Expert practical advice from an experienced race engine builder on how to build a high-performance version of Ford's naturally aspirated 4-cylinder 1600, 1800 & 2000cc Pinto engine which has been used in Ford's most popular cars (Escort, Capri, Cortina & Sierra - Ford/Mercury Capri, Pinto, Bobcat in USA) over many years. Whether the reader wants a fast road car or to go racing, Des explains, without using technical jargon, just how to build a reliable high-power engine using as many stock parts as possible and without wasting money on parts and modifications that don't work. Also covers Cosworth versions of Pinto engines and fitting Cosworth heads to Pinto blocks. Does not cover 1300, E-Max 1600 or American-built 2300.

How to get the best from sportscars/kit cars with wishbone front suspension, coil springs and telescopic shocks. Includes 'chassis' integrity, geometry, ride height, camber, castor, kpi, springs, shockers, testing & adjustment.

This comprehensive overview of chassis technology presents an up-to-date picture for vehicle construction and design engineers in education and industry. The book acts as an introduction to the engineering design of the automobile's fundamental mechanical systems. Clear text and first class diagrams are used to relate basic engineering principles to the particular requirements of the chassis. In addition, the 2nd edition of 'The Automotive Chassis' has a new author team and has been completely updated to include new technology in total vehicle and suspension design, including platform concept and four-wheel drive technology.

Expert practical advice from an experienced race engine builder on how to build an ignition system that delivers maximum power reliably. A lot is talked about ignition systems and there is a bewildering choice of expensive aftermarket parts, which all claim to deliver more power. Des Hammill cuts through the myth and hyperbole and tells readers what really works, so that

they can build an excellent system without wasting money on parts and systems that simply don't deliver. Ignition timing and advance curves for modified engines is another minefield for the inexperienced, but Des uses his expert knowledge to tell readers how to optimize the ignition timing of any high-performance engine.

On a sunny Saturday morning at Chicago's Simeon Career Academy back in 2010 at a Concerned Christian Men (CCM) Breakfast I was engaged in a stimulating personal conversation with the late Dr. William Lackland. His insights "rocked my world." That conversation eventually inspired me to write a book. This book! Dr. Lackland shared some of his university experiences with me. The dean advised him to enroll into several remedial courses including reading and math. The dean's attitude conveyed his doubts about William's ability to pass these courses, much less completing the university curriculum. Dr. Lackland refused to let this stranger deter him from earning his Ph.D., in Chemistry, no less. Listening to Dr. Lackland's story whet my appetite for other successful African-American men's stories. I had a strong suspicion that African-American men though different in many ways, are very much alike. Most Black men continue to be confronted by seemingly overwhelming odds, but WE persist. This realization motivated me to use our experiences with success to create a directory of African American men. I shared my directory idea with friends and asked them for help. It was my vision to make it a team project. I got no takers. Thus, I changed the idea from a directory to a book. Over several months I researched and read the literature about successful Black boys and men. I then created an online survey to be completed by a few African American men I know.

The survey delved into their childhood, family, employment, profession, and the like. More than fifty men of color were sent the survey by email to complete. Thirteen of them completed the survey. I have worked and learned from time to time with most of these men. Thus, I have had personal experiences with each of them. I wanted to use successful African American men's life experiences as a blueprint for Black boys and young men who are striving to become successful. I want them to realize that the men that they are reading about were once boys just like them.
