Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher,

children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

In the pursuit of justice, truth always plays a prominent role. Few, if any, legal systems are willing to waive the right to claim that the results of their legal processes are fair, just, and, above all, based on the truth. In most legal systems, elaborate rules on the taking of evidence try to guarantee that an accurate factual basis is used for the application of the law. Such rules are the core of most methods of adjudication and they are the main theme of this book, which focuses specifically on the rules of evidence within the context of efficiency in civil proceedings. Apart from the fact that a link between the pursuit of truth and efficiency has been emphasized since the time of ancient Rome, all legal systems must find the right balance between the amount of time and money invested in the civil trial and the thoroughness of the proof-taking stage in litigation. Obviously, a system of proof that can produce trustworthy results is in need of considerable investment of time and resources, but the amount of time and resources available is not without its limits. If a proper balance between truth and the necessary time and resources cannot be found, the whole process of litigation may be endangered. (Series: Ius Commune Europaeum - Vol. 111)

Fifty-four portraits of women that are striking, beautiful, and real. The bodies in this book have been shaped by the full sweep of the feminine experience. They belong to 54 women from all over the country, ages 19 to 95, of all sizes and shapes, ethnicities, and life experiences, who were willing to expose their naked physical forms in *This Is Who I Am*. They are ordinary women only in the sense that none is a professional model. They are in all other ways extraordinary—courageous, curious, thoughtful, speaking unflinchingly about their bodies, then allowing themselves to be photographed to inspire other women to make peace with their physical selves, "to glorify the real beauty of all women." Certainly, the feminine nude form is not new to artists and photographers. But the portraits in *This Is Who I Am*, taken by award-winning photographer Rosanne Olson, with a steady, unjudgmental eye, speak loudly to the American obsession of feminine perfection—slim hips and full breasts, high cheekbones and tiny waists, taut skin and eternal youth—and even more loudly to the way real women, with real bodies and real lives, look. By turns tender, personal, and moving, this tribute to contemporary womanhood is the perfect gift for mothers to give to daughters, daughters to cousins, cousins to friends.

Drawing on the latest developments in bilingual and multilingual research, The Multilingual Turn offers a critique of, and alternative to, still-dominant monolingual theories, pedagogies and practices in SLA, TESOL, and bilingual education. Critics of the 'monolingual bias' argue that notions such as the idealized native speaker, and related concepts of interlanguage, language competence, and fossilization, have framed these fields inextricably in relation to monolingual speaker norms. In contrast, these critics advocate an approach that emphasizes the multiple competencies of bi/multilingual learners as the basis for successful language teaching and learning. This volume takes a big step forward in re-situating the issue of multilingualism more centrally in applied linguistics and, in so doing, making more permeable its key sub-disciplinary boundaries – particularly, those between SLA, TESOL, and bilingual education. It addresses this issue head on, bringing together key international scholars in SLA, TESOL, and bilingual education to explore from cutting-edge interdisciplinary perspectives what a more critical multilingual perspective might mean for theory, pedagogy, and practice in each of these fields.

Interventions on behalf of Armenia and Armenians have come to be identified by scholars and practitioners alike as defining moments in the history of humanitarianism. This volume reassesses these claims, critically examining a range of interventions by governments, international and diasporic organizations, and individuals that aimed to 'save Armenians'. Drawing on perspectives from a range of disciplines, the chapters trace the evolution of these interventions from the late-nineteenth to the present day, paying particular attention to the aftermaths of the genocide and the upheavals of the post-Soviet period. Geographically, the contributions connect diverse spaces and places - the Caucasus, Russia, the Middle East, Europe, North America, South America, and Australia - revealing shifting transnational networks of aid and intervention. These chapters are followed by reflections from leading scholars in the fields of refugee history and Armenian history, Peter Gatrell and Ronald Grigor Suny. Aid to Armenia not only offers an innovative exploration into the history of Armenia and Armenians and the history of humanitarianism, but it provides a platform for practitioners to think critically about contemporary humanitarian questions facing Armenia, the South Caucasus region and the wider Armenian diaspora.

A fresh and original look at the phenomenon of "cult branding" -- how companies cultivate fanatical customer loyalty. At first glance, companies like Apple and Nike have little in common with organizations like the Hell's Angels and the Unification Church. But in reality, they all fulfill the main definition of a cult: They attract people who see themselves as different from the masses in some fundamental way. Contrary to stereotypes, most cult members aren't emotionally unstable—they're just normal folks searching for a sense of belonging. Marketing expert Douglas Atkin has spent years researching both full-blown cults and companies that use cult-branding techniques. He interviewed countless cult members to find out what makes them tick. And he explains exactly how brands like Harley-Davidson, Saturn, JetBlue, and Ben & Jerry's make their customers feel unique, important, and part of an exclusive group—and how that leads to solid, long-term relationships between a company and its customers. In addition to describing a fascinating phenomenon, *The Culting of Brands* will be of enormous value to business leaders. It will teach marketers how to align themselves with a specific segment of the population, how to attract and keep new "members," how to establish a mythology about the company, and how to manage a workforce filled with true believers. Once a brand achieves cult status, it becomes almost impossible for a competitor to dethrone it. *The Culting of Brands* will reveal the secrets of fierce customer identification and, most important, unbreakable loyalty.

"It's hard to talk about photography without facing issues of time, memory and death - not as stereotypical archetypes, but as challenging and malleable entities of culture and nature." Domingo Milella This first published monograph by Domingo Milella is a photographic journey from his hometown in the outskirts of Bari in southern Italy, taking us to Mexico City, Cairo, Ankara, Anatolia, Sicily, Tunisia, and as far as Mesopotamia. Milella's subject is cities and their borders, cemeteries and villages, caves and homes, tombs and hieroglyphs - in short, signs of man's presence on earth. His interest is the overlap between civilisation and nature, and how landscape and architecture are invested with individual and collective memory. These photographs emerge from and challenge classical ideas of landscape in art history, and seek an alternative iconography in which an almost forgotten past coexists with the present. Says Milella: "Making images doesn't only mean documenting or taking photographs. It's also a possibility for contemplation and recollection. Building an image of the past is to face the present, and activate the possibility of the future."

In 1932, John T. Flynn had begun to rethink his old-style "progressivism" to develop intellectually into a defender of markets as against the regimentation of government management. A first product of these steps is this classic and extraordinary full biography of John D. Rockefeller. In this highly sympathetic portrayal, Flynn shows how Rockefeller employed the tools of capitalism to become enormously rich in the service of others, and how this unleashed the most unexpected backlash from anti-capitalists of all sorts, culminating in the breakup of Standard Oil. He saw that this was done at the behest of Rockefeller's competition, and not in the public interest. It was the first and probably still the best biography of an American original.

Recently, technology and aging have been key research areas in human cognition. The Research Topic "Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition" investigated technology's impact on cognitive and intellectual processes, highlighting how intensively technology can change and/or enhance the cognitive functioning throughout one's lifespan. The aim of this Research Topic was to provide an outlook through multidisciplinary research and development while addressing the dynamic intersection of cognition, mind, and technology. Our scope was 1) to favor the cognitive technology debate, 2) to overcome the dichotomies of technology and psychology, 3) to emphasize the advances in knowledge and well-being. This Research Topic comprises review studies and original articles, focused on digital skills that enhance

human potential. Transversal approaches and cross-sectorial analysis were encouraged, leading to investigation areas related to cognitive and mental processing—in educational, rehabilitation, clinical settings—across aging. Articles of high relevance to the Research Topic were submitted on the subjects of a) research in human performance and human factors, b) new research and technologies addressing the needs of a growing populace, and c) cognitive aging and cognitive rehabilitation research.

The past two decades have seen a significant proliferation of trade and investment treaties around the world. States are increasingly negotiating agreements that regulate both trade and investment, such as the Trans-Pacific Partnership Agreement and the Transatlantic Trade and Investment Partnership. The number of investor-state dispute settlement cases is growing dramatically each year, yet states' enthusiasm for investor-state arbitration has become more qualified as concern has intensified that the system can be abused by foreign investors. Good faith is therefore becoming increasingly important as a principle, particularly in the investment context, due to disputes about investor conduct such as corporate restructuring in order to gain the protection of a particular investment treaty regarding an existing or foreseeable dispute, and States' responses to public policy concerns through attempts to modify or terminate investment treaties in the face of ongoing or expected claims. Tribunals adjudicating investment disputes have used the principle of good faith in a haphazard and uncoordinated manner, causing serious problems of uncertainty and inconsistency. In response to these developments, this book contains the first comprehensive and integrated analysis of the treatment of good faith in international investment law, noting the broader implications of good faith in public international law and international trade law.

### ***The Complete Course for Beginners***

This book is an introduction in the very best sense of the word. It provides the beginner with an accurate, sophisticated, yet accessible account, and offers new insights and challenging perspectives to those who have more specialized knowledge. Focusing on the period in Chinese philosophy that is surely most easily approachable and perhaps is most important, it ranges over of rich set of competing options. It also, with admirable self-consciousness, presents a number of daring attempts to relate those options to philosophical figures and movements from the West. I recommend it very highly.--Lee H. Yearley, Walter Y. Evans-Wentz Professor, Religious Studies, Stanford University

Join the bestselling author of *Ciao, America!* on a lively tour of modern Italy that takes you behind the seductive face it puts on for visitors—la bella figura—and highlights its maddening, paradoxical true self. You won't need luggage for this hypothetical and hilarious trip into the hearts and minds of Beppe Severgnini's fellow Italians. In fact, Beppe would prefer if you left behind the baggage his crafty and elegant countrymen have smuggled into your subconscious. To get to his Italia, you'll need to forget about your idealized notions of Italy. Although *La Bella Figura* will take you to legendary cities and scenic regions, your real destinations are the places where Italians are at their best, worst, and most authentic: The highway: in America, a red light has only one possible interpretation—Stop! An Italian red light doesn't warn or order you as much as provide an invitation for reflection. The airport: where Italians prove that one of their virtues (an appreciation for beauty) is really a vice. Who cares if the beautiful girls hawking cell phones in airport kiosks stick you with an outdated model? That's the price of gazing upon perfection. The small town: which demonstrates the Italian genius for pleasant living: "a congenial barber . . . a well-stocked newsstand . . . professionally made coffee and a proper pizza; bell towers we can recognize in the distance, and people with a kind word and a smile for everyone." The chaos of the roads, the anarchy of the office, the theatrical spirit of the hypermarkets, and garrulous train journeys; the sensory reassurance of a church and the importance of the beach; the solitude of the soccer stadium and the crowded Italian bedroom; the vertical fixations of the apartment building and the horizontal democracy of the eat-in kitchen. As you venture to these and many other locations rooted in the Italian psyche, you realize that Beppe has become your Dante and shown you a country that "has too much style to be hell" but is "too disorderly to be heaven." Ten days, thirty places. From north to south. From food to politics. From saintliness to sexuality. This ironic, methodical, and sentimental examination will help you understand why Italy—as Beppe says—"can have you fuming and then purring in the space of a hundred meters or ten minutes."

While much has been written about the Catholic Church and the Holocaust, little has been published about the hostile role of priests, in particular

**Jesuits, toward Jews and Judaism. Jesuit Kaddish is a long overdue study that examines Jesuit hostility toward Judaism before the Shoah and the development of a new understanding of the Catholic Church's relation to Judaism that culminated with Vatican II's landmark decree Nostra aetate. James Bernauer undertakes a self-examination as a member of the Jesuit order and writes this story in the hopes that it will contribute to interreligious reconciliation. Jesuit Kaddish demonstrates the way Jesuit hostility operated, examining Jesuit moral theology's dualistic approach to sexuality and, in the case of Nazi Germany, the articulation of an unholy alliance between a sexualizing and a Judaizing of German culture. Bernauer then identifies an influential group of Jesuits whose thought and action contributed to the developments in Catholic teaching about Judaism that eventually led to the watershed moment of Nostra aetate. This book concludes with a proposed statement of repentance from the Jesuits and an appendix presenting the fifteen Jesuits who have been honored as "Righteous Among the Nations" by Israel's Yad Vashem Holocaust Center. Jesuit Kaddish offers a crucial contribution to the fields of Catholicism and Nazism, Catholic-Jewish relations, Jesuit history, and the history of anti-Semitism in Europe.**
