

Chapter 8 Receivables Quia

Throughout his narrative of Julio-Claudian Rome in the Annals, Tacitus includes numerous references to the gods, fate, fortune, astrology, omens, temples, priests, the emperor cult, and other religious material. Though scholars have long considered Tacitus' minor importance, this volume demonstrates the significance of such references to an understanding of the work as a whole by analyzing them using cultural memory theory, which views religious ritual as a key component in any society's efforts to create and help define cultural identity in the present. Tacitus, who was not only an historian, but also a member of Rome's quindecimviral priesthood, shows a marked interest in even the most detailed rituals of Roman religious life, yet his portrayal of religious mater system is under threat with the advent of the principate. Some traditional rituals are forgotten as the shape of the Roman state changes while, simultaneously, a new form of cultic commemoration develops as deceased emperors are deified and the living gods are treated in increasingly worshipful ways by his subjects. This study traces the deployment of religious material throughout Tacitus' narrative in order to show how he views the development of this cultic "amnesia" over time, from the reign of the cryptic Tiberius, through Claudius' failed attempts at reviving tradition, to the final sacrilegious disasters of the impious Nero. As the first book-length treatment of religion in the Annals, it reveals how these references are a key vehicle for his assessment of the pr

government, the activities of individual emperors, and their impact on Roman society and cultural identity. The chapters of this volume shed new light on the complicated relationship between religious discourse and rhetoric across several (con)texts from classical to late. Rhetoric is used to address the divine, to invoke the gods, to talk about the sacred, and to explore the activities of individual emperors, and their impact on Roman society and cultural identity. With this publication, WIPO and the author aim at making available for judges, lawyers and law enforcement officials a valuable tool for the handling of intellectual property cases. To that effect, the case book uses carefully selected court decisions drawn from either civil or common law traditions. The extracts from the decisions and accompanying comments illustrate the different areas of intellectual property law, with an emphasis on matters that typically arise in connection with the enforcement of intellectual property law as criminal proceedings.

The Vision of God

Known for his deeply mystical writings about Christianity, Nicholas of Cusa wrote this, his most popular work, against a backdrop of widespread Church corruption. God, he believed, is found in all things, and thus cannot be perceived by man's senses and intellect alone. The path to ultimate knowledge, then, begins in recognizing our own ignorance. Deeply influenced by Saint Augustine, Nicholas mixes the metaphysical with the personal to create a deeply felt work, first published in 1453, designed to restore faith in even the most jaded.

"Fundamental Managerial Accounting Concepts" 4e by Edmonds/Edmonds/Tsay/Olds focuses on concepts that are isolated and introduced in a logical sequence. The authors intentionally limit the scope of the material to help students build a solid foundation of the most important concepts in managerial accounting. "Fundamental Managerial Accounting Concepts" 4e is organized in a distinctive way, particularly in the first six chapters. The objective is to establish a coherent, integrative framework that enables students to build knowledge in stepwise fashion. The authors' goal is for students to understand the underlying principles of accounting, not just memorize content.

This book approaches the question of the relation between financial crises and earnings management from two philosophical perspectives: positivism and critical realism. The results obtained using the positivist approach indicate that financial crises tend to have no consistent effect on earnings quality since managers' earnings behavior does not differ from the pre-crisis to the crisis period. The author accordingly argues against the existence of a causal law based on a constant conjunction model (i.e., whenever a financial crisis happens, earnings management occurs) and concludes that financial crises cannot be seen as the cause of earnings management. The critical realism perspective, on the other hand, casts light on managers' reasons for acting like an earnings manager; in conjunction with the more traditional positivist approach, it assists in refuting the idea of financial crises as a generative mechanism for earnings management. The author concludes by exploring other structures at work that might be responsible for earnings management. This book will be of interest to both academics and a wide range of professionals.

Between 1150 and 1350, Paris grew from a mid-sized episcopal see in Europe to the largest metropolis on the continent. The population rose during these two centuries from approximately 30,000 to over 250,000 inhabitants. The causes and consequences of this demographic explosion are thoroughly examined for the first time in this book by Jörg Oberste.

"This volume offers the first comprehensive analysis of wills in late medieval Krakow. It presents the origins of testamentary acts in the Kingdom of Poland and its centre, Krakow, and their subsequent transformation from so called 'canonical wills' to 'communal wills'. Wysmu?ek discusses the socio-cultural role of wills and sets them in their contemporary legal, social, and economic context. In doing so, he uncovers their influence on property ownership and family relations in the city, as well as on the religious practices of the burghers. Ultimately, this work seeks to change the perception of wills by treating the testamentary act itself as an important agent of historical social change - a 'tool of power'"-- Law and Practice

Fee tails were a basic building block for family landholding from the end of the thirteenth to the beginning of the twentieth century. The classic entail was an interest in land which was inalienable and could only pass at death by inheritance to the lineal heirs of the original grantee. Biancalana's study considers the origins, development and use of the entail in later medieval England, and the origins and early use of a reliable legal mechanism for the destruction of individual entails, the common recovery. He untangles the complex history surrounding medieval landholding in this detailed study of the fee tail, the product of extensive research in original sources. This book includes an extensive index of over three hundred common recoveries with discussions of their transactional contexts. A major work which will interest lawyers and historians.

The contributions of Understanding the Sources of Early Modern and Modern Commercial Law show an excellent assemblage of sources which historians of commercial law use. Besides normative sources, others are often needed to complement them.

THE Carmelite Order was originally devoted to a purely contemplative life. Its members lived as hermits on Mount Carmel, striving to imitate the holy prophets Elias and Eliseus. According to their Rule—which, given about A.D. 1210,

records the customs observed by these hermits since they became a body corporate—they spent their time in or near their cells, meditating on the law of the Lord day and night, repairing only once a day to the oratory to hear mass. They said their office or their Paters privately, and took their more than frugal meals in solitude. James de Vitry thus speaks of these hermits: 'Others, following the example of Elias, that holy anchorite and great prophet, embraced the eremitical life on Mount Carmel, chiefly on the part overlooking the town of Porphyry, now called Caiffa, near the fountain of Elias, not far from the monastery of S. Margaret, Virgin. There living in small cells, like bee-hives, they made a sweet spiritual honey Aeterna Press
