*Bibliotheca Chemica. Verzeichniss der auf dem Gebiete der reinen, pharmaceutischen, physiologischen und technischen Chemie, in den Jahren 1840 bis Mitte 1858 in Deutschland und im Auslande erschienenen Schriften, etc*

First comprehensive and richly illustrated overview of historical Belgian photographic literature The development of photography from its roots in 19th-century science gradually transformed book illustration and the dissemination of images. This fully bilingual reference work presents a first comprehensive survey of Belgian photographic literature of the 19th century, both of illustrated books and of technical publications. It makes a major contribution to academic study in the field, with a corpus composed of 681 entries and, for each title, indicates locations of surviving copies in institutional collections in Belgium and elsewhere. An introductory essay plots the development of photographic publishing in Belgium, making full use of primary and secondary sources. An album of over eighty images draws on the rich iconography of early Belgian photographic literature, most reprinted here for the first time. Premier bilan complet et illustré de l'édition photographique belge au 19e siècle L'évolution de la photographie depuis ses origines dans les sciences du 19e siècle a transformé progressivement l'illustration du livre et la diffusion des images. Le présent ouvrage de référence, entièrement bilingue, a pour but de dresser un premier bilan complet de l'édition photographique belge au 19e siècle, tant iconographique que scientifique. Il constitue une importante contribution aux connaissances historiques dans le domaine et se compose d'un corpus de 681 notices, assorties chacune d'un recensement d'exemplaires localisés dans les collections publiques en Belgique comme ailleurs. Une introduction trace l'évolution de l'édition photographique belge, exploitant pleinement des sources primaires et secondaires. Un album de plus de quatre-vingts illustrations puise dans la riche iconographie des débuts de l'édition photographique belge ; la plupart sont reproduites

ici pour la première fois.

The Photographic Times-bulletin

*Establishing a new vision for film history, Film and Attraction: From Kinematography to Cinema urges readers to consider the importance of complex social and cultural forces in early film. André Gaudreault argues that Edison and the Lumières did not invent cinema; they invented a device. Explaining how this device, the kinematograph, gave rise to cinema is the challenge he sets for himself in this volume. He highlights the forgotten role of the film lecturer and examines film's relationship with other visual spectacles in fin-de-siècle culture, from magic sketches to fairy plays and photography to vaudeville. In reorienting the study of film history, Film and Attraction offers a candid reassessment of Georges Méliès' rich oeuvre and includes a new, unabridged translation of Méliès' famous 1907 text "Kinematographic Views." A foreword by Rick Altman stresses the relevance of Gaudreault's concerns to Anglophone film scholarship.*
