In Lajwanti, Mulk Raj Anand focuses on a woman's predicament and struggle to find an identity for herself. Frustrated by a rigid pattern of social relationships, gender bias, religious bigotry and her own petty human foibles, her abject condition serves as a metaphor for sacrifice and servility which forms the thematic heart of these stories.

With her award-winning debut novel, Purple Hibiscus, Chimamanda Ngozi Adichie was heralded by the Washington Post Book World as the "21st century daughter" of Chinua Achebe. Now, in her masterly, haunting new novel, she recreates a seminal moment in modern African history: Biafra's impassioned struggle to establish an independent republic in Nigeria during the 1960s. With the effortless grace of a natural storyteller, Adichie weaves together the lives of five characters caught up in the extraordinary tumult of the decade. Fifteen-year-old Ugwu is houseboy to Odenigbo, a university professor who sends him to school, and in whose living room Ugwu hears voices full of revolutionary zeal. Odenigbo's beautiful mistress, Olanna, a sociology teacher, is running away from her parents' world of wealth and excess; Kainene, her urbane twin, is taking over their father's business; and Kainene's English lover, Richard, forms a bridge between their two worlds. As we follow these intertwined lives through a military coup, the Biafran secession and the subsequent war, Adichie brilliantly evokes the promise, and intimately, the devastating disappointments that marked this time and place. Epic, ambitious and triumphantly realized, Half of a Yellow Sun is a more powerful, dramatic and intensely emotional picture of modern Africa than any we have had before.

Photography's prominence in the representation and experience of India in contemporary and historical times has not guaranteed it a position of sustained attention in research and scholarship. For a technology as all pervasive as photography, and a country as colossal as India, this scenario is somewhat of an anomaly. Photography in India explores elements of the past, present and future of photography in the context of India through speculation and reflection on photography as an artistic, documentary and everyday practice. The perspectives of writers, theorists, curators and artists are selectively brought to bear upon known as well as previously unseen photographic archives, together with changes in photographic practice that have been synchronous with contemporary India's rapid urban and rural transformation and the technological shift from chemistry and light to programming and algorithms. Essential reading for anyone interested in Indian photography, this book binds insights into a history of photography with its contemporary development, consolidating wide-ranging thinking on the topic and setting the agenda for future research.

Language research thrives on data collected from spontaneous interactions in naturally occurring situations. However, the process of collecting, transcribing, and analyzing naturalistic data can be extremely time-consuming and often unreliable. This book describes three basic tools for language analysis of transcript data by computer that have been developed in the context of the "Child Language Data Exchange System (CHILDES)" project. These are: the "CHAT" transcription and coding format, the "CLAN" package of analysis programs, and the "CHILDES" database. These tools have brought about significant changes in the way research is conducted in the child language field. They are being used with great success by researchers working with second language learning, adult conversational interactions, sociological content analyses, and language recovery in aphasia, as well as by students of child language development. The tools are widely applicable, although this book concentrates on their use in the child language field, believing that researchers from other areas can make the necessary analogies to their own topics. This thoroughly revised 2nd edition includes documentation on a dozen new computer programs that have been added to the basic system for transcript analysis. The most important of these new programs is the "CHILDES" Text Editor (CED) which can be used for a wide variety of purposes, including editing non-Roman orthographies, systematically adding codes to transcripts, checking the files for correct use of "CHAT," and linking the files to digitized audio and videotape. In addition to information on the new computer programs, the manual documents changed the shape of the "CHILDES/BIB" system--given a major update in 1994--which now uses a new computer database system. The documentation for the "CHILDES" transcript database has been updated to include new information on old corpora and information on more than a dozen new corpora from many different languages. Finally, the system of "CHAT" notations for file transcript have been clarified to emphasize the ways in which the codes are used by particular "CLAN" programs. The new edition concludes with a discussion of new directions in transcript analysis and links between the "CHILDES" database and other developments in multimedia computing and global networking. It also includes complete references organized by research topic area for the more than 300 published articles that have made use of the "CHILDES" database and/or the "CLAN" programs. LEA also distributes the "CLAN" programs and the complete "CHILDES" Database--including corpora from several languages and discourse situations--described in "The CHILDES Project." Be sure to choose the correct platform (IBM or Macintosh) for the "CLAN" programs; the "CHILDES" Database CD-ROM runs on both platforms.

'Go, kiss the world' were Subroto Bagchi's blind mother's last words to him. These words became the guiding principle of his life. Subroto Bagchi grew up amidst what he calls the 'material simplicity' of rural and small-town Orissa, imbibing from his family a sense of contentment, constant wonder, connectedness to a larger whole and learning from unusual sources. From humble beginnings, he went on to achieve extraordinary professional success, eventually co-founding MindTree, one of India'Ã¸Â™s most admired software services companies. Through personal anecdotes and simple words of wisdom, Subroto Bagchi brings to the young professional lessons in working and living, energizing ordinary people to lead extraordinary lives. Go Kiss the World will be an inspiration to 'young India', and to those who come from small-town India, urging them to recognize and develop their inner strengths, thereby helping them realize their own, unique potential.

Autobiography by a freedom fighter, politician, and former chief minister from Jammu and Kashmir.

"Why has the valley of Kashmir, famed for its beauty and tranquillity, become a major flashpoint, threatening the stability of a region of great strategic importance and challenging t Indian state? This book examines the Kashmir conflict in its historical context, from the period when the valley was an independent kingdom right up to the struggles of the present borders of China, Central Asia and the Sub-Continent, the insurgency in the valley has also created serious tensions between India and Pakistan. Drawing upon research in India and historical sources, this book traces the origins of the state in the 19th century and the controversial "sale" by the British of the predominantly Muslim valley to a Hindu Maharaja in exploration of the implications for Kashmir of independence in 1947, it gives a critical account of why, for Kashmir, self-determination may seem a more attractive option than affilia racial whole."--

The era is 1200 CE, when the intruders from the west ravaged Bharat; a small kingdom in its eastern part was entering its golden period. The kingdom of Kalinga though a maritime superpower remained secluded and reclusive to the other nations of Bharat. This was not by chance, but by choice, as this holy land was fulfilling a prophecy that could become the basis of existence for the entire humankind after the Kali Yuga ends. Meet Rajan, the irresponsible younger son in a family of doctors. He's reckless. He's rebellious. And he's dressing up like a woman these days. No. He's not a cross-dresser. Nor is he transgender. He thinks he's a murderer. It all begins with a mother-to-be dying on the young gynaecologist's watch. And to atone for her death, he banishes himself to the boondocks. He arrives at the remote village of Kaatgram, where pregnant women have been dying left, right and centre. But the Kaatgrami men are not about to send their women to a male gynaecologist. So Rajan does the next best thing—he disguises himself as a lady doctor. Rajan feels it is okay to deceive the people about his gender, so long as he gets to save their lives. Damini, the local MLA's daughter, supports him in his dream of setting up a maternity clinic in their village. Rajan falls for her. But she doesn't even know he's a man. Will Rajan manage to woo his sweetheart and marry her? Or will the villagers tear him to pieces when they find out that their lady doctor is actually a man?
