Wiley's 11th Hour Final Review Guide for 2020 Level I CFA Exam compacts all readings tested on the 2020 CFA exam into one portable volume. Organized in order, this best-selling guide has helped thousands of candidates from over one-hundred countries pass the CFA exam. Designed to boil it all down to the crucial concepts, formulas and rules, this guide ensures candidates are familiar with the most important testable information. It's

Online Library Classification Study Guide

difficult to go over multiple books in the last few weeks before the exam, so Wiley's 11th Hour Review Guide does the work for you—condensing each reading down to two- to five pages. Enter the exam room with confidence and reinforce your knowledge and preparation! This comprehensive guide complements Wiley's CFA Study Guides sold separately but may be used with any review course. An effective, efficient study guide, this book prepares you to reach the next level in your career. "The

Online Library Classification Study Guide

Eleventh Hour Review book is simply brilliant.

Virtually every sentence it contains is

testable—it's an absolute must-have for every Level

I candidate." —Ameer, UK

"The eleventh hour guide was a great help."

—Konrad, South Africa "I

used your eleventh hour guide and mock exams for

the last bit of my

studying and greatly

enjoyed your material. Out

of all of the exam prep material, I thought

[yours] was the best."

—Thomas, USA "Thanks to

the team for writing the

Online Library Classification Study Guide

most intelligent Chartered Financial Analyst material I have seen to date. The eleventh hour guide is absolute genius and proving very valuable at this stage of the revision process." –Doug, UK

Updated for your 2021 certification, Cirrus Test Prep's unofficial TExES Life Science 712 (238) Study Guide: Comprehensive Review with Practice Test Questions for the Texas Examinations of Educator Standards was made for educators, by educators! Because we understand your life is busy, we created a

Online Library Classification Study Guide

study guide that isn't like other books out there. With TExES Life Science 712 (238) Study Guide, you get a quick but full review of everything on your exam. Cirrus Test Prep's resources will give you the push you need to pass your test the first time. Cirrus Test Prep's study materials ensure that new educators feel prepared on test day and beyond.

Online Library Classification Study Guide

The internal validity of a study reflects the extent to which the design and conduct of the study have prevented bias(es). One of the key steps in a systematic review is assessment of a study's internal validity, or potential for bias. This assessment serves to: (1) identify the strengths and limitations of the included studies; (2) investigate, and potentially explain heterogeneity in findings across different studies included in a systematic review; and (3) grade the

Online Library Classification Study Guide

strength of evidence for a given question. The risk of bias assessment directly informs one of four key domains considered when assessing the strength of evidence. With the increase in the number of published systematic reviews and development of systematic review methodology over the past 15 years, close attention has been paid to the methods for assessing internal validity. Until recently this has been referred to as "quality assessment" or "assessment of methodological

Online Library Classification Study Guide

quality.” In this context “quality” refers to “the confidence that the trial design, conduct, and analysis has minimized or avoided biases in its treatment comparisons.” To facilitate the assessment of methodological quality, a plethora of tools has emerged. Some of these tools were developed for specific study designs (e.g., randomized controlled trials (RCTs), cohort studies, case-control studies), while others were intended to be applied to a range of designs. The tools often

Online Library Classification Study Guide

incorporate characteristics that may be associated with bias; however, many tools also contain elements related to reporting (e.g., was the study population described) and design (e.g., was a sample size calculation performed) that are not related to bias. The Cochrane Collaboration recently developed a tool to assess the potential risk of bias in RCTs. The Risk of Bias (ROB) tool was developed to address some of the shortcomings of existing quality assessment

Online Library Classification Study Guide

instruments, including over-reliance on reporting rather than methods.

Several systematic reviews have catalogued and critiqued the numerous tools available to assess methodological quality, or risk of bias of primary studies. In summary, few existing tools have undergone extensive inter-rater reliability or validity testing.

Moreover, the focus of much of the tool development or testing that has been done has been on criterion or face validity. Therefore it is

Online Library Classification Study Guide

unknown whether, or to what extent, the summary assessments based on these tools differentiate between studies with biased and unbiased results (i.e., studies that may over- or underestimate treatment effects). There is a clear need for inter-rater reliability testing of different tools in order to enhance consistency in their application and interpretation across different systematic reviews. Further, validity testing is essential to ensure that the tools

Online Library Classification Study Guide

being used can identify studies with biased results. Finally, there is a need to determine inter-rater reliability and validity in order to support the uptake and use of individual tools that are recommended by the systematic review community, and specifically the ROB tool within the Evidence-based Practice Center (EPC) Program. In this project we focused on two tools that are commonly used in systematic reviews. The Cochrane ROB tool was designed for RCTs and is

Online Library Classification Study Guide

the instrument recommended by The Cochrane Collaboration for use in systematic reviews of RCTs. The Newcastle-Ottawa Scale is commonly used for nonrandomized studies, specifically cohort and case-control studies. Here's the book you need to prepare for the challenging CISSP exam from (ISC)-2. This revised edition was developed to meet the exacting requirements of today's security certification candidates. In addition to the consistent and accessible instructional
