

Christopher Columbus Mariner

Since its original landmark publication in 1980, *A People's History of the United States* has been chronicling American history from the bottom up, throwing out the official version of history taught in schools -- with its emphasis on great men in high places -- to focus on the streets and the workplace. Known for its lively, clear prose as well as its scholarly research, *A People's History* is the only volume to tell American history from the point of view of -- and in the words of -- America's women, factory workers, African-Americans, Native Americans, the working poor, and immigrant laborers. As historian Howard Zinn shows, many of our country's greatest battles -- the fights for a fair wage, an eight-hour workday, child-labor laws, health and safety standards, universal suffrage, women's rights, racial equality -- were carried out at the grassroots level, against bloody resistance. Covering Christopher Columbus's arrival through President Clinton's first term, *A People's History of the United States*, which was nominated for the American Book Award in 1981, features insightful analysis of the most important events in our history. Revised, updated, and featuring a new afterword by the author, this special twentieth anniversary edition continues Zinn's important contribution to a complete and balanced understanding of American history.

The story of an uncovered voyage as colorful and momentous as any on record for the Age of Discovery--and of the Black mariner whose accomplishment has been until now lost to history. It began with a secret mission, no expenses spared. Spain, plotting to break Portugal's trade with the fabled Orient, set sail from a hidden Mexican port to cross the Pacific--and then, critically, to attempt the never-before-accomplished return, the *vuelta*. Four ships set out from Navidad, each one carrying a dream team of navigators. The smallest ship, guided by seaman Lope Martín, a mulatto who had risen through the ranks to become one of the most qualified pilots of the era, soon pulled far ahead and became mysteriously lost from the fleet. It was the beginning of a voyage of epic scope, featuring mutiny, murderous encounters with islanders, astonishing physical hardships--and at last a triumphant return to the New World. But the pilot of the fleet's flagship, the *Aurora*, friar mariner Andrés de Urdaneta, later caught up with Martín to achieve the *vuelta* as well. It was he who now basked in glory, while Lope Martín was secretly sentenced to be hanged by the Spanish crown as repayment for his services. Acclaimed historian Andrés Reséndez's brilliant scholarship and riveting storytelling--including an astonishing outcome for the resilient Lope Martín--sets the record straight.

A Patriot's History of the United States

The Voyage of Discovery, 1492

Beautiful two-page spreads introduce young readers to the history of the world's mariners and their most memorable sea voyages. Here are the ships, the men, the trade routes they established, and their voyages of discovery. A few of the book's illustrated entries include-- Phoenician sea traders (1300 B.C. to 140 B.C.) who plied the Mediterranean and ultimately extended their voyages to Britain in the west, and India in the east. The Vikings of Scandinavia (1st Millennium A.D.), who colonized Greenland and Iceland, explored the North American coastline, and raided and traded along the European coast.

from France to Constantinople China's Ming Dynasty treasure trading ships (4th Century B.C. to circa 1190 A.D.), which were first to use the compass, a ship's rudder, and multiple masts with fore and aft rigging The 15th- and 16th-century European voyages of global exploration by Vasco da Gama, Christopher Columbus, Ferdinand Magellan, Francis Drake, and others The voyages of British Naval Captain James Cook (1760s and 1770s) and his exploration of the south seas, the East Indies, Australia, and Easter Island The handsomely illustrated spreads have miniature maps, lift-flaps, and attached miniature booklets presenting added facts about voyagers and exploration. A slide-out drawer built into the book's sturdy back cover contains a working model ship's compass, a pair of lenses to construct a small telescope, a cardboard model of Captain Cook's sailing ship Endeavor to assemble, and a miniature rope for practicing sailors' knots. The book's back-cover endpaper displays an antique map of the Western Hemisphere, and when the slide-out drawer is opened, a tab that pictures a sailing ship glides across the map's surface. Brilliant color illustrations on every page.

Rethinking Columbus

An Exploration of the Man, the Myth, the Legacy

From a Manuscript Recently Discovered in Spain

Admiral of the Ocean Sea

The final decade of the fifteenth century was a turning point in world history. The Genoese mariner Christopher Columbus sailed westward on the Atlantic Ocean in 1492, famously determined to discover for Spain a shorter and more direct route to the riches of the Indies. Meanwhile, a fellow Italian explorer for hire, John Cabot, set off on his own journey, under England's flag. Here, Douglas Hunter tells the fascinating tale of how, during this expedition, Columbus gained a rival. In the space of a few critical years, these two men engaged in a high-

stakes race that threatened the precarious diplomatic balance of Europe-to exploit what they believed was a shortcut to staggering wealth. Instead, they found a New World that neither was looking for. Hunter provides a revelatory look at how the lives of Columbus and Cabot were interconnected, and how neither explorer can be understood properly without understanding both. Together, Cabot and Columbus provide a novel and important perspective on the first years of European experience of the New World.

Christopher Columbus returned to Europe in the final days of 1500, ending his third voyage to the Indies not in triumph but in chains. Seeking to justify his actions and protect his rights, he began to compile biblical texts and excerpts from patristic writings and medieval theology in a manuscript known as the Book of Prophecies. This unprecedented collection was designed to support his vision of the discovery of the Indies as an important event in the process of human salvation - a first step toward the liberation of Jerusalem and the Holy Land from Muslim domination. This work is part of a twelve-volume series produced by U.C.L.A.'s Center for Medieval and Renaissance Studies which involved the collaboration of some forty scholars over the course of fourteen years. In this volume of the series, Roberto Rusconi has written a complete historical introduction to the Book of Prophecies, describing the manuscript's history and analyzing its principal themes. His edition of the documents, the only modern one, includes a complete critical apparatus and detailed commentary, while the facing-page English translations allow Columbus's work to be appreciated by the general public and scholars alike.

The Next 500 Years

The Mariner and the Man

Offers a dramatic reconstruction of the life and times of Gudrid, a Viking woman who, according to Icelandic sagas, arrived in the New World, spent three years there, and gave birth to a baby, before sailing home some five hundred years before Columbus, drawing on the latest archaeological data, scientific research, and cutting-edge technology to trace her odyssey. Reprint.

For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more

emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.
