CIMA offers a business qualification with a finance focus, aiming to produce members with accounting prowess who are skilled in strategic decision-making. 98% of its members work in business, the highest proportion of any worldwide accountancy body. Paper P1 looks at how information is obtained, evaluated and used to control and predict business performance. The syllabus is split into the following five areas: * Cost accounting systems * Forecasting and budgeting techniques * Project appraisal * Dealing with uncertainty in analysis * Managing short-term finance P1 requires a good understanding of the underlying concepts and techniques in all five areas. P1 also needs you to be able to apply these concepts to practical situations, evaluate them critically and interpret the results. The P1 Study Text contains all you need to know for P1, featuring step-by-step guides to techniques such as investment decision making and budget preparation. There are also reminder sections of knowledge brought forward from earlier studies such as costing terminology. Key terms are identified throughout the Text to help you to get to grips with the new material.

Keep in mind, the CIMA exam is NOT an accountant exam. It is more of a business management nature. Pure accounting knowledge would not be sufficient. CIMA places emphasis on strategic business skills. A CIMA qualification can widen one's career options, in and outside of finance. In fact, CIMA claims itself as the only accounting body that focuses primarily on business needs. As a Chartered Management Accountant, one is at the forefront of business planning, strategy and change across the sectors - industry, commerce, and the public sector and not-for-profit organizations. It is generally believed that the CIMA certification is more "international" while the CMA certification (the one from IMA) is more US oriented. According to the CIMA, a Chartered management accountant is qualified to engage in a wide variety of activities, such as: -advising managers about the financial implications of project management -explaining the financial consequences of management decisions and suggesting actions -making strategic decisions and formulating business strategies to create wealth and shareholder value -monitoring spending and financial control -managing risk and business assurance -cost determination and financial control -evaluating existing financial information systems and suggesting improvements -conducting internal business audits and preparing periodic financial statements for managers -explaining the impact of the competitive landscape. The CIMA syllabus has the following exams: E1 enterprise operations E2 enterprise management E3 enterprise strategy F1 financial operations F2 financial management F3 financial strategy P1 performance operations P2 performance management P3 performance strategy To help you focus on the relevant exam contents, we develop the CIMA ExamFOCUS Study Notes to accompany your reading efforts. As a chartered management accountant, you need to be familiar with a wide variety of business management knowledge domains. You do not have to be an expert in each of these domains, but you need to know them well for purpose of the exam, and also for job search. In fact, from a job search site you can find job description like this one: A chartered management accountant applies the principles of accounting to provide the financial information necessary for the planning and financial protection of organizations in the public and private sectors. They establish and maintain financial policies and management information systems, as well as liaise with management colleagues on all aspects of finance. The role combines accounting skills with business management skills. Chartered management accountants look to the future (rather than the past, as in auditing). They analyze the performance of a business and advise on how to pre-empt problems, adapt to changing circumstances and improve value. They may work in a finance function or within specialist departments providing financial advice and information to support strategic business decision-making and control. This set of study notes provide you with knowledge information on the relevant business management domains. As an effective learning aid implemented in the format of study notes, the ExamFOCUS CIMA Study Notes package covers topics relevant to the nine CIMA exams. It is designed to present information in an easy-to-understand, conversational format. Notes are well-written, technically accurate and completely representative of the key information covered by the exams.
