Author of cult classics *The Pumpkin Plan* and *The Toilet Paper Entrepreneur* offers a simple, counterintuitive cash management

solution that will help small businesses break out of the doom spiral and achieve instant profitability. Conventional accounting

uses the logical (albeit, flawed) formula: Sales - Expenses = Profit. The problem is, businesses are run by humans, and humans

aren't always logical. Serial entrepreneur Mike Michalowicz has developed a behavioral approach to accounting to flip the formula:

Sales - Profit = Expenses. Just as the most effective weight loss strategy is to limit portions by using smaller plates,

Michalowicz shows that by taking profit first and apportioning only what remains for expenses, entrepreneurs will transform their

businesses from cash-eating monsters to profitable cash cows. Using Michalowicz's Profit First system, readers will learn that:

· Following 4 simple principles can simplify accounting and make it easier to manage a profitable business by looking at bank

account balances. · A small, profitable business can be worth much more than a large business surviving on its top line. ·

Businesses that attain early and sustained profitability have a better shot at achieving long-term growth. With dozens of case

studies, practical, step-by-step advice, and his signature sense of humor, Michalowicz has the game-changing roadmap for any

entrepreneur to make money they always dreamed of.

Recent changes in the healthcare industry have greatly complicated the hospital management task. For management and accounting

purposes, clear lines of authority and clear definitions of responsibilities must be established. A chart of accounts is a system

for organizing accounting information. This guide suggests ways to organize a chart of accounts of individual hospitals.
