Provides an experimental approach to innovation, using such popular culture examples as NFL Films, Starbucks, and J. Crew to show how success can be achieved through prototyping and testing.

TV's most successful comedy producer, Chuck Lorre delivers a hilarious collection of vanity cards in print for the first time. Since 1997, fans of some of the most popular sitcoms ever broadcast — The Big Bang Theory, Two and a Half Men, Mike & Molly and Dharma & Greg — have been granted a fleeting glimpse each week into the unfettered and uncompromising mind of the incredibly prolific creative force behind those series, Chuck Lorre. That's because Lorre devotes exactly one second of airtime per show to expressing his deepest thoughts at the end of each episode and, quite frankly, every day. Now, for the first time ever, hundreds of Lorre's witty and insightful musings have been gathered together in a limited-edition, slipcase book from Chuck Lorre himself that reveals a hilarious, thought-provoking and scandalous body of work unlike any other creative endeavor. Veering from philosophical treatises to personal revelations to the occasional furious diatribe, Lorre never shies away from controversy — even in the face of network censorship, as has often happened. But never fear: Every word on the Enhanced with sly, inguis illustrations and designs that capture the off-kilter essence of Lorre's bite-sized dispatches, *What Doesn't Kill Us Makes Us Bitter* will change the way you think about life, the universe and TV — or at least it'll save your eyesight.

When Avery's down and out, her embarrassing past with Logan forces her into an educational—and very sexy—future. Years ago, Avery's neighbor Logan proposed to her on his eighteenth birthday. She'd always known the genius next door was different. After all, he'd become a professor in his teens. But that day, for the first time, she'd actually seen him as a man and it had disturbed her, so much so that she'd avoided Logan for years afterward. Now Avery's broken up with her employer and live-in boyfriend and she's out of a job and out on the street. As a result, she's accumulated history between them. Logan is trying to help her get back on her feet, but Avery suspects he has an ulterior motive. When it comes out that he's still suffering from that old teenage obsession with her, she severs the relationship, no matter how much it hurts in the process. After all, the two of them couldn't possibly work out, could they?

Recently, children-free people have been foregrounded in mainstream media. More than seven percent of Western women choose to remain childfree and this figure is increasing. Being childfree challenges the ‘procreation imperative’ residing at the center of our hetero-normative understandings, occupying an uneasy position in relation to—simultaneously—traditional academic ideologies and prevalent social norms. After all, as Adi Avivi recognizes, “if a woman is not a mother, the patriarchal social order is in danger.” This collection engages with these (mis)perceptions about childfree people in media representations, demographics, historical documents, and both psychological and philosophical models. Foundational pieces from established experts on the childfree choice—Rhonny Dam, Laurie Lisle, Christopher Clausen, and Beranice Fisher—appear alongside both activist manifestos and original scholarly work, comprehensively brought together. Academics and activists in various disciplines and movements also riff on the childfree life: its implications, its challenges, its conversations, and its agency—all in relation to its inevitability in the 21st century. Childfree across the Disciplines unequivocally takes a stance supporting the subversive potential of the childfree choice, allowing readers to understand childfreedom as a sense of continuing potential in who—or what—a person can become.

Siblings will rival. Relatives will drop in and stay too long. Children will demand to know Why? Interpersonal conflict is seldom as intense as two gunslingers glaring at each other from ten paces at High Noon. It is seldom as colorful as a red-faced husband and wife, standing in their kitchen, shouting insults. It is more often a tale of two perspectives demanding to be heard. Conflict is one of those peculiar concepts few people can define without a dictionary, but most people know it when they see it! We also want it resolved promptly and to our personal satisfaction. How should Christians resolve interpersonal conflict? Should we simply give in to someone with whom we disagree just to avoid conflict? What are the rules when Christians become petty, insensitive or argumentative? If we love our neighbor as we love ourselves, how do we confront conflict without compromising our values? The solution is to understand and learn to confront the behavior, not the people we love. “A Tale of Two Perspectives” explores the dynamics of interpersonal conflict from a Christian point of view. It blends business conflict resolution strategies with biblical narratives to demonstrate a compelling and innovative point of view. Dr. Norris uses his background as a pastor, chaplain, business executive, husband and father to embroider his work with contemporary examples that may sound uncomfortably familiar. He examines how our communication style, personality, attitudes, emotions, frame of reference and spiritual values influence our capacity to resolve conflict effectively.

The corpus-based approach to humor offers innovative and more than plausible objectives, supported by sound arguments, which underline the need to analyze humor both verbally and non-verbally. The cognitive linguistic account of humor sets to analyze a corpus of humorous meanings in interaction and to present the elements that help to create the humorous effects: common ground, intersubjectivity, facial expressions, speakers' attitude, etc. The large corpus of examples annotated in ELAN offers a much-needed multimodal perspective of humor, which encompasses all the different techniques used by speakers. The present analysis offers inspiring insight for future research, in different fields of study: multimodality, humor, and psycholinguistics. The study reveals the need of analyzing both verbal and non-verbal elements in discourse in general and humor in particular as co-speech gestures are essential for the understanding of the message as intended by the speakers.

ABOUT THE BOOK Who knew that a show about nerds would be so unspeakably cool? That a UCLA particle physics professor would be hired to ensure scientific accuracy throughout a 30 minute CBS sitcom? Apparently, the producers and creators of the smash hit The Big Bang Theory did, and the show now boasts some 12 million viewers a week. And it seems that the show is also inspiring would-be and current physicists (and other scientists, too); according to the show's science consultant, Dr. David Saltzberg of UCLA, emails are received from both high school and graduate students asking him about certain scientific aspects of the show. He also notes that there was a lot of background work that the writers did prior to shooting, such as following graduate students around and exploring what a physicist's apartment might actually look like. According to Saltzberg, a real physicist's apartment was a bit too boring, so the producers had to dress up Leonard and Sheldon's apartment a little. But, the science itself was spot on. **MEET THE AUTHOR** Chris St-Jean is a Canadian teacher who has enjoyed American literature for as long as she can remember. Her daughters, ages three and seven, seem to have inherited her appreciation for books as well. She spends her free time writing short stories, hanging out with her husband and children, and working toward a black belt in karate. **EXCERPT FROM THE BOOK** Simon Helberg as Howard Wolowitz: One of Helberg's biggest passions was music until he hit the 11th grade. That's when he played a delivery part in an all-female production. Since then, he's appeared in shows like Studio 60 on the Sunset Strip and Joey, often being typecast as the geek. He got the role of Wolowitz in 2007, prior to the show's start. Kunal Nayyar as Raj Koothrappali: Nayyar is the newest to the small screen; he was born in London, England and grew up in India. He decided to pursue educational opportunities in the United States and majored in business at the University of Portland in Oregon while taking some acting classes. From there, he went to Temple University in Philadelphia and earned his Masters of Fine Arts. He is a cricket fan and had a guest starring role on NCIS before snagging the part on The Big Bang Theory... Buy a copy to keep reading!

Award-winning essayist Tom Bissell explores the highs and lows of the creative process. He takes us from the set of The Big Bang Theory to the first novel of Ernest Hemingway to the final work of David Foster Wallace; from the films of Werner Herzog to the film of Tommy Wiseau to the editorial meeting in which Paula Fox's work was relaunched into the world. Originally published in magazines such as The Believer, The New Yorker, and Harper's, these essays represent ten years of Bissell's best writing on every aspect of creation—be it Iraq War documentaries or video-game character voices—and will provoke as much thought as they do laughter. What are sitcoms for exactly? Can art be both bad and genius? Why do some books survive and others vanish? Bissell's exploration of these questions make for gripping, unforgettable reading.

Actual play is a movement within role-playing gaming in which players livestream their gameplay for others to watch and enjoy. This new medium has allowed the playing of games to become a digestible, consumable text for individuals to watch, enjoy, learn from, and analyze. Bridging the gap between the analog and the digital, actual play is changing and challenging our expectations of tabletop role-playing and providing a space for new scholarship. This edited collection of essays focuses on Dungeons and Dragons actual play and examines this phenomenon from a variety of different disciplinary approaches. Authors explore how to define actual play, how fans interact with and affect the narrative and gameplay of actual play, the diversity of gamers (or lack thereof) within actual play media, and how audiences can use actual play media for more than mere entertainment.

Situation Comedy, Character, and Psychoanalysis puts the sitcom character on the analyst's couch and closely examines the characters of Basil Fawlty, Lucy Ricardo and Kim from Australia's Kath & Kim, in order to reveal the essential elements that must exist in a sitcom before even the first joke is written. Original in its approach, D.T. Klika uncovers major findings about the sitcom as well as human behavior and relationships that we find 'arresting' and even 'familiari[?]'. By offering a new way of reading the sitcom using psychoanalytic theory, this book can be used as a basis for engaging in critical discourses as well as textual analysis of programs. Psychoanalytic theory enables a reading of character motivations and relationships, in turn elucidating the power struggle that exists between characters in this form of comedy. **Situation Comedy, Character, and Psychoanalysis** shines a light on what is at play in the sitcom that makes us laugh, and why we love the characters we do, only to discover that this form of comedy is more complex than we first thought.

The outsized influence of Jews in American entertainment from the early days of Hollywood to the present has proved an endlessly fascinating and controversial topic, for Jews and non-Jews alike. From Shtetl to Stardom: Jews and Hollywood takes an exciting and innovative approach to this rich and complex material. Exploring the subject from a scholarly perspective as well as up close and personal, the book combines historical and theoretical analysis by leading academics in the field with inside information from prominent entertainment professionals. Essays range from Vincent Brook's survey of the stubbornly persistent canard of Jewish industry "control" to Lawrence Baron and Joel Rosenberg's panel presentations on the recent burhauha over Ben Urwand's book alleging collaboration between Hollywood and Hitler. Case studies by Howard Rodman and Joshua Louis Moss examine a key Coen brothers film, A Serious Man (Rodman), and Jill Soloway's groundbreaking television series, Transparent (Moss). Jeffrey Shandler and Shaina Hamerman train their respective lenses on popular satirical comedians of yesteryear (Allan Sherman) and those currently all the rage (Amy Schumer, Lena Dunham, and Sarah Silverman). David Isaacs relates his years of agony and hilarity in the television comedy writers' room, and interviews include in-depth discussions by Ross Melnick with Laemmle Theatres owner Greg Laemmle (relative of Universal Studios founder Carl Laemmle) and by Michael Renow with Mad Men creator Matthew Weiner. In all, From Shtetl to Stardom offers a uniquely multifaceted, multimediated, and up-to-the-minute account of the remarkable role Jews have played over the centuries and ongoing in American popular culture.

From an innocuous encounter in an airplane, to discourses of the enrichment of the only philosophy his own father handed down to him, through issues of concern for dereliction of education, to building a wholesome and homogeneous community. He highlights issues through his own journey through life and the numerous reclaration of those he had made and shared in a span of close to two decades, blending fun and earnest graveness without being preachy or sanctimonious. Drawing from the Desiderata and his favorite prayer, Good Morning God, he uses an engaging discourse form to deliver the message that our stories, individually and collectively, written or unwritten, is the culmination of the worlds story. In this book, he shows that inspiration is not fardetched and that from effecting liveability in our immediate surrounding we can shape our story to effect points of contact and communication that will eventually give the world story, the great Story,...a chance to develop.

TV on Strike examines the 2007 upheaval in the entertainment industry by telling the inside story of the hundred-day writers' strike that crippled Hollywood. The television industry's uneasy transition to the digital age was the driving force behind the most significant labor dispute of the twenty-first century. The strike put a spotlight on how the advent of new-media distribution platforms is reshaping the traditional business models that have governed the entertainment business for decades. The uncertainty that sent writers out into the streets of Los Angeles and New York with picket signs laid bare the depth of the divide, after years of industry consolidation, between the handful of media barons who rule Hollywood and the writers whose works support the industry. With both sides afraid of losing millions in future profits, a critical communication breakdown spurred a brief but fierce fight with repercussions that continue today. The saga of the Writers Guild of America strike is told here as seen through the eyes of key players on both sides of the negotiating table and of the foot soldiers who shocked even themselves with the strength of their resolve to fight for their rights in the face of an ambiguous future.

The Films of James Cameron

Informative, entertaining and upbeat, this book continues Grazier and Cass's exploration of how technology, science, and scientists are portrayed in Hollywood productions. Both big and small-screen productions are featured and their science content illuminated—first by the authors and subsequently by a range of experts from science and the film world. Starring roles in this volume are played by, among other things, computers (human and mechanical), artificial intelligences, robots, and spacecraft. Interviews with writers, producers, and directors of acclaimed science-themed films stand side by side with the perspectives of scientists, science fiction authors, and science advisors. The result is a stimulating and informative reading experience for the layperson and professional scientist or engineer alike. The book begins with a foreword by Zack Stentz, who co-wrote X-Men: First Class and Thor, and is currently a writer/producer on CW's The Flash.

Pragmatics of Fiction provides systematic orientation in the emerging field of studying pragmatics with/in fictional data. It provides an authoritative and accessible overview of this versatile new field in its methodological and theoretical richness. Giving center stage to fictional language allows scholars to review key concepts in sociolinguistics such as genre, style, voice, stance, dialogue, participation structure or features of orality and literariness. The contributors explore language as one of the creative tools to craft story worlds and characters by drawing on concepts such as regional, social and ethnic language variation, as well as multilingualism. Themes such as emotion, taboo language or impoliteness in fiction receive attention just as the challenges of translation and dubbing, the creation of past and future languages, the impact of fictional language on language change or the fuzzy boundaries of narratives. Each contribution, written by a leading specialist, gives a succinct, representative and up-to-date overview of research questions, theories, methods and recent developments in the field.

Too often situations pop up that turn our world upside down. We become overwhelmed and hate falling victim to our circumstances. We desperately want to take control of our lives. Unfortunately, the good life seems to keep floating just beyond our reach. What can we do to make our lives better? Is it possible for us to take control of our own lives? After decades of training, research, and teaching, Dr. Neal has discovered a valuable path to better health and more joy-filled living. And the route is surprisingly simple. It's all about thoughts. Through a series of thought exercises, explanations, and examples, Neal guides us to explore how thoughts are connected to body, mind, and spirit. We learn to become more consciously aware of our thoughts and how knowledge is obtained. We begin to take responsibility for our choices. Own Your Thoughts, Own Your Life is not just another self-discovery book about how to improve your attitude or overcome bad habits. Owing your own thoughts allows you to dig down into the root of the problem and guide you forward to healthier thinking and a better life. Any generally curious person will find this book engaging. Dr. Neal inspires readers to continue to think long after they've closed the book. While the examples, exercises, and explanations are engaging, the ideas and perspectives that the book raises will stick with people for years afterwards and help them to live better lives. ~Ben Reese

Beese Former student of Dr. Michael D. Biehl, currently studying at Middlebury College. Most books on Mindset are fluff; mere pop psychology. Dr. Neal has written an in-depth book of techniques and strategies to change your life. I guarantee that in this book you'll find plenty of cutting-edge information to alter your way of thinking. — Robert G. Allen 5X NY Times Bestselling Author As a response to real or imagined subordination, popular culture reflects the everyday experience of ordinary people and has the capacity to subvert the hegemonic order. Drawing on central theoretical approaches in the field of critical disability studies, this book examines disability across a number of internationally recognised texts and objects from popular culture, including film, television, magazines and advertising campaigns, children's toys, music videos, sport and online spaces, to attend to the social and cultural construction of disability. While acknowledging that disability features in popular culture in ways that reinforce stereotypes and stigmatise, Disability and Popular Culture celebrates and complicates the increasing visibility of disability in popular culture, showing how popular culture can focus passion, create community and express defiance in the context of disability and social change. Covering a broad range of concerns that lie at the intersection of disability and cultural studies, including media representation, identity, the beauty myth, aesthetics, ableism, new media and sport, this book will appeal to scholars and students interested in the critical analysis of popular culture, across disciplines such as disability studies, sociology and cultural and media studies.

Among the most expensive—and most profitable—films of all time, the works of James Cameron have had a profound effect upon popular culture and the technology of moviemaking. Yet the very blockbuster nature of his films means that the political commentary, cultural discourse and rich symbolism within the works are often overlooked. From The Terminator to Avatar, the director has evinced a persistence of themes, concerns and visions that capture the contemporary zeitgeist. This collection of essays on James Cameron's films, written by a diverse group of scholars from a wide range of disciplines, provides a comprehensive exploration of the work and legacy of one of America's foremost filmmakers.

Can comedy on television harbour elements of gender transgression or subversion? If a man is permitted to be 'funny peculiar' – playing the underdog or misfit – does a woman seem stranger in his place? Mapping examples from British and American comedy television over the past 60 years, from I Love Lucy to The Big Bang Theory and Smack the Pony to Wailing For God, this book asks: are particular forms of television comedy gendered in specific ways? Paying attention to series which have not been addressed in academic work, as well as more established shows, White offers fresh insights for the fields of television studies, gender and women's studies, cultural history and comedy.

This work offers parents, educators, and librarians a practical guide to discovering the ways gender identities are constructed through literacy practices, providing recommendations for addressing gender inequities in schools and in the community at large.

TV on Strike examines the upheaval in the entertainment industry by telling the inside story of the hundred-day writers' strike that crippled Hollywood in late 2007 and early 2008. The television industry's uneasy transition to the digital age was the driving force behind the most significant labor dispute of the twenty-first century. The strike put a spotlight on how the advent of new-media distribution platforms is reshaping the traditional business models that have governed the television industry for decades. The uncertainty that sent writers out into the streets of Los Angeles and New York with picket signs laid bare the depth of the divide between the media barons who rule the entertainment industry and the writers who are integral as the creators of movies and television shows. With both sides afraid of losing millions in future profits, a critical communication breakdown spurred a fierce battle with repercussions that continue today. The saga of the Writers Guild of America strike is told through the eyes of the key players on both sides of the negotiating table and of the foot soldiers who surprised even themselves with the strength of their resolve to fight for their rights in the face of an ambiguous future. In the years since the strike ended, the rise of digital distribution platforms has changed the business landscape in ways that few could have predicted when Hollywood guilds were feverishly trying to hammer out a contract template for a new era.

This book explores the border zones between life and non-life as represented in cinema from the end of the nineteenth century, when France led the global film industry, to the first decades of the twenty-first century, when world film markets are dominated by Hollywood. Informed by both the Internet of Things and the Parliament of Things, The Cinema of Things examines cinematic depictions of the ways in which human beings are prosthetically engaged with life beyond the self in the global age: by hyperconsumption; by structures of racial and sexual objectification that reduce people designated as "others"? to objects of fascination, sexual gratification, warfare, or labor; and by information technology that replaces human agency with encoding. Consumer culture, a key feature of globalization, posits that we must supplement ourselves with commodities without which we would otherwise be incomplete: but these prostheses, rather than enhancing us, end up creating the insufficiencies they were meant to overcome. We are engulfed by objects, to the extent that we ourselves are becoming objectified. At the same time, objects, especially technological objects, are becoming increasingly autonomous, assuming roles that were once the preserve of human agency. We are becoming the objects of globalization, and cinema imaginatively represents this transformation, but it also offers us the possibility of retaining our humanity in the process.

This book won the Ohio Professional Writer's, Inc. 2014 Communication Competition Award Now in its second edition, The Televiewing Audience is a user's guide for the only household appliance that doesn't come with one. Watching television seems relatively effortless - it is, after all, a major form of entertainment in the U.S. and overseas - yet this book argues that there is nothing simple about watching television; it is a learned activity which is in a constant state of revision and upgrading. Now more than ever, televiewing requires the generation and application of critical thinking to guide program selection, inform appreciation, generate greater pleasure, and inspire dialogue after consumption. This book is about becoming a more thoughtful and informed consumer, designed to shatter the anonymity of the televiewer, and to create a sense of community, for we rarely think of ourselves as instrumental in the televiewing experience or think of the experience as a shared event. Designed for courses related to broadcasting, media effects, media literacy, and audience studies, this book provides a comprehensive overview of the ways in which television influences the way we think about ourselves and our culture. It places us center-stage in the extremely complicated, competitive, creative, and costly endeavor that is television.
