Colony Two MarsCreatespace Independent Publishing Platform
To boldly go where no human has gone before... A human mission to Mars will most likely be a one way journey into the unknown, and the first step to the human colonization of the cosmos. Why a one way mission? Who should go? What might they discover about the Red Planet, and themselves? These twenty chapters written by the top scientists in the world and two astronauts who walked on the moon, and edited by famed cosmologist, Paul Davies, and astrobiologist, Dirk Schulze-Makuch, provide a veritable road map to the Red Planet. What would it be like to be part of a long duration space mission to Mars? How might it feel to watch the receding Earth slowly growing smaller in the blackness of night?

Can humans have sex in space? Should women be part of the mission? Can babies be born on Mars? The answer is, yes; if we wish to colonize the cosmos. But a human mission to Mars would be incredibly expensive, how could the mission be funded? As detailed in the chapter Marketing Mars, by selling TV-broadcasting, advertising, sponsorship, merchandising, and naming rights to corporations who would pay billions for the privilege. But who would want to boldly go, and why? Over 1,000 men and women have volunteered for a one way mission and many tell us why in their own words. But wouldn't this be a suicide mission? Could a colony be established? Could they grow their own food? How would they survive? The answers are provided by a veritable who's who of the top experts in the world. And what would it be like to live on Mars? What dangers would they face? Learn first hand, in

the final, visionary chapter about about life in a Martian colony, and the adventures of a young woman, Aurora, who is born on Mars. Exploration, discovery, and journeys into the unknown are part of the human spirit. Colonizing the cosmos is our destiny. The Greatest Adventure in the History of Humanity awaits us. Onward to Mars!

Thinking about moving to mars? Well, why not? Mars, after all, is the planet that holds the greatest promise for human colonization. But why speculate about the possibilities when you can get the real scientific scoop from someone who's been happily living and working there for years? Straight from the not-so-distant future, this intrepid pioneer's tips for physical, financial, and social survival on the Red Planet cover: □ How to get to Mars (Cycling spacecraft offer cheap rides, but the smell is not for everyone.) □ Choosing a

Acces PDF Colony Two Mars Colony Mars Book 2

spacesuit (The old-fashioned but reliable pneumatic Neil Armstrong style versus the sleek new—but anatomically unforgiving—elastic skinsuit.) □ Selecting a habitat (Just like on Earth: location, location, location.) □ Finding a job that pays well and doesn't kill you (This is not a metaphor on Mars.) □ How to meet the opposite sex (Master more than forty Mars-centric pickup lines.) With more than twenty original illustrations by Michael Carroll, Robert Murray, and other renowned space artists, *How to Live on Mars* seamlessly blends humor and real science, and is a practical and exhilarating guide to life on our first extraterrestrial home.

Mars! The Red Planet! For generations, people have wondered what it would be like to travel to and live there. That curiosity has inspired some of the most durable science fiction, including Ray Bradbury's *The Martian Chronicles* and the work of Isaac Asimov.

Life on Mars

Last Day on Mars

Our Quest to Rewrite Life in the Age of Synthetic Biology

New missions are on their way to exploit the colonists and gain control of their extraordinary technology. Worse, they are well armed, and prepared to go to war to win control of the colony and its people. But

Dr. Jann Malbec has a secret, one that could save the colonists. Yet she must choose, Earth or Mars-which is is going to be?

Go on the adventure of a lifetime with a teen and his family after they are selected to colonize Mars in this thrilling new novel from multiple Bram Stoker

Award-winning author Jonathan Maberry. Tristan has known that he and his family were going to be on the first mission to colonize Mars since he was twelve years old, and he has been training ever since.

However, knowing that he would be leaving for Mars with no plan to return didn't stop him from falling in love with Izzy. But now, at sixteen, it's time to leave Earth, and he's forced to face what he must leave

behind in exchange for an uncertain future. When the news hits that another ship is already headed to colonize Mars, and the NeoLuddite terrorist group begins threatening the Mars One project, the mission's purpose is called into question. Is this all worth it?

How can a colony on Mars survive when the greatest danger on the planet is humanity itself? All contact is lost with the first human colony on Mars during a long and destructive sandstorm. Satellite imagery of the aftermath shows extensive damage to the facility, and the fifty-four colonists who called it home are presumed dead. Three years later, a new mission sets down on the planet surface to investigate what

remains of the derelict site. But, it's not long before they realize the colony is not as lifeless as everyone thought. Someone is still alive -- hiding out somewhere. Yet, before they can find the elusive colonist a strange illness starts to affect the crew. Pressure now mounts on Biologist, Dr. Jann Malbec, to locate the source and find a way to fight it. However, as she investigates she begins to suspect a dark and deadly secret lurking within the facility. A secret that threatens not just the crew but the entire population of Earth. With limited resources and time running out, she must find some answers and find them fast. Because if she doesn't, none of them will be going home. About Colony One Mars: This is the

first book in a Sci-Fi series set in a human colony on Mars. The science depicted is, for the most part, plausible. In other words, what's technically possible with either current technology or taking experimental research a step or two further. That said, you won't need a calculator or a slide-rule to enjoy the story. A classic tale from the Grandmaster of Science Fiction. Podkayne Fries, born and raised on Mars, has just one ambition: to earn her wings as a starship pilot and rise through the ranks to command deep-space explorations. The opportunity to travel aboard the Tricorn- on an interstellar journey to Venus and Earth in the company of her diplomat uncle-is a dream come true. Poddy's idea of diplomacy is

keeping the peace with her troublesome brother, Clark, but she's about to learn some things about war and peace. Because her uncle is the Ambassador from Mars to the Three Planets Conference, which makes him-and his niece and nephew-potential targets for any radicals looking to sabotage the negotiations between three worlds.

We Have Always Lived on Mars

This collection puts together 20 of the best

science fiction stories about Mars published over the past two decades by top-notch authors of the genre. An improbable group of astronauts are slingshot to Mars in cheap one-person, one-way jalopies in "Terminal," by Lavie Tidhar. In "The Cascade," by Sean McMullen, an affair between a shy robotics postdoc and an adventurous young woman change the destiny of the first landing on Mars. A penal colony on Mars violently clashes with a science base in "Falling onto Mars," a Hugo Award winning story by Geoffrey A. Landis. In "The Old Cosmonaut and the Construction Worker Dream of Mars," by Ian McDonald, the

lives of a young Indian construction worker and an old Estonian cosmonaut collide during the terraforming of Mars by quantum machines. Two young girls are desperate to survive on the surface of Mars after their commune's underground compound is destroyed by comet strikes in "Hanging Gardens," by Gregory Feeley. In "Digging," by Ian McDonald, a project has been undertaken to create a breathable atmosphere on Mars constructing a valley so deep that the planet's thin atmosphere will be forced into it. An amusing step-by-step program enables potential potentates to find the right

Mars to rule over in "How to Become a Mars Overlord," by Catherynne M. Valente. In the Hugo Award winning story "The Emperor of Mars," by Allen M. Steele, a laborer on a corporate-owned Martian colony transforms himself into royalty while coping with a tragedy on Earth. A young girl defies the conventional role she's fated for on Mars in "La Malcontenta," by Liz Williams. In "The Burial of Sir John Mawe at Cassini," by Chez Brenchley, a gravedigger uncovers many secrets at the burial of a hanged British nobleman on a Victorian Mars. A colonist provides a moving account of his life on Mars to

inspire a new generation of Martians in "Martian Heart," by John Barnes. In "The Vicar of Mars," by Gwyneth Jones, a High Priest suffers hauntings after visiting an old, reclusive, wealthy woman on Mars. A rough and tumble Martian mining town reconstructs a lawman from the Old American West to restore order in "Wyatt Earp 2.0," by Wil McCarthy. In "An Ocean is a Snowflake, Four Billion Miles Away," by John Barnes, the rivalry between two documentarians, filming on Mars, puts them in peril as the planet is being terraformed. A corporation building New Las Vegas on Mars grooms a janitor for rock

stardom to improve worker morale in "The Rise and Fall of Paco Cohen and the Mariachis of Mars," by Ernest Hogan. In "Martian Blood," by Allen M. Steele, an Egyptian-American astrobiologist travels to a Martian aboriginal settlement to prove his theory that life on Earth originated on Mars. Pilgrims, tourists, and locals visit the many monoliths of Mars to commune with their unknown builders through radio bursts in "The Monoliths of Mars," by Paul McAuley. In "The Martian Job," by Jaine Fenn, the greatest heist known to humankind, with many a double-cross, is pulled on the largest corporation on

Mars. The first man to step foot on Mars recounts his life's story as mankind ends its colonization of the planet in "Mars Abides," by Stephen Baxter. And finally, in the Locus Award winning story "The Martian Obelisk," by Linda Nagata, a robotic crawler threatens the remote construction of a monument on Mars, by an architect on Earth, as it approaches the obelisk. A devastating dust storm. A colony on the edge of extinction. Only one person can save them. But first they need to start a revolution. In the midst of the most devastating dust storm in the history of Mars, the survival of the half million people

who call it home is hanging in the balance. Yet for Major Mia Sorelli, of the Mars Law and Order Department, it's just another sol at the office - another sol trying to keep the desperate and angry citizens from tearing themselves apart. But when she's sent to investigate the death of a fellow officer in the lawless industrial city of Syrtis, she begins to suspect that the endless dust storm may not be the only thing threatening their survival. With the help of her semi-sentient droid, Gizmo, they uncover a plot so heinous that her faith in humanity is almost shattered - and the only way for her to get it back, and save the

colony, is to start a goddamn revolution. About Surface Tension: This is the fifth book in a Sci-Fi series set in a human colony on Mars, but it can also be read as a stand-alone novel. The science depicted is, for the most part, plausible. In other words, what's technically possible with either current technology or taking experimental research a step or two further. That said, you won't need a calculator or a slide-rule to enjoy the story. Can be read as a stand-alone novel. Reading Order: Book 1: Colony One Mars Book 2: Colony Two Mars Book 3: Colony Three Mars (Completes the trilogy) Book 4: Jezero City,

Colony Four Mars (Can be read as a stand-alone novel) Book 5: Surface Tension, Colony Five Mars (Can be read as a stand-alone novel)

When no more frontiers remained on Earth, the heavens beckoned a new generation of explorer. Commander Kelly Brown and her small crew have one shared goal - to build a sustainable home for humankind on Mars. It was meant to be a pivotal mission of discovery, but confinement, isolation and the hostile environment quickly take their toll. With one crew member critically ill and another missing presumed dead, can the remaining crew of the Aeolis survive in the

hostile environment of the deadly planet? Grappling with the inherent weaknesses of humankind, Colony is the thrilling tale of the perils of establishing a fledgeling colony on another world.

When a colonist dies in tragic circumstances, just a few sols before a major terraforming experiment, Dr. Jann Malbec begins to suspect that all is not what it seems. Her fears begin to grow when every attempt she makes to investigate the death is thwarted by the ruling council on Mars. In desperation she resorts to secretly recruiting a recently arrived colonist,

Mia Sorelli, an ex-cop with a troubled past, to quietly look into the incident. But Mia has some very good reasons why she left her old life on Earth behind. Nevertheless, she reluctantly accepts the assignment even if it means hooking up with the malcontented, semi-sentient droid, Gizmo. But what Mia uncovers goes way beyond anything she or Dr. Malbec could ever have imagined. As she investigates she begins to suspect that a terraforming experiment may be compromised by those who seek to undermine the future of the colony. Mia must now face down her old fears if she is to save, not just herself, but

the entire population of Jezero City.

Surface Tension

How to Live on Mars

This classic on space travel was first published in 1953, when interplanetary space flight was considered science fiction by most of those who considered it at all. Here the German-born scientist Wernher von Braun detailed what he believed were the problems and possibilities inherent in a projected expedition to Mars. Today von Braun is recognized as the person most responsible for laying the groundwork

for public acceptance of America's space program. When President Bush directed NASA in 1989 to prepare plans for an orbiting space station, lunar research bases, and human exploration of Mars, he was largely echoing what von Braun proposed in *The Mars Project*.

A 2021 Locus Award Finalist!
Mary Robinette Kowal continues her Hugo and Nebula award-

winning Lady Astronaut series, following *The Calculating Stars* and *The Fated Sky*, with *The Relentless Moon*. The Earth is coming to the boiling point as the climate disaster of the Meteor strike becomes more and more clear, but the political situation is already overheated. Riots and sabotage plague the space program. The IAC's goal of getting as many people as possible off Earth before it becomes uninhabitable is being threatened. Elma

York is on her way to Mars, but the Moon colony is still being established. Her friend and fellow Lady Astronaut Nicole Wargin is thrilled to be one of those pioneer settlers, using her considerable flight and political skills to keep the program on track. But she is less happy that her husband, the Governor of Kansas, is considering a run for President. At the Publisher's request, this title is being sold without Digital Rights Management

Software (DRM) applied.

When the food supply of Mars's human settlement is decimated, seventeen-year-old Jessamyn Jaarda, the best pilot Mars Colonial has ever seen, flies to Earth to raid for food. Earth-Mars relations couldn't be worse, and her brother is captured during the raid. Breaking rules of secrecy and no contact, Jess finds an ally in Pavel, nephew to a government official, but their friendship only makes more

agonizing the choice before her: Save her brother or save her planet?

Hugo Award winner Emma Newman returns to the captivating Planetfall universe with a dark tale of a woman stationed on Mars who starts to have doubts about everything around her. After months of travel, Anna Kubrin finally arrives on Mars for her new job as a geologist and de facto artist in residence--and already she feels she is losing the connection with her husband and baby at

home on Earth. In her room on the base, Anna finds a mysterious note, painted in her own hand, warning her not to trust the colony psychiatrist. A note she can't remember painting. When she finds a footprint in a place that the colony AI claims has never been visited by humans, Anna begins to suspect that she is caught up in an elaborate corporate conspiracy. Or is she losing her grip on reality? Anna must find the truth, regardless of what horrors she

might discover or what they might do to her mind.

“ Last Day on Mars is thrillingly ambitious and imaginative. Like a lovechild of Gravity and The Martian, it's a rousing space opera for any age, meticulously researched and relentlessly

Acces PDF Colony Two Mars Colony Mars Book 2

paced, that balances action, science, humor, and most importantly, two compelling main characters in Liam and Phoebe. A fantastic start to an epic new series. ” —Soman Chainani, New York Times bestselling author of the School for Good and Evil series “ Emerson's writing explodes off the page in this irresistible space adventure, filled with startling plot twists, diabolical aliens, and (my favorite!) courageous young heroes faced with an impossible task. ” —Lisa McMann, New York Times bestselling author of the Unwanteds

series It is Earth year 2213—but, of course, there is no Earth anymore. Not since it was burned to a cinder by the sun, which has mysteriously begun the process of going supernova. The human race has fled to Mars, but this was only a temporary solution while we have prepared for a second trip: a one-hundred-fifty-year journey to a distant star, our best guess at where we might find a new home. Liam Saunders-Chang is one of the last humans left on Mars. The son of two scientists who have been racing against time to create

technology vital to humanity ' s survival, Liam, along with his friend Phoebe, will be on the last starliner to depart before Mars, like Earth before it, is destroyed. Or so he thinks.

Because before this day is over, Liam and Phoebe will make a series of profound discoveries about the nature of time and space and find out that the human race is just one of many in our universe locked in a dangerous struggle for survival.

"When William III of England commissioned Capt. William Kidd to command the first

expedition to Mars in the late 1600s, he proved that space travel was both possible and profitable. Now, one century later, a plantation in a flourishing British colony on Mars is home to Arabella Ashby, a young woman who is perfectly content growing up in the untamed frontier. But days spent working on complex automata with her father or stalking her brother Michael with her Martian nanny is not the proper behavior of an English lady. That is something her mother plans to remedy with a move to an exotic world Arabella has never

seen: London, England" -- Amazon.com.

Since the beginning of human history Mars has been an alluring dream; the stuff of legends, gods, and mystery. The planet most like ours, it has still been thought impossible to reach, let alone explore and inhabit. Now with the advent of a revolutionary new plan, all this has changed. Leading space exploration authority Robert Zubrin has crafted a daring new blueprint, Mars Direct, presented here with illustrations, photographs, and engaging anecdotes. The Case for Mars is not a vision

for the far future or one that will cost us impossible billions. It explains step-by-step how we can use present-day technology to send humans to Mars within ten years; actually produce fuel and oxygen on the planet's surface with Martian natural resources; how we can build bases and settlements; and how we can one day "terraform" Mars; a process that can alter the atmosphere of planets and pave the way for sustainable life.

When a traveller from China crash-lands on Mars, he finds himself in a country inhabited

entirely by Cat People. Befriended by a local cat-man, he becomes acquainted with all aspects of cat-life: he learns to speak Feline, masters cat-poetry, and appreciates the narcotic effects of the reverie leaf - their food staple. But curiosity turns to despair when he ventures further into the heart of the country and the culture, and realizes that he is witnessing the bleak decline of a civilization. Cat Country, Lao She's only work of science fiction, is both a dark, dystopian tale of one man's close encounter with the feline kind and a

scathing indictment of a country gone awry.

A Trusty Guidebook to Surviving and Thriving
on the Red Planet

How We'll Live on Mars

Podkayne of Mars

Colony One Mars: A SciFi Thriller

Glory on Mars

A barely alive colonist arrives at the airlock at colony one, but soon dies before he can talk. Mysteriously, a DNA test identifies him as a colonist who has already died-several years earlier. The only place he could have come from is

the mine on the far side of the Jezero crater-Colony Two, and if so, then maybe others are still alive.

Award-winning journalist Stephen Petranek says humans will live on Mars by 2027. Now he makes the case that living on Mars is not just plausible, but inevitable. It sounds like science fiction, but Stephen Petranek considers it fact: Within twenty years, humans will live on Mars. We'll need to. In this sweeping, provocative book that mixes business, science, and human reporting, Petranek makes the case that living on Mars is an essential back-up plan for humanity and explains in fascinating detail just how it will happen. The race is on. Private companies,

driven by iconoclastic entrepreneurs, such as Elon Musk, Jeff Bezos, Paul Allen, and Sir Richard Branson; Dutch reality show and space mission Mars One; NASA; and the Chinese government are among the many groups competing to plant the first stake on Mars and open the door for human habitation. Why go to Mars? Life on Mars has potential life-saving possibilities for everyone on earth. Depleting water supplies, overwhelming climate change, and a host of other disasters—from terrorist attacks to meteor strikes—all loom large. We must become a space-faring species to survive. We have the technology not only to get humans to Mars, but to convert Mars into another

habitable planet. It will likely take 300 years to “terraform” Mars, as the jargon goes, but we can turn it into a veritable second Garden of Eden. And we can live there, in specially designed habitations, within the next twenty years. In this exciting chronicle, Petranek introduces the circus of lively characters all engaged in a dramatic effort to be the first to settle the Red Planet. How We’ll Live on Mars brings firsthand reporting, interviews with key participants, and extensive research to bear on the question of how we can expect to see life on Mars within the next twenty years.

MARS CITY STATES *New Societies for a New World*

People will soon be able to go to the Red Planet. But that very possibility opens a still more interesting - indeed truly grand - question: What will we create on Mars? It was to answer this question that the Mars Society sponsored its Mars City State Design Competition in early 2020. The challenge: Design a city state for 1 million people on Mars. The prizes: \$10,000 and a grand trophy for the best design, with lesser prizes and trophies on down to Fifth. The designs had to take into account all aspects of the city: its technical basis, its economic foundation, its social and political system, and its architectural aesthetics. If a city is to succeed and grow, it will need to be a place that people

will want to move to. How can we create such cities on Mars? The response to the challenge was fantastic, with 176 teams from all over the world entering the fray. All twenty of the semifinalist, finalist, and top five winning designs are presented in this volume. The range of creative ideas is extraordinary, collectively representing an intellectual banquet, a feast for thought, that will be of enduring value for all those who will help initiate human civilization on Mars, and innumerable new worlds beyond. Xenon Hybrid, the Red Planet's ceremonial head-of-state, has not been seen for many years after withdrawing to an isolated enclave in the far north where he steadily built up

a following of citizens seeking out an alternative lifestyle. They bother no one, and no one bothers them. But when an Earth-bound ship explodes on the launchpad in Jezero City, and the DNA from two bodies recovered at the site are found to be an exact match, Dr. Jann Malbec is convinced that they are the product of a covert cloning program. More troubling still is that the DNA is a very close match to the reclusive and enigmatic Xenon. Meanwhile, newly promoted Mars Envoy, Mia Sorelli, finds herself stuck on the planet after her ride back to Earth is now a charred hunk of metal. She begins to get an uneasy feeling that someone may be trying to assassinate

her, and Mia's suspicions start to focus on a clandestine group of Xenon's followers. As these parallel investigations begin to converge, it becomes apparent to both Jann and Mia that the peaceful and simple lifestyle of the Xenonists is not all that it seems. There is a darker ideology bubbling underneath the surface, one that threatens to bring catastrophe to the entire population on Mars. But will anyone believe them in time?

The Mars Project

Colonization

It's bad luck to be born on Mars. Welcome to the second book of the On Mars series, a story of our near-future. Journey with Jake, born in the first Martian colony, as he seeks help from the only other humans on Mars. But Earthers are as dangerous as the hostile planet. The colonists need resources - metals and minerals - to survive, but their prospecting efforts have failed. A second generation Mars-born, Jake's lucky to avoid the sicknesses that plague the settlement,

but refuses to father any children in the doomed colony. He joins a team to explore beyond the Tharsis Plain, but his first trip ends in near-disaster. Half a planet away, new-comers from Earth start a second colony, but refuse all attempts at communication. Jake, with his friend Martha, plots a way to contact them and perhaps find help for his family and friends. He continues to prospect despite the risk on Mars' hostile surface, and waits for the enigmatic Sino-African colony to respond. But greater dangers await if they do. Read this book to discover if humans can claim Mars as home.

Jim Marlow and his strange-looking Martian friend Willis were allowed to travel only so far. But one day Willis unwittingly tuned into a treacherous plot that threatened all the colonists on Mars, and it set Jim off on a terrfying adventure that could save--or destroy--them all "From the Paperback edition."

A one-way journey to Mars may be a mistake. Welcome to the first book of the On Mars series, a story of our near-future. Before you volunteer to settle on Mars, read Emma's struggle to slip the bonds of Earth and survive on a hostile planet. There are eight

settlers on Mars until the colony's psychologist walks out an airlock to die on the cold, airless sands. Emma and her crewmates, the next mission of settlers, launch from Spaceport America despite the tragedy and despite their own misgivings. They take a tabby kitten with them, as requested by the survivors on Mars, and hope to revive the shocked colony. Emma leaves everything she knows behind, including a sometimes-boyfriend who's dropped from the next mission - all for a chance to explore the Martian surface in her robotic walkabout suit. Her arrival on Mars isn't welcomed by

all the colonists, and the mission loses more lives and vital supplies in a crash landing that may not be an accident. Crippled by an inexplicable sense of desolation, they face an unforgiving planet and even Earth may hold danger. The question isn't if the colonists will explore, but if they'll survive at all. Life on Mars is pretty standard.... until a mysterious virus hits. Don't miss this timely and unputdownable novel from the bestselling author of The Fourteenth Goldfish. Bell has spent his whole life--all eleven years of it--on Mars. But he's still just a regular kid--he loves cats and any kind of cake, and

*is curious about the secrets the adults in the US colony are keeping. Like, why don't they have contact with anyone on the other Mars colonies? Why are they so isolated? When a virus breaks out and the grown-ups all fall ill, Bell and the other children are the only ones who can help. It's up to Bell--a regular kid in a very different world--to uncover the truth and save his family...and possibly unite an entire planet. Mars may be a world far, far away, but in the hands of Jennifer L. Holm, beloved and bestselling author of *The Fourteenth Goldfish*, it can't help but feel like home.*

Mars is a desolate world. Largely forgotten by Earth, the planet remains helpless in the stranglehold of Arnie Kott, who as boss of the plumbers' union has a monopoly over the vital water supply. Arnie Kott is obsessed by the past; the native Bleekmen, poverty-stricken wanderers, can see into the future; while to Manfred, an autistic boy, time apparently stops. When one of the colonists, Norbert Steiner, commits suicide, the repercussions are

Acces PDF Colony Two Mars Colony Mars Book 2

startling and bizarre.

In Fall 2018, The Mars Society offered a prize for the best design and description of a 1000 person colony on Mars. The twenty page plans had to account for the colony location and design, the economic success of the colony, the socio/cultural environment, the governance processes, and the aesthetics of living on Mars. One hundred teams from around the world responded with their proposals. This

Acces PDF Colony Two Mars Colony Mars Book 2

book presents 22 of the plans judged to be the best to address all these requirements in a comprehensive way. The depth and breadth of this thinking of teams from around the planet Earth as they planned and described their concepts for settling the Red Planet can only be fully appreciated by reading all of the design reports in this book.

colonist a strange illness starts to affect the crew. Pressure now mounts on Biologist, Dr. Jann Malbec, to locate the source and find a way to fight it. However, as she investigates she begins to suspect a dark and deadly secret lurking within the colony. A secret that threatens not just the crew but the entire population of Earth. With limited resources and time running out, she must find some answers and find them fast. Because if she doesn't, none of them will be going home. Colony Two Mars The only survivor of the ill-fated ISA mission is now stranded on Mars. Having been designated a bio-hazard by Earth, any hope of returning home is all but gone. She is alone, isolated, and abandoned. That is, until another human shows up in the main colony airlock. However, he's barely alive and soon dies without

regaining consciousness. More disturbing though, a DNA test identifies him as a colonist who has already died, several years earlier - impossible as that may be. Nevertheless, there is only one place he could have come from, the mine on the far side of the Jezero crater - Colony Two. An outpost they had presumed was long dead. But if he survived, maybe there are others still alive? She now has no choice but to attempt the dangerous journey across the crater to investigate. Because if she doesn't find some answers soon, her only future is to die alone on Mars. Colony Three Mars

Now that the truth of the genetic experiments on Mars has been revealed, new missions are on their way to gain control of this extraordinary technology. In the process, they seek to exploit and enslave the colonists-turning them into nothing

more than lab rats. Worse, these newcomers are well armed, and prepared to go to war with each other to win control of the colony and its people. But Dr. Jann Malbec has a secret, one that she could use to spare the colony and save the colonists from this fate. However, by using it she will almost certainly doom Earth to a planet-wide pandemic of apocalyptic proportions. Yet she must choose. Earth or Mars—which is is going to be?

The next frontier in technology is inside our own bodies. Synthetic biology will revolutionize how we define family, how we identify disease and treat aging, where we make our homes, and how we nourish ourselves. This fast-growing field—which uses computers to modify or rewrite genetic code—has created revolutionary, groundbreaking solutions

such as the mRNA COVID vaccines, IVF, and lab-grown hamburger that tastes like the real thing. It gives us options to deal with existential threats: climate change, food insecurity, and access to fuel. But there are significant risks. Who should decide how to engineer living organisms? Whether engineered organisms should be planted, farmed, and released into the wild? Should there be limits to human enhancements? What cyber-biological risks are looming? Could a future biological war, using engineered organisms, cause a mass extinction event? Amy Webb and Andrew Hessel ' s riveting examination of synthetic biology and the bioeconomy provide the background for thinking through the upcoming risks and moral dilemmas posed by redesigning life, as well as the vast opportunities waiting for

us on the horizon.

The sole survivor of the ill-fated ISA mission is now stranded on Mars. Having been designated a bio-hazard by Earth, any hope of returning home is all but gone. She is alone, isolated, and abandoned. That is, until another human shows up in the main colony airlock. However, he's barely alive and soon dies without regaining consciousness. More disturbing though, a DNA test identifies him as a colonist who has already died, several years earlier - impossible as that may be.

crater to investigate. Because if she doesn't find some answers soon, her only future is to die alone on Mars. Nina, one of the few descendants of human colony on Mars that was abandoned by Earth, is surprised to discover that she can breathe the toxic atmosphere of the Martian surface. The crew, thinking that their attempts at terraforming and breeding for Martian adaptability have finally payed off, rejoice at the prospect of a brighter future. But Nina's about to unlock the mystery of the disaster that stranded them on Mars... and nothing will ever be the same.
