"Prealgebra is designed to meet scope and sequence requirements for a one-semester prealgebra course. The text introduces the fundamental concepts of algebra while addressing the needs of students with diverse backgrounds and learning styles. Each topic builds upon previously developed material to demonstrate the cohesiveness and structure of mathematics. Prealgebra follows a nontraditional approach in its presentation of content. The beginning, in particular, is presented as a sequence of small steps so that students gain confidence in their ability to succeed in the course. The order of topics was carefully planned to emphasize the logical progression throughout the course and to facilitate a thorough understanding of each concept. As new ideas are presented, they are explicitly related to previous topics."--BC Campus website.

Teaching you how to use essential oils to affect the very fabric of your being, Candice Covington details how the Tattvas Method of essential oils allow you to access the deepest, most hidden aspects of Self, those beyond the reach of the mind, the very energetic causation patterns that set all behaviors and thoughts into motion. She reveals how the tattvas are the energy that animate each chakra and how we can use their archetypal energy to shape our inner life and align with our greater soul purpose. The author provides energetic profiles of each tattva, chakra, and essential oil, explains their relationships to one another, and details how to identify what tattva or chakra is dominant at any given time. Exploring the energetic signatures of the tattvic essential oils, she details their elemental make-up, animal and deity archetypes, sacred geometry symbols, sacred syllables, and colors. She reveals how to discover the energy patterns responsible for directing unhealthy life patterns and explains how to identify your personal vibrational signature, purify your energy body, and craft your own unique ritual practice with essential oils.
