To write history is to consider how to explicate the past, to weigh the myriad possible approaches to the past, and to come to terms with how the past can be and has been used. In this book, prize-winning historian Jeremy Black considers both popular and academic approaches to the past. His focus is on the interaction between the presentation of the past and current

circumstances, on how history is used to validate one view of the present or to discredit another, and on readings of the past that unite and those that divide. Black opens with an account that underscores the differences and developments in traditions of writing history from the ancient world to the present. Subsequent chapters take up more recent decades, notably the post-Cold War period, discussing how different perspectives can fuel

discussions of the past by individuals interested in shaping public opinion or public perceptions of the past. Black then turns to the possible future uses of the then past as a way to gain perspective on how we use the past today. Clio's Battles is an ambitious account of the engagement with the past across world history and of the clash over the content and interpretation of history and its implications for the present and future.

technologies, particularly the role of the Internet in the reference process.

This book leads readers through an intriguing examination how books began and have evolved through history, and explores where future technologies may lead them. From ancient clay tablet and scrolls to medieval manuscripts and printed books to personal computers and iPads, this guide examines the fascinating history of books from 4000 BCE to the present. At each step of this evolution, technologies are examined and evaluated to show how these ideas are present from the very beginning of written communication. Moving chronologically from

the ancient world to the present, the book shows how written communication media evolved from cuneiform to the Kindle. Focusing on key technologies and vital periods of historical transition, it traces an evolution that elucidates the history of the written word, at each step examining and evaluating such aspects of technologies as memory capacity, readability and writability, durability, recyclability, information security, ease and mode of access, and cost. Additional attention is paid to how the technologies were made, how they were circulated, and who was reading them. Provides faculty and students a brief but fascinating and engagingly written textbook

*calls attention to the genre of the epyllion and suggests a possible literary influence on later poets and playwrights such as Marlowe and Shakespeare. Indeed, while openly concerned with the central theme of metamorphosis, these short narrative poems express deep male anxiety about female desire. Elizabethan epyllia always seemed prone to renegotiate the orthodoxy of early modern desire in a masculine, somewhat misogynous sphere, addressing the issues of mutability in a world of large-scale social changes. Finally, beyond the restricted readership of the spheres of the Inns of court for which they were originally intended, these works reached a much wider audience. Asking why we coach, through critical reflection and self-knowledge, is also an essential part of the process of becoming a sports coach. The book explores three types of knowledge – content knowledge, pedagogic knowledge and self-knowledge – challenging the reader to reflect on their own coaching experiences and to develop a personal philosophy of coaching. It explores key pedagogic themes in contemporary coaching studies, such as humanistic coaching, inclusive practice, coaching for understanding, and the athlete-coach relationship. Soon after the death of Alexander the Great, the priest Berossus wrote the first known narrative and comprehensive history of his native Babylon, and the priest Manetho likewise wrote the first such history of his native Egyptian civilization. Nothing like these histories had been produced before in these cultures. Clio ' s Other Sons considers why that is: why were these histories written at this point, and for what purposes? Berossus and Manetho operated at the crossings of several political, social, and intellectual worlds. They were

members of native elites under the domination of Macedonian overlords; in their writings we can see suggestions that they collaborated in the foreign rule of their lands, but at the same time we see them advocating for their cultures. Their histories were written in Greek and betray active engagement with Greek historical writing, but at the same time these texts are clearly composed from native records, are organized along lines determined by local systems of time-reckoning, and articulate views that are deeply informed by regional scholarly and wisdom traditions. In this volume John Dillery charts the interactions of all these features of these historians. An afterword considers Demetrius, the
