*Waltzing Australia* was born out of a dream-and a journey. After walking away from her corporate career, Cynthia Clampitt headed to Australia, to start over, to write, and to test the limits of what she could do. *Waltzing Australia* recounts that joyous adventure. It is a story about change and about making dreams come true. But more than that, it is about Australia: the history, legends and art, both European and Aboriginal; the beauty, the challenge, the people, the land. From Sydney to Perth, Tasmania to Darwin, tropics to desert, city to wilderness, Clampitt carries the reader along on an exhilarating grand tour of a fascinating country. With a writing style reminiscent of Annie Dillard, she captures the essence of the land *Down Under* and invites others to fall in love with Australia.

Epistemic contextualism is a recent and hotly debated topic in philosophy. Contextualists argue that the language we use to attribute knowledge can only be properly understood relative to a specified context. How much can our knowledge depend on context? Is there a limit, and if so, where does it lie? What is the relationship between epistemic contextualism and fundamental topics in philosophy such as objectivity, truth, and relativism? The Routledge Handbook of Epistemic Contextualism is an outstanding reference source to the key topics, problems, and debates in this exciting subject and is the first collection of its kind. Comprising thirty-seven chapters by a team of international contributors the Handbook is divided into eight parts: Data and motivations for contextualism Methodological issues Epistemological implications Doing without contextualism Relativism and disagreement Semantic implementations Contextualism outside ' knows ' Foundational linguistic issues. Within these sections central issues, debates and problems are examined, including contextualism and thought experiments and paradoxes such as the Gettier problem and the lottery paradox; semantics and pragmatics; the relationship between contextualism, relativism, and disagreement; and contextualism about related topics like ethical judgments and modality. The Routledge Handbook of Epistemic Contextualism is essential reading for students and researchers in epistemology and philosophy of language. It will also be very useful for those in related fields such as linguistics and philosophy of mind.

**One of the few books of its kind, Acting Up and Getting Down brings together seven African American literary voices that all have a connection to the Lone Star state. Covering Texas themes and universal ones, this collection showcases often-overlooked literary talents to bring to life inspiring facets of black theatre history. Capturing the intensity of racial violence in Texas, from the Battle of San Jacinto to a World War I-era riot at a Houston training ground, Celeste Bedford Walker's Camp Logan and Ted Shine's Ancestors provide fascinating narratives through the lens of history. Thomas Meloncon's Johnny B. Goode and George Hawkins's Br'er Rabbit explore the cultural legacies of blues music and folktales. Three unflinching dramas (Sterling Houston's Driving Wheel, Eugene Lee's Killingsworth, and Elizabeth Brown-Guillory's When the Ancestors Call) examine homosexuality, a death in the family, and child abuse, bringing to light the private tensions of intersections between the individual and the community. Supplemented by a chronology of black literary milestones as well as a playwrights' canon, Acting Up and Getting Down puts the spotlight on creative achievements that have for too long been excluded from Texas Letters. The resulting anthology not only provides new insight into a regional experience but also completes the American story as told onstage.**

As World War II was winding down, German scientists achieved one last great scientific achievement: they used an antigravity propulsion system to launch a rocket to Mars. Their mission appeared to fail, until America's Mars Lander photographs it on Mars. While quickly kept secret from humanity, some are desperate to use this technology to attack Israel with bioterrorism.
