This extensively revised and fully updated second edition is designed as a textbook for M.A. (Education), M.Ed., M.A. (Psychology and Sociology) and for research students pursuing courses in Statistics related to these subjects. It takes into account the present syllabi of various universities and institutes of education across the country. What's New to the Second Edition : Six new chapters added with emphasis on advanced statistical concepts and techniques such as the following : - Biserial correlation, point biserial correlation, tetrachoric correlation, phi coefficient, partial and multiple correlation. - Transfer of raw scores into standard scores, T, C and Stanine scores. - Non-parametric tests like the McNemar test, Sign test, Wilcoxon test, Median test, U test, Runs test, and KS test. - Analysis of covariance. Some chapters modified and reshuffled to reflect the new emphasis. Entire text thoroughly checked and marked improvements made to bring the topics up to date.

Creating an exceptionally student-friendly textbook in psychology isn't just about making the chapters shorter and pages more colorful. It's about using that type of format to provide a clear portrait of psychological science, concise but not oversimplified, all while continually answering the recurring student question: "What does this have to do with me?" David Myers' brief introduction to psychology, *Psychology in Everyday Life*, certainly does offer brief, easily manageable chapters and a colorful, image-rich design (both shaped by extensive research, class testing, and instructor/student feedback). But what makes it such an exceptional text is what flows through those chapters—rich presentations of psychology's core concepts and field-defining research, examined in context of the everyday lives of all kinds of people around the world and communicated in the captivating storyteller's voice that

is instantly recognizable as Myers'. The new edition of Psychology in Everyday Life offers an extraordinary amount of new research, effective new inquiry-based study tools, and further design innovations, all while maintaining its trademark brevity and clean layout. And it is accompanied by an innovative media/supplements of the same scope as all of David Myers' more comprehensive textbooks.

The Science of Psychology: An Appreciative View treats psychology as an integrated science - placing function before dysfunction. The narrative shows where the various subfields of the science interconnect. This second edition provides a flexible solution for an AP Psychology course. From its readable and lively prose to the adaptive questioning diagnostic tool and personalized study plan on Connect Psychology, The Science of Psychology ensures an accurate and timely understanding of psychology as a science. Pedagogical and analytical thinking aides, intersections, and Psychological Inquiry encourage students' critical thinking and active engagement with the reading. Laura King's contemporary, engaging, and personal writing style draws students into the text and encourages them to read more actively and critically. The Science of Psychology adapts to students individually and provides a roadmap for success that gets students reading and studying more frequently, effectively, and efficiently. The adaptive questioning diagnostic in the Connect Psychology web-based assignment and assessment platforms ensures students understand key chapter concepts. Connect Psychology - turnkey course setups are available almost immediately, or the course can be customized at virtually any level. *Psychology [RENTAL EDITION]*

Kristen Ciccarelli's distinct brand of lyrical, haunting fantasy continues in the companion to her bestselling debut, *The Last Namsara*. Perfect for fans of Kristin Cashore and Renee Ahdieh. Once there were two sisters born with a bond so strong that it forged them together forever. Roa and Essie called it the hum. It was a magic they cherished—until the day a terrible accident took Essie's life and trapped her soul in this world.

Dax—the heir to Firgaard's throne—was responsible for the accident. Roa swore to hate him forever. But eight years later he returned, begging for her help. He was determined to dethrone his cruel father, under whose oppressive reign Roa's people had suffered. Roa made him a deal: she'd give him the army he needed if he made her queen. Only as queen could she save her people from Firgaard's rule. Then a chance arises to right every wrong—an opportunity for Roa to rid herself of this enemy king and rescue her beloved sister. During the Relinquishing, when the spirits of the dead are said to return, Roa discovers she can reclaim her sister for good. All she has to do is kill the king.

Through lively writing and stimulating examples, authors Carole Wade and Carol Tavris invite readers to actively explore the field of psychology and the fundamentals of critical and scientific thinking.

Kristen Ciccarelli ' s debut fantasy explores an intricately woven world of deception, inner darkness, and dragons that fantasy fans won ' t be able to resist. In the beginning, there was the Namsara: the child of sky and spirit, who carried love and laughter wherever he went. But where there is light, there must be darkness—and so there was also the Iskari. The child of blood and moonlight. The destroyer. The death-bringer. These are the legends that Asha, daughter of the king of Firgaard, has grown up learning in hushed whispers, drawn to the forbidden figures of the past. But it isn ' t until she becomes the fiercest, most feared dragon slayer in the land that she takes on the role of the next Iskari—a lonely destiny that leaves her feeling more like a weapon than a girl. Asha conquers each dragon and brings its head to the king, but no kill can free her from the shackles that await at home: her betrothal to the cruel commandant, a man who holds the truth about her nature in his palm. When she ' s

offered the chance to gain her freedom in exchange for the life of the most powerful dragon in Firgaard, she finds that there may be more truth to the ancient stories than she ever could have expected. With the help of a secret friend—a slave boy from her betrothed 's household—Asha must shed the layers of her Iskari bondage and open her heart to love, light, and a truth that has been kept from her.

**In this fresh new offering to the Intro Psychology course, authors John Cacioppo and Laura Freberg portray psychology as being an integrative science in two ways. First, they have written a text that reflects psychology's rightful place as a hub science that draws from and is cited by research in many other fields. Second, this text presents psychology as a unified science that seeks a complete understanding of the human mind, rather than as a loosely organized set of autonomous subspecialties. As psychology moves rapidly toward maturity as an integrative, multidisciplinary field, the introductory course offers an opportunity to teach all of psychology in one place and at one time. This text reflects that evolution--and the authors' excitement about it.
