‘ A witty, sometimes heart-stopping, and always engrossing path from “ boy pilot ” to elite aviator. ’ – Jaundiced Eye columnist, William Saunderson-Meyer Robert Schapiro always wanted to fly. Challenging anti-Semitic bullying, mockery and fierce rivalry, he realised his dream by earning his wings in the South African Air Force and going on to command C-47 Dakotas in the Border War. He joined South African Airways (SAA) in 1979, soon learning it was a time when SAA crews were dominated by the ‘ Royal Family ’ – captains who thought themselves above the rules and who spent time overseas on drinking binges or coaxing air hostesses to be their ‘ airline wives ’ . When sanctions forced SAA to cut back on its routes, he was seconded to Japan ’ s Nippon Cargo Airlines, routinely flying between New York and Tokyo and grappling with often-hilarious cultural misunderstandings as he adapted to a Japanese style of operations. Schapiro is disarmingly frank about life as an international pilot. He divulges near misses, emergency landings, navigation errors, passenger shenanigans (seat sex, anyone?), how pilots control rowdy travellers and absorbing detail about the technique of flying different aircraft types. Uplifting and humorous, his memoir offers a rare slice of aviation history.

For anyone who has ever wondered what it's like to fly the SR-71 on a secret Mach 3 reconnaissance mission, this book has the answer. Completely redesigned and updated with photos from author Colonel Richard H. Graham's personal archive, as well as a new introduction, Flying the SR-71 Blackbird details what an SR-71 mission entailed, from planning to donning a pressure suit to returning to base. The Lockheed SR-71, unofficially known as the Blackbird, was an advanced, long-range, Mach 3 strategic reconnaissance aircraft developed by Lockheed Skunk Works. The aircraft flew so fast and high that not one was ever shot down, even by a missile. SR-71 pilot and instructor Colonel Richard Graham offers a rare cockpit perspective on how regular Air Force pilots and navigators transformed themselves into SR-71 Blackbird crews, turning their unique aviation talents to account in an unprecedented way. Arguably the world's foremost expert on piloting the Blackbird, Graham takes readers along on an operational mission that only a few Air Force pilots have ever experienced.

Among the offensive aerial missions employed in World War II, air-to-ground gun fighting was one of the most valuable. Strafing, which involved the extensive damage of ground, air and naval forces by pilots flying in deadly, low-altitude skies, helped the Allies to their victory. This historical text examines the role of strafing in combat, particularly during World War II, but also during the Korea and Vietnam wars. The nature of gunnery, strafing and gunfighting are explored within the context of particular missions and actions. First-hand accounts and gun camera film evidence contribute to the exploration of this most dangerous form of combat and honor the courage of America's veterans who served as pilots or aerial crewmen.
