I AND THOU is one of the most important books of Western Theology. In it, Martin Buber, heavily influenced by the writings of Nietzsche, unites the proto-Existentialist currents of modern German thought with the Judeo-Christian tradition, powerfully updating faith for modern times. Since its first appearance in Germany in 1923, this slender volume has become one of the epoch-making works of our time. This work is the centerpiece of Buber's philosophy. It lays out a

In this inspirational and humorous collection of essays, author John Dietsch sees his addiction to and passion for fishing as a parable that can help us shift from compulsive thinking to mindfulness and a closer connection to God. From creating fishing scenes on the set of *A River Runs Through It* in Montana, to directing fly fishing shows in New Zealand and from exploring

deep canyons in California to guiding in Colorado, John shares his experiences and asks the question: what are we really fishing for? Through John's journeys across the globe, we discover that the same pursuit in fishing—of what is elusive but attainable—can be applied to our own spiritual journey. In the end, Dietsch uncovers his own truth under the rocks of a childhood river, recognizing the loss of both his brothers as the path of acceptance and faith that is graced by waters.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was

As the power of Inquisitor General Tomás de Torquemada grows, so does the brutality of the Spanish church and the suspicion and paranoia it inspires. When a dear friend's demise brings the violence close to home, Santángel is enraged and takes retribution into his own hands. But he is from a family of conversos, and his Jewish heritage makes him an easy target. As Santángel

While he struggles to decide what his reputation is worth and what he can sacrifice, one man offers him a chance he thought he'd lost...the chance to hope for a better world. To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, Extreme Economies turns
