This book help the reader better understand Thai society as a whole and not to belittle anyone or any social norms of any culture.It also highlights those aspects of Thai culture and general situations that one is likely to encounter. It should prove useful to all new visitors who are not really conversant with the plurality of Thai society.

Buddhism, often described as an austere religion that condemns desire, promotes denial, and idealizes the contemplative life, actually has a thriving leisure culture in Asia. Creative religious improvisations designed by Buddhists have been produced both within and outside of monasteries across the region—in Nepal, Japan, Korea, Macau, Hong Kong, Singapore, Laos, Thailand, and Vietnam. Justin McDaniel looks at the growth of Asia's culture of Buddhist leisure—what he calls "socially disengaged Buddhism"—through a study of architects responsible for monuments, museums, amusement parks, and other sites. In conversation with noted theorists of material and visual culture and anthropologists of art, McDaniel argues that such sites highlight the importance of public, leisure, and spectacle culture from a Buddhist perspective and illustrate how "secular" and "religious," "public" and "private," are in many ways false binaries. Moreover, places like Lek Wiriyaphan's Sanctuary of Truth in Thailand, Suối Tiên Amusement Park in Saigon, and Shi Fa Zhao's multilevel museum/ritual space/tea house in Singapore reflect a growing Buddhist ecumenism built through repetitive affective encounters instead of didactic sermons and sectarian developments. They present different Buddhist traditions, images, and aesthetic expressions as united but not uniform, collected but not concise: Together they form a gathering, not a movement. Despite the ingenuity of lay and ordained visionaries like Wiriyaphan and Zhao and their colleagues Kenzo Tange, Chan-soo Park, Tadao Ando, and others discussed in this book, creators of Buddhist leisure sites often face problems along the way. Parks and museums are complex adaptive systems that are changed and influenced by budgets, available materials, local and global economic conditions, and visitors. Architects must often compromise and settle at local optima, and no matter what they intend, their buildings will develop lives of their own. Provocative and theoretically innovative, Architects of Buddhist Leisure asks readers to question the very category of "religious" architecture. It challenges current methodological approaches in religious studies and speaks to a broad audience interested in modern art, architecture, religion, anthropology, and material culture. Pregnancy and infant loss can be the deepest sorrow a family will have to endure. It has the painful ability to rip apart the human heart, leaving it to mourn a lifetime. When you have to say goodbye, before you say hello, it will bring you to a level of grief that is inconceivable to most. Blindly making her way through the months after her second infant loss in eighteen months, Ami Beth Cross tells the gripping tale of her journey to the darkest cavern of her heart. She poetically and profoundly explores the raw experience of loss that most find unimaginable. The faith that she once abandoned brings her to the brink, and she has to question all that she had left behind. Is there a God? And if there is, where is He in the times of such tragedy? This journey is a must-read for anyone who has suffered a pregnancy loss or the loss of a child. As you follow this author's journey, you will have to ask yourself how deep do you go before you find the courage to climb back up. Is it possible to find joy again after the loss of a baby? Can you truly heal a broken heart that has been shattered into a thousand little pieces? The Return to Happiness will take you on that very journey, leaving you spellbound at the resilience of the human heart.

The WEB of Transport Corridors in South Asia develops a holistic appraisal methodology to ensure that economic benefits of investments in transport corridors are amplified and more widely spread, and possible negative impacts such as congestion, environmental degradation, and other unintended consequences are minimized. It focuses on South Asia—not only as one of the world's most populous and poorest regions—but as a hinge between East Asia, Central Asia, the Middle East, and Europe. The book is aimed at politicians, technocrats, civil society organizations, and businesses. It presents case studies of past and recent corridor initiatives, provides rigorous analysis of the literature on the spatial impact of corridors, and offers assessments of corridor investment projects supported by international development organizations. A series of spotlights examines such issues as private sector co-investment; the impacts of corridors on small enterprises and women; and issues with implementing cross-border corridors. The 'WEB' in the title stands for both the wider economic benefits (WEB) that transport corridors are expected to generate and the complex web of transport corridors that has been proposed. The appraisal methodology introduced in this book shows how the web of interconnected elements around corridors can be disentangled and the most promising corridor proposals—the ones with the greatest wider economic benefits—can be selected.

The Durian Tourist's Guide To Thailand

This publication about the urban agenda in the Greater Mekong Subregion (GMS) is timely as the world economy embraces the region with accelerated growth. An important element of the Association of Southeast Asian Nations Economic Community, the GMS is expected to catch up with the rest of Asia by 2050. With urbanization levels still averaging about 30%, gross dome towns and cities have moved ahead to 50%–60%. By 2050, when urban areas in the GMS reach 64%–74%, urban gross domestic product will grow to an estimated 70%–80%. The challenge lies in consolidating and deepening development along the existing corridors and improving the environmental conditions to prepare for future green growth developments.

Michel is a civil-servant at the Ministry of Culture. When his father is murdered, Michel takes a leave of absence to go on a package tour to Thailand. Infuriated by the shallow hypocrisy and mediocrity of his fellow travellers, only the awkward Valerie attracts his attention. Too bashful to pursue her, Michel prefers the uncomplicated pleasures of Thai massage parlours and sex with local women. Back in Paris, he calls Valerie and they plunge into a passionate affair, which strays into S&M, partner-swapping and sex in public. Michel quits his job, and tries to help Valerie and her boss, Jean-Yves, in their ailing travel business, by offering travel packages based on sex tourism in the third world. When their project comes to fruition and the three return to Thailand, Michel discovers that sex is neither the most consuming nor the most dangerous of human passions...

In 1856, just months after Britain and Siam had finalized the historic Bowring trade treaty that would prevent the countries colonization, the violent death of a Siamese official at the new British consulate threatens to scuttle the deal and lead to war. The King and the Consul explores UK and Thai archives to reveal the twists, turns and tensions of this little-known episode that pitted Thailand's renowned King Mongkut, Rama IV, against the first British Consul, Charles Hillier. The crisis was resolved without war, but not without cost for the participants who suffered unintended tragic outcomes. By examining the background to this tragedy, the book reveals how history has often overlooked the importance of an issue that lay behind it the right of foreigners to own land in the country, and issue that continues to be a thorn in the side of Thailand's foreign relations to this day. "The tragic deaths in 1856 of the first British consul to Siam and a Siamese official had an unusual impact on Thailand's property law and Britain's diplomatic presence in the country. This intriguing book could only be written by someone with long residence in Bangkok, through knowledge of Thailand's property law, and enthusiasm for history. Simon Landy gives us a slice of legal and diplomatic history with close attention to its human dimensions. An unusual and lovely read" - Chris Baker

The 21st Century Maritime Silk Road is a key component of China's Belt and Road Initiative and, as such, can play a crucial role in the development of maritime infrastructure throughout Asia and the Pacific in the coming years. This report, developed with the kind support of Sunny International, looks into the overall impacts of the Maritime Silk Road on tourism and assesses the tourism potential of Maritime Silk Road thematic routes across Asia and beyond. The report shows that cruise tourism, targeted investments in decayed maritime infrastructure and the reutilization of ancient port cities can reinvigorate available heritage, support local communities and help diversify a country's tourism sector.

'Perhaps the best introduction yet to the roots of Thailand's present political impasse. A brilliant book.' Simon Long, The Economist Struggling to emerge from a despotic past, and convulsed by an intractable conflict that will determine its future, Thailand stands at a defining moment in its history. Scores have been killed on the streets of Bangkok. Freedom of speech is routinely denied. Democracy appears increasingly distant. And many Thais fear that the death of King Bhumibol Adulyadej is expected to unleash even greater instability. Yet in spite of the impact of the crisis, and the extraordinary importance of the royal succession, they have never been comprehensively analysed – until now. Breaking Thailand's draconian lèse majesté law, Andrew MacGregor Marshall is one of the only journalists covering contemporary Thailand to tell the whole story. Marshall provides a comprehensive explanation that for the first time makes sense of the crisis, revealing the unacknowledged succession conflict that has become entangled with the struggle for democracy in Thailand.

100% of all proceeds of the sale of this book will be donated to the Human Development Fund in Bangkok, Thailand The Reverend Joseph H. Maier, C.Ss.R., is a Redemptorist priest from the United States. He came to Thailand in 1967 as a missionary, serving in north Isan and then among the Hmong in Laos. In 1972, he established the Human Development Foundation in Bangkok's Klong Toey slum, where he has lived and worked for more than 30 years. Threatened and shot at, the unwavering priest has over the years become a no-nonsense, street-smart friend to the poor, from whom he draws constant inspiration. Father Joe, as he's called, has established more than thirty schools, five shelters for street kids, and several projects for women and children with AIDS, working with and against authority, earning enmity and praise in equal measure. In Welcome to the Bangkok Slaughterhouse, he tells the heartbreaking and heartwarming stories of the poorest of Thailand's poor, each a gem guaranteed to bring anger, tears, and joy.

During the 1990s, the Thai provinces saw the rise of a frequently violent competition for business and political leadership. This examination of economic change focuses on this middle ground between metropolis and countryside, an arena being transformed by capitalist development.

Dr Iain Corness is a medical practitioner, racing car driver, photographer, freelance journalist and first rate raconteur. The UK born expat, who fell in love with Thailand - both its people and its way of life - on holiday, and finally managed to move there permanently 20 years later. As a settled 'farang', or Westerner, he enjoys a unique perspective on Thai life and all its eccentricities. His anecdotes are full of the joys of life, and revel in the chaos and charm of 'the only country where you can be run over by a shop'.

Infrastructure is a priority around the world for all stakeholders. Infrastructure projects can continue for several years, from planning and construction to the provision of services. As development in Asia and the Pacific accelerates, governments must invest more in infrastructure to ensure continued economic growth. This book draws on lessons and case studies from Japan and worldwide, covering broad and long-term infrastructure projects. It describes the principles of developing quality infrastructure and focuses on the various steps of a project--from design, planning, and construction to operation and management. It also discusses overseas development assistance, taking examples from Asian Development Bank and World Bank projects. This book is an important reference tool for policy makers in Asia who are planning and implementing large-scale public infrastructure.

The history of Christianity in Asia is little dealt with either by Church historians or by historians of religion. It is generally unknown, even amongst theologians, that there was a long history of Christianity in Persia, India, Central Asia and China before the appearance on the scene of the first missionaries from the West. A systematic history of the Christian Church in Asia before 1500 is needed. Drawing on material hitherto unknown in the English speaking world, this is a timely and important book because there is a heightened interest today in the early forms of Asian Christianity. The Church in Asia today seeks to find forms of religious expression that are in harmony with Asian culture as was the case in the earlier period. The book covers the period up to 1500 CE. The geographical areas dealt with are Palestine, Syria, Mesopotamia, Persia, India, Central and South East Asia, China and Japan. The book takes into account the outward development of the Church in these areas as well as the inner, theological issues.
