role of changes  
in the skeletal  
muscle

circulation in  
pathologic states.  
Skeletal muscle  
is unique among  
organs in that its  
blood flow can  
change over a  
remarkably large  
range. Compared

## Online Library

### Chapter 37

#### Circulatory And Respiratory System Test

to blood flow at rest, muscle blood flow can increase by more than 20-fold on average during intense exercise, while perfusion of certain individual white muscles or portions of those

## Online Library

### Chapter 37

#### Circulatory And

#### Respiratory

#### System Test

muscles can increase by as much as 80-fold.

This is compared to maximal increases of 4- to 6-fold in the coronary circulation during exercise. These increases in muscle perfusion

## Online Library

### Chapter 37

#### Circulatory And Respiratory System Test

are required to meet the enormous demands for oxygen and nutrients by the active muscles. Because of its large mass and the fact that skeletal muscles receive 25% of
