural pattern that was both Christian and Classical, exercising immense influence on the Western World in the centuries to come. Boccaccio translated this pattern into his own vernacular narratives and erudite works, ultimately claiming as his own achievement the reconstructed unity of the Ancient Greek and Latin world in his contemporary age. The volume reconsiders Petrarch's and Boccaccio's heritages from different perspectives (philosophy, theology, history, philology, paleography, literature, theory), and investigates how these heritages shaped the cultural transition between the end of the Middle Ages and the early modern era, as well as European identity.

From the inimitable bestselling author Thomas Cahill, another popular history—this one focusing on how the innovations of the Renaissance and the Reformation changed the Western world. A truly revolutionary book. In Volume VI of his acclaimed Hinges of History series, Thomas Cahill guides us through the thrilling period of the Renaissance and the Reformation (the late fourteenth to the early seventeenth century), so full of innovation and cultural change that the Western world would not experience its like again until the twentieth century. Beginning with the continent-wide disaster of the Black Death, Cahill traces the many developments in European thought and experience that served both the new humanism of the Renaissance and the seemingly abrupt religious alterations of the increasingly radical Reformation. This is an age of the most sublime artistic and scientific adventure, but also of newly powerful princes and armies and of newly found courage, as many thousands refuse to bow their heads to the religious pieties of the past. It is an era of just-discovered continents and previously unknown peoples. More than anything, it is a time of individuality in which a whole culture must achieve a new balance if the West is to continue.

In this fascinating study, John Stephens interprets the significance of the immense cultural change which took place in Italy from the time of Petrarch to the Reformation, and considers its wider contribution to Europe beyond the Alps. His important analysis (which is designed for students and serious general readers of history as well as the specialist) is not a straight narrative history; rather, it is an examination of the humanists, artists and patrons who were the instruments of this change; the contemporary factors that favoured it; and the elements of ancient thought they revived.

RELIGIOUS LIFE Excerpt: The fifteenth century may be regarded as a period of transition from the ideals of the Middle Ages to those of modern times. The world was fast becoming more secular in its tendencies, and, as a necessary result, theories and principles that had met till then with almost universal acceptance in literature, in art, in education, and in government, were challenged by many as untenable. Scholasticism, which had monopolised the attention of both schools and scholars since the days of St. Anselm and Abelard, was called upon to defend its claims against the advocates of classical culture; the theocratico-imperial conception of Christian society as expounded by the canonists and lawyers of an earlier period was forced into the background by the appearance of nationalism and individualism, which by this time had become factors to be reckoned with by the ecclesiastical and civil rulers; the Feudal System, which had received a mortal blow by the intermingling of the classes and the masses*

*in the era of the Crusades, was threatened, from above, by the movement towards centralisation and absolutism, and from below, by the growing discontent of the peasantry and artisans, who had begun to realise, but as yet only in a vague way, their own strength. In every department the battle for supremacy was being waged between the old and the new, and the printing-press was at hand to enable the patrons of both to mould the thoughts and opinions of the Christian world. It was, therefore, an age of unrest and of great intellectual activity, and at all such times the claims of the Church as the guardian and expounder of Divine Revelation are sure to be questioned. Not that the Church has need to fear inquiry, or that the claims of faith and reason are incompatible, but because some daring spirits are always to be reckoned with, who, by mistaking hypotheses for facts, succeed in convincing themselves and their followers that those in authority are unprogressive, and as such, to be despised.*

The 'problem of authority' was not an invention of the Protestant Reformation, but, as the essays contained in this volume demonstrate, its discussion, in ever greater complexity, was one of the ramifications (if not causes) of the deepening divisions within the Christian church in the sixteenth century. Any optimism that the principle of sola scriptura might provide a vehicle for unity and concord in the post-Reformation church was soon to be dented by a growing uncertainty and division, evident even in early evangelical writing and preaching. Representing a new approach to an important subject this volume of essays widens the understanding and interpretation of authority in the debates of the Reformation. The fruits of original and recent research, each essay builds with careful scholarship on solid historiographical foundations, ensuring that the content and ultimate conclusions do much to challenge long-standing assumptions about perceptions of authority in the aftermath of the Reformation. Rather than dealing with individual sources of authority in isolation, the volume examines the juxtapositions of and negotiations between elements of the authoritative synthesis, and

thereby throws new light on the nature of authority in early-modern Europe as a whole. This volume is thus an ideal vehicle with which to bring high quality, new, and significant research into the public domain for the first time, whilst adding substantially to the existing corpus of Reformation scholarship.

The first of two volumes that present the current state of research in the field, and do this across as many fields and subjects as possible. The volumes are meant to be introductions to the subjects and aids to research, not summaries, though the mixture of narrative, analysis, and historiographical commentary varies from author to author. Volume 1 contains 19 chapters organized into two parts: the framework of everyday life; and politics, power, and authority--assertions. The extensive chapter-ending bibliographies both support the chapters and provide selective introductions to the current literature. Annotation c. by Book News, Inc., Portland, Or.

"The early seventeenth century witnessed a dramatic upsurge of proposals for change, in particular in religion, politics, and knowledge. In *Reformation, Revolution, Renovation*, Lyke de Vries offers an account of the Rosicrucian manifestos in this transformative context. She focuses on their call for a general reformation and traces it to medieval and early modern predecessors. The manifestos, commonly portrayed as either Lutheran or esoteric, are here analysed as revolutionary mission statements, which challenged established religious and academic authorities, drawing on various heterodox notions and radical traditions. Emphasising the universal character of these manifestos in the first book-length study of the topic, Lyke de Vries convincingly shows how their authors channeled early modern sentiments into a message of universal change, which provoked numerous strong responses from early modern readers"--
