

*Clinical Essays In Obstetrics And Gynaecology For Mrcog Part Ii  
And Other Postgraduate Exams 2nd E*

A 24-year-old woman is referred from the emergency department with sudden onset of left iliac fossa pain and you are the medic on duty... 100 Cases in Obstetrics and Gynaecology presents 100 commonly seen obstetric and gynaecological scenarios. The patient's history, examination and initial investigations are presented along with questions on the diagnosis and management of each case. The answer includes a detailed discussion on each topic, providing an essential revision aid as well as a practical guide for junior clinicians. Making clinical decisions is one of the most challenging and difficult parts of training to become a doctor. These cases will teach medics and medical students to recognize important obstetric and gynaecological conditions and help them develop their diagnostic and management skills.

Doctors Cry Too!

The Science and Art of Obstetrics

A Treatise on the Theory and Practice of Medicine

Principles and Practice of Surgery

Nervous Diseases: Their Description and Treatment

***Doctors Cry, Too is a collection of essays from the heart of physician Frank H. Boehm, M.D. This moving and inspirational book deals with issues surrounding doctors, nurses, patients, their loved ones, and the perplexing issues that relate***

***to these individuals. These essays portray a medical profession that is sensitive, emotional, spiritual, and compassionate. They include special moments in the life of Dr. Frank Boehm, such as a son and daughter going off to college, coping with the personal grief of losing loved ones, the birth of a granddaughter, and the healing that comes from joy. The essays also address his point of view on such subjects as strength and courage, faith, happiness, depression, forgiveness, death and dying, friendship, the heartbreak of infertility, parenting, and medical expectations. It is the author's hope that this book will help you understand that doctors are subject to the same stresses and pressures of life as everyone else, and that by gaining insight into the heart of one physician, you will gain insight into the heart of many.***

Reproductive health care professionals in fields such as Obstetrics and Gynecology, Family Medicine, and Pediatrics face difficult ethical issues because they work at the crossroads of patient decision-making, scientific advancement, political controversy, legal regulation, and profound moral considerations. The dilemmas these professionals face expose big-picture bioethics questions of interest to everyone. Yet for clinicians striving to deliver excellent patient care, the ethical questions that make daily practice challenging can be just as nuanced. This volume presents a carefully curated compilation of essays written by leading experts in the fields of medicine, ethics, and law, who address key issues at the forefront of reproductive ethics. It is organized into three main sections: I. Contraception and Abortion Ethics - Preventing Pregnancy and Birth, II. Assisted Reproduction Ethics - Initiating Pregnancy, and III. Obstetric Ethics - Managing

Pregnancy and Delivery. Each section begins with a short introduction by the editors providing an overview of the area and contextualizing the essays that follow. This volume's primary aim is to be useful to practicing clinicians, students, and trainees by providing short and practical essays covering urgent topics--from race, religion and abortion, to legal liability, violations of confidentiality and maternal choices that risk future children's health. This collection provides clinicians at all levels of training with frameworks they need to approach the intimate and high-stakes encounters central to their profession.
