A comprehensive assessment of the economic, social and cultural impacts of migration within South Asia This book addresses the concept of migration with the aim of building theory as well as drawing from existing theories to understand South Asian realities. It highlights the less-explored cultural dimensions of migration—music, literature, cinema and art—thereby extending migration research into the realms of security discourse. The author explores how ideas migrate along with people, and the extent to which the process of transformation and adaptation of these ideas is necessitated by social interactions in the adopted society. Since South Asia is culturally diverse, most migrants need to adapt themselves to unfamiliar social milieus, and this juxtaposition finds expression in rich and diverse cultural forms. The book will be indispensable to researchers and scholars of migration studies, South Asia studies, social anthropology and international relations.

The proposed book is intended to provide a conceptual framework of 'Organisational Flexibility and Competitiveness' supported by research on various types of flexibilities exhibited by an organisation. The need for enterprise flexibility in an era of rapidly advancing technology, intense competition, and globalization, is apparent. Flexibility can be thought of as an ability of the enterprise to quickly and efficiently respond to changes and to bring new products and services quickly to the market place. Beyond this definition, a truly flexible enterprise should prosper in the market through its ability to create truly new and innovative products and services. The book applies the concept of flexibility to various areas: strategy and competitiveness, organization and HR management, information systems, finance and risk management, operations and supply chain management.
