To young Christians of the world, Pope Francis has a message for you: "Christ is alive, and he wants you to be alive!" In his fourth apostolic exhortation, *Christus Vivit*, Pope Francis encapsulates the work of the 2018 synod of bishops on "Young People, The Faith,

and Vocational Discernment." Pope Francis has always had a special relationship with young people, and in his fatherly love for you he shows that: You can relate to young people in Scripture who made a difference You identify with the Christ who is always young You face difficult issues in the world today You yearn for the truth of the Gospel You are capable of amazing things when you respond to the Gospel You learn and grow with help from the faithful of all generations You need bold and creative youth ministry You can discover who God made you to be You are urged to pray for discernment Christus Vivit is written for and to young people, but Pope Francis also wrote it for the entire Church, because, as he says, reflecting on our young people inspires us all. And when you arrive where we have not yet reached, have the patience to wait for us."

Oil and gas projects have special characteristics that need a different technique in project management. The development of any country depends on the development of the energy reserve through investing in oil and gas projects through onshore and offshore exploration, drilling, and increasing facility capacities. Therefore, these projects need a sort of management match with their characteristics, and project management is the main tool to achieving a successful project. Written by a veteran project manager who has specialized in oil and gas projects for years, this book focuses on using practical tools and methods that are widely and successfully used in project management for oil and gas projects. Most engineers study all subjects, but focus on project management in housing projects, administration projects, and commercial buildings or other similar projects. However, oil and gas projects have their own requirements and characteristics in management from the owners, engineering offices, and contractors' side. Not only useful to graduating engineers, new hires, and students, this volume is also an invaluable addition to any veteran project manager's library as a reference or a helpful go-to guide. Also meant to be a refresher for practicing engineers, it covers all of the project management subjects from an industrial point of view specifically for petroleum projects, making it the perfect desktop manual. Not just for project managers and

students, this book is helpful to any engineering discipline or staff in sharing or applying the work of a petroleum project and is a must-have for anyone working in this industry.

INSTANT NEW YORK TIMES BESTSELLER "One of the most important books I've ever read—an indispensable guide to thinking clearly about the world." – Bill Gates "Hans Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly." —Mel Gates "Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world's population live in poverty; why the world's population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- "This book is my last battle in my life-mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be." Hans Rosling, February 2017.

Can the human body truly heal itself? Can we actually reverse the process of disease? If so, what modality do we choose to find our way back to health? The answers to these questions are found in C.U.R.E. Cultivating Unlimited Rejuvenating Energy is your step by step guide to understanding how the body works, why we get sick and how we heal through deep detoxification and cellular rejuvenation. For author Rosanne Calabrese AP, C.U.R.E. is paramount not only to her as a practitioner but also as a patient. As a practitioner of Traditional Chinese Medicine (TCM), Rosanne has helped thousands of people feel better and improve their state of health. As a patient she battled relentlessly to reverse two "incurable" autoimmune diseases, something numerous doctors told her was impossible. Through her personal process of C.U.R.E. Rosanne gained a much deeper understanding of the human body, why disease occurs and subsequently, how to reverse it. This understanding does not apply to only autoimmune diseases but to virtually all disease processes in modern life. In the United States, the standard of care for dealing with practically any health issue is to medicate, operate or radiate in an effort to "control" the symptoms of disease. But controlling or suppressing symptoms is not C.U.R.E. It is, instead, an illusion. A temporary reprieve if you will. A way to gather statistics so as to manipulate them, creating the impression that help is just a pill, procedure or process away. As the public wakes up to deception they seek a different choice. That alternate choice to heal the human body is not a recent discovery. It is a culmination of what natural healers have used and nature has provided for eons. Rosanne Calabrese AP has taken the teachings of natural healers along with her knowledge of TCM and her own experience of reversing disease in her body and put it in simple, common sense language.

The acclaimed investigative reporter and author of *Confronting Collapse* examines the global forces that led to 9/11 in this provocative exposé. The attacks of September 11, 2001 were accomplished through an amazing orchestration of logistics and personnel. *Crossing the Rubicon* examines how such a conspiracy was possible through an interdisciplinary analysis of petroleum, geopolitics, narco-traffic, intelligence and militarism—without which 9/11 cannot be understood. In reality, 9/11 and the resulting "War on Terror" are parts of a massive authoritarian response to an emerging economic crisis of unprecedented scale. Peak Oil—the beginning of the end for our industrial civilization—is driving the elites of American power to implement unthinkably draconian measures of repression, warfare and population control. *Crossing the Rubicon* is more than a story of corruption and greed. It is a map of the perilous terrain through which we are all now making our way.

"New York Times-bestselling writer C. J. Box returns with a thrilling new novel, featuring Wyoming game warden Joe Pickett. She was gone. Joe Pickett had good reason to dislike Dallas Cates, even if he was a rodeo champion, and now he has even more—Joe's eighteen-year-old ward, April, has run off with him. And then comes even worse news: The body of a girl has been found in a ditch along the highway—alive, but just barely, the victim of blunt force trauma. ***The New York Times* bestselling author of *The Moral Case for Fossil Fuels* draws on the latest data and new insights to challenge everything you thought you knew about the future of energy. For over a decade, philosopher and energy expert Alex Epstein has predicted that any negative impacts of fossil fuel use on our climate will be outweighed by the unique benefits of fossil fuels to human flourishing—including their unrivaled ability to provide low-cost, reliable energy to billions of people around the world, especially the world’s poorest people. And contrary to what we hear from media “experts” about today’s “renewable revolution” and “climate emergency,” reality has proven Epstein right: Fact: Fossil fuels are still the dominant source of energy around the world, and growing fast—while much-hyped renewables are causing skyrocketing electricity prices and increased blackouts. Fact: Fossil-fueled development has brought global poverty to an all-time low. Fact: While fossil fuels have contributed to the 1 degree of warming in the last 170 years, climate-related deaths are at all-time lows thanks to fossil-fueled development. What does the future hold? In *Fossil Future*, Epstein, applying his distinctive “human flourishing framework” to the latest evidence, comes to the shocking conclusion that the benefits of fossil fuels will continue to far outweigh their side effects—including climate impacts—for generations to come. The path to global human flourishing, Epstein argues, is a combination of using more fossil fuels, getting better at “climate mastery,” and establishing “energy freedom” policies that allow nuclear and other truly promising alternatives to reach their full long-term potential. Today’s pervasive claims of imminent climate catastrophe and imminent renewable energy dominance, Epstein shows, are based on what he calls the “anti-impact framework”—a set of faulty methods, false**

assumptions, and anti-human values that have caused the media's designated experts to make wildly wrong predictions about fossil fuels, climate, and renewables for the last fifty years. Deeply researched and wide-ranging, this book will cause you to rethink everything you thought you knew about the future of our energy use, our environment, and our climate. Now a New York Times bestseller! The book you need right now is finally here! From beloved spiritual teacher Michael A. All secret societies know that the world is currently crossing between realities, in which energy will certainly manifest in a new and completely different form, forcing us to rethink our values and priorities in life. As we move from the Age of Pisces to the Age of Aquarius many questions come to mind. What should we expect? What can we do about it? How can we be ready? What is the fate of human spirituality? What will be the new religion? And how can we fit ourselves within such new order of things? This book promises to answer these questions and many more based on an extended research of sources emerging from different religions and political views. From one side of the spectrum you will see how gnosticism, and societies with very peculiar beliefs, such as Rosicrucianism, Freemasonry and Scientology are perfectly capable of explaining this new phenomena with accuracy, and even though we don't necessarily need to address any of them to focus our attention on the main current of thought shared or others with a similar background. From another side, we can easily analyze what prominent anarchists have been trying to show us regarding the

possibilities for democracy when extended to its limits, the individual gifted with full responsibility for his own fate. And all this, surely, can also be compartmented inside what astrology have always knew since its creation, since Man started using it to predict the future. With such variety of principles and values in mind, this book merges the core observations into easily applicable psychological reasons associated with our spirituality and natural predisposition for beauty and love. The commencing of a new worldwide social order, a new chapter in human history called the Aquarian dispensation, will lead us to challenges that are unavoidable, both in a personal as well as social and global scale. But, ultimately, it will show you the prospect of an approaching Golden Age of abundance and far much more happiness, along with more magic, innovation and creativity. We are now at the precipice of a new age of spiritual awakening, promising mighty accomplishments in the arts and sciences, while penetrating the minds of many with unique and uplifting ideas that benefit us all as one in health, wealth, wisdom and relationships.
