Take your first step toward a successful career in medical coding with guidance from the most trusted name in coding education! From Carol J. Buck, the bestselling Step-by-Step Medical Coding is a practical, easy-to-use resource that shows you exactly how to code using all current coding sets. Practice exercises follow each 'step' of information to reinforce your understanding of important concepts. In-depth coverage includes reimbursement, ICD-10-CM, CPT, HCPCS, and inpatient coding, with an Evolve website that includes 30-day access to TruCode® Encoder Essentials. No other text so thoroughly covers all coding sets in one source! 30-day access to TruCode® Encoder Essentials (in addition to separate encoder practice exercises on the Evolve companion website) help you understand how to utilize an encoder. A step-by-step approach makes it easier to build skills and remember the material. UNIQUE! Real-world coding reports (cleared of any confidential information) simulate the reports you will encounter as a coder and help you apply coding principles to actual cases. Over 500 illustrations include medical conditions and procedures to help you understand the services being coded. Exercises, Quick Checks, and Toolbox features reinforce coding rules and concepts, and emphasize key information. Valuable tips and advice are offered in features such as From the Trenches, Coding Shots, Stop!, Caution!, Check This Out, and CMS Rules. UNIQUE! Four coding-question variations develop your coding ability and critical thinking skills, including one-code or multiple-code answers. Official Guidelines for Coding and Reporting boxes allow you to read the official guidelines wording for inpatient and outpatient coding alongside in-text explanations. Coders' Index makes it easy to quickly locate specific codes. Sample Electronic Health Record screenshots in the appendix provide examples similar to the eHRs you will encounter in the workplace. Online practice activities on Evolve include questions such as multiple choice, matching, fill-in-the-blank, and coding reports. A workbook corresponds to the textbook and offers review and practice with more than 1,200 theory, practical, and report exercises (odd-numbered answers provided in appendix) to reinforce understanding of medical coding. Available separately. Medical Coding Online uses animations, photographs, drawings, narrated slide shows, case-based exercises, pop-up definitions, and professional insights to reinforce coding concepts from the Step-by-Step text. Available separately.

CliffsNotes AP Psychology Cram Plan calendarizes a study plan for AP Psychology test-takers depending on how much time they have left before they take the May exam. This dissertation examines how human resources are managed at selected Ethiopian private companies, how Ethiopian human resource management practice is evolving and how it can be improved. The examination is qualitative and exploratory, since no comparative research on human resource management has yet been conducted at Ethiopian profit or non-profit organizations. An understanding of Ethiopian human resource management practice makes it possible to improve Ethiopian human resource management practice, and thus to increase employee productivity. The study took place at four manufacturing and four service companies in Addis Ababa, all representative of their sector. The research claim is that Ethiopian human resource management practices differ from human resource management practices in the West, due to differences in cultural factors, economic systems, political systems, and legal and industrial relations. For this reason, Ethiopia's culture, politics, economy and legal and industrial relations have been analyzed. The main finding of this study is that the importance of human resource management is not uniformly understood at all the case-study companies. Although the multinational companies based in Ethiopia see their human resources as the companies most important asset, as human capital, the local companies generally do not. The fact that respondents claim that Ethiopia has limited experience in industrialization might explain why human resource management in Ethiopia is rudimentary and still has a long way to go. With this dissertation the researcher wants to contribute to improving Ethiopian human resource management practice. Moreover, this dissertation may be used as a framework for similar research in other sectors or for more specific in-depth research. This dissertation may also serve as a knowledge base for company managers, business consultants, academics and government officials of countries with a national culture similar to Ethiopia's (for example Kenya, Tanzania and Zambia), countries undergoing (or which have undergone) a recent transition to a free market economy, and countries facing similar micro-economic developments.
