Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. Artificial Hells is the first historical and theoretical overview of socially engaged participatory art, known in the US as "social practice." Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Pawe? Althamer and Paul Chan. Since her controversial essay in Artforum in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In Artificial Hells, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. Artificial Hells calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

Probably the most prominent living filmmaker, and one of the foremost directors of the postwar era, Jean Luc-Godard has received astonishingly little critical attention in the United States. With Speaking about Godard, leading film theorist Kaja Silverman and filmmaker Harun Farocki have made one of the most significant contributions to film studies in recent memory: a lively set of conversations about Godard and his major films, from Contempt to Passion. Combining the insights of a feminist film theorist with those of an avant-garde filmmaker, these eight dialogues–each representing a different period of Godard's film production, and together spanning his entire career–get at the very heart of his formal and theoretical innovations, teasing out, with probity and grace, the ways in which image and text inform one another throughout Godard's oeuvre. Indeed, the dialogic format here serves as the perfect means of capturing the rhythm of Godard's ongoing conversation with his own medium, in addition to shedding light on how a critic and a director of films respectively interpret his work. As it takes us through Godard's films in real time, Speaking about Godard conveys the sense that we are at the movies with Silverman and Farocki, and that we, as both student and participant, are the ultimate beneficiaries of the performance of this critique. Accessible, informative, witty, and, most of all, entertaining, the conversations assembled here form a testament to the continuing power of Godard's work to spark intense debate, and reinvigorate the study of one of the great artists of our time.
Francophiles and Paris buffs will find something new and fascinating in this timeless guidebook, filled with sites, passageways, hotels, shops, and more What if—walking around Paris—instead of seeing only the Paris of 2017, you glimpsed Paris in Revolutionary times? Or Paris when it was home to 80,000 horses; or Paris lit by gaslight; or medieval Paris? What if—walking down a block in Paris—you recognized the signs, mosaics, pieces of hardware, and architectural details as relics of many centuries that have stories to tell of past eras? This is what Curiosities of Paris reveals. The book's 800 photos of unique locations and architectural oddities—as well as utilitarian objects whose functions have long been obscured with the passage of time—discloses a previously unnoticed city. Even those who know Paris well might never have registered the thousands of details on every street that testify to the enduring presence of the past: the solar cannon at Invalides, street signs with the word "saint" and all fleur-de-lys removed; the unique features of Parisian street lighting. You'll never look at an elm tree the same way again. And, with Curiosities of Paris as your guide, you'll feel very in-the-know as you walk down the Champs-Élysées past all the auto dealerships. Organized by subject—including fountains and wells; centuries-old shop signs; vestiges of wars and ancient Egypt; hotels of legend; remarkable trees; sundials and meridians; equestrian Paris; romantic ruins; unusual tombs, stairways, and passageways; religious relics; mosaics; public barometers and thermometers; and hundreds more urban elements and anachronisms—the book also includes three themed walks (along the city's ancient walls, in the steps of Quasimodo, and through the Revolution), as well as an index of street names. This absorbing compendium is an essential addition to the library of the armchair traveler and flâneur alike.

Kinetic art not only includes movement but often depends on it to produce an intended effect and therefore fully realize its nature as art. It can take a multiplicity of forms and include a wide range of motion, from motorized and electrically driven movement to motion as the result of wind, light, or other sources of energy. Kinetic art emerged throughout the twentieth century and had its major developments in the 1950s and 1960s. Professionals responsible for conserving contemporary art are in the midst of rethinking the concept of authenticity and solving the dichotomy often felt between original materials and functionality of the work of art. The contrast is especially acute with kinetic art when a compromise between the two often seems impossible. Also to be considered are issues of technological obsolescence and the fact that an artist's chosen technology often carries with it strong sociological and historical information and meanings. www.getty.edu/publications/keepitmoving

This book provides a snapshot of the major social, cultural and economic changes that have taken place in the contemporary consumer society following the global financial crisis of 2008. It discusses brands, consumption patterns and advertising, and highlights their symbolic component. Markets are conversations, as the Cluetrain Manifesto pointed out as early as 2000, and this is all the more so today in our increasingly digitalized society. Advertising, therefore, needs to attune products to the most interesting conversations, those that are consistent with the new sensibility of the individual, identifying the languages which reflect most closely the new values and which are most useful for effective storytelling. The analysis here focuses on Italian advertising, but the language categories described are in tune with the new Zeitgeist, which, faced with the challenge of climate change and the crisis of unlimited economic growth, demands a more informed and responsible approach to consumption globally. The book is, therefore, useful for those working in corporate communication, advertising agencies, universities and Italian cultural organizations.

No judgement of taste is innocent - we are all snobs. Pierre Bourdieu's Distinction brilliantly illuminates the social pretentions of the middle classes in the modern world, focusing on the tastes and preferences of the French bourgeoisie. First published in 1979, the book is at once a vast ethnography of contemporary France and a dissection of the bourgeois mind. In the course of everyday life we constantly choose between what we find aesthetically pleasing, and what we consider tacky, merely trendy, or ugly. Taste is not pure. Bourdieu demonstrates that our different aesth
