InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

This volume examines Max Weber's pre-World War I thinking about bureaucracy. It suggests that Weber's vision shares common components with the highly efficient Prussian General Staff military bureaucracy developed by Clausewitz and Helmuth von Moltke. Weber did not believe that Germany's other major institutions, the Civil Service, industry, or the army could deliver world class performances since he believed that they pursued narrow, selfish interests. However, following Weber's death in 1920, the model published by his wife Marianne contained none of the military material about which Weber had written approvingly in the early chapters of *Economy and Society*. Glynn Cochrane concludes that Weber's model was unlikely to include military material after the Versailles peace negotiations (in which Weber participated) outlawed the Prussian General Staff in 1919.

The War for American Independence: A Reference Guide

This is a practical and easily accessible guide for those new to the joint environment and staff assignments. With input from serving action officers and senior leaders, here are the competencies and behaviors of highly effective and successful joint staff officers which provide a roadmap for career self development. This is the most current joint information available for managing staff activities.

With its authoritative reference entries, multiple introductory and perspective essays, primary source documents, detailed chronology, and bibliography, this single-volume reference provides all the key information readers need to understand this monumental conflict. • Includes perspective essays on such widely debated topics as what was the primary cause of World War I and whether the conflict made World War II inevitable •

Supplies important primary source documents—such as the Balfour Declaration and the Zimmermann Telegram—that serve to put historical events into clearer context for students • Provides essential reference material for students, including entries on all the key events, people, and organizations, as well as a detailed chronology, key images, and maps

Leadership and the Spouse: A Guide to Mentoring

Offering a Canadian perspective on the emotional health of servicemen and women, Military

Operations and the Mind brings together researchers and practitioners from across the country to consider the impact that ethical issues have on the well-being of those who serve. Stemming from an initiative to enhance the lives of serving members by providing them with the best education and training in military ethics before and after deployments, this volume will better inform politics and public policies and enhance the welfare of the soldiers, sailors, and airmen and women who serve in singular, often harsh, and sometimes dangerous conditions. By integrating into the analysis the critical issue of well-being, this emerging field demonstrates a more holistic approach and is distinct from other fields in military, historical, philosophical, and behavioural studies. The first study of its kind, *Military Operations and the Mind* presents a new and helpful way to focus on the life of soldiers not only in operations overseas, but also once they return home. Contributors include Peter Bradley (Royal Military College of Canada), Victor M. Catano (Saint Mary ' s University), Danielle Charbonneau (Royal Military College of Canada), Howard Coomb (Royal Military College of Canada), Karen D. Davis (Defence Research and Development Canada), Colonel Richard Dickson (Canadian Army Land Warfare Centre), Joe Doty (Duke University), Allan English (Queen's University), Peter Gizewski (Department of National Defence), Heather Hrychuk (Centre for Operational Research and Analysis), E Kevin Kjelloway (Saint Mary ' s University), Allister MacIntyre (Royal Military College of Canada), Deanna Messervey (Queen ' s University), Damian O'Keefe (Saint Mary ' s University), Brigadier General (Ret ' ed) G. E. Sharpe, Shaun Tymchuk (retired Canadian infantry officer), SLt Ethan Whitehead (Royal Canadian Navy), and Daphne Xu (National Institute of Education, Singapore).

Providing an invaluable introductory resource for students studying cyber warfare, this book highlights the evolution of cyber conflict in modern times through dozens of key primary source documents related to its development and implementation. This meticulously curated primary source collection is designed to offer a broad examination of key documents related to cyber warfare, covering the subject from multiple perspectives. The earliest documents date from the late 20th century, when the concept and possibility of cyber attacks became a reality, while the most recent documents are from 2019. Each document is accompanied by an introduction and analysis written by an expert in the field that provides the necessary context for readers to learn about the complexities of cyber warfare. The title's nearly 100 documents are drawn primarily but not exclusively from government sources and allow readers to understand how policy, strategy, doctrine, and tactics of cyber warfare are created and devised, particularly in the United States. Although the United States is the global leader in cyber capabilities and is largely driving the determination of norms within the cyber domain, the title additionally contains a small number of international documents. This invaluable work will serve as an excellent starting point for anyone seeking to understand the nature and character of international cyber warfare. Covers in detail one of the defining forms of conflict of the 21st century—cyber warfare will significantly impact virtually every American citizen over the next two decades Provides more than 90 primary source documents and matching analysis, allowing readers to investigate the underpinnings of cyber warfare Enables readers to see the development of different concepts of cyber warfare through its chronological organization Reflects the deep knowledge of an editor who is a noted expert in cyber warfare and has taught for the United States Air Force for more than a decade

The book will cover the introduction to the Topic and can be used as a

very useful study material for those who want to learn the topic in brief via a short and complete book. Thought-provoking and accessible in approach, this updated and expanded second edition of the * provides a user-friendly introduction to the subject, Taking a clear structural framework, it guides the reader through the subject's core elements. A flowing writing style combines with the use of illustrations and diagrams throughout the text to ensure the reader understands even the most complex of concepts.

This report describes how to use the Syndia/Syngra system available at SU-SCORE. This system accepts a BNF-like grammar; specifications and automatically generates syntax diagrams on a Tektronix graphics terminal. Syndia is the major component of this system; Syngra acts as an interface between Syndia and the SUDS2 graphics editor. Syndia performs no ambiguity or consistency checks on the BNF input. This report assumes that the reader is familiar with BNF and syntax diagram representations of grammars.

Well over 500 total pages ... Today's dynamic and persistent operating environment has placed unprecedented demands on our military personnel. At no other time have the potential threats been more varied, requiring individuals who are highly intelligent, agile, ethical, tenacious, and physically fit to succeed in any climate or terrain. The Marine Corps Forces Special Operations Command (MARSOC) is preparing professional combat athletes who are ready to execute missions in the largely unstructured battlefields of today and the future. MARSOC's Performance and Resiliency (PERRES) ideology is integral to that preparation. By focusing on mind, body, and spirit, PERRES ensures that Marines not only are physically strong but also possess the mental focus and unconquerable spirit necessary to persevere under the extreme stress of a high operational tempo and through the unknowns of asymmetric warfare. PERRES trains with renewal in mind, focusing on the resilience of the individual, unit, and family. PERRES is unique in integrating high-level athletic training and nutrition with a focus on warrior values, including dedication to family, country, unit, and mission. This approach ensures that Marines are not only ready for combat missions, but also are resilient for life. "We are dropping cyber bombs. We have never done that before."—U.S. Defense Department official
A new era of war fighting is emerging for the U.S. military. Hi-tech weapons have given way to hi tech in a number of instances recently: A computer virus is unleashed that destroys centrifuges in Iran, slowing that country's attempt to build a nuclear weapon. ISIS, which has made the internet the backbone of its terror operations, finds its network-based command and control systems are overwhelmed in a cyber attack. A number of North Korean ballistic missiles fail on launch, reportedly because their systems were compromised by a cyber campaign. Offensive cyber operations like these have become important components of U.S. defense strategy and their role will grow larger. But just what offensive cyber weapons are and how they could be used remains clouded by secrecy. This new volume by Amy Zegart and Herb Lin is a groundbreaking discussion and exploration of cyber weapons with a focus on their strategic dimensions. It brings together many of the leading specialists in the field to provide new and incisive analysis of what former CIA director Michael Hayden has called "digital combat power" and how the United States should incorporate that power into its national security strategy.

The attacks of September 11 and the resulting War on Terror have defined the first decade and a half of the 21st century. This text closely examines and analyzes the primary documents that provide the historical background of today's worldwide War on Terror. • Provides introductory commentary as well as in-depth analysis from an expert in the field • Includes a collection of thematically related primary source documents accompanied by adjoined introductions and analyses • Offers a clear synopsis of the arguments utilized by both the United States and Al Qaeda against each other during the War on Terror • Presents sidebars containing details, facts, and figures crucial to understanding the content in question as well as a bibliography that directs readers toward additional resources for further study on the September 11th attacks and the War on Terror

Publishing User's Guide for JOPES (Joint Operation Planning and Execution System). Syndia User's Guide

Foreword This manual takes a general approach to COIN. The Army recognizes that every insurgency is contextual and presents its own set of challenges. You cannot fight the Taliban you would fight the former Soviet Union; the application of principles and fundamentals to deal with each vary considerably. Nonetheless, all insurgencies, even today's highly adaptable strains, rely on wars amongst the people, employ variations of standard themes, and adhere to elements of a recognizable revolutionary campaign plan. This manual therefore addresses the common characteristics of insurgencies. It strives to provide those carrying out a counterinsurgency campaign a solid foundation on which to build in seeking to understand and address specific insurgencies. A counterinsurgency campaign is, as described in this manual, a mix of offensive, defensive, and stability operations, conducted along multiple lines of operation. It requires Soldiers to employ a balance of both familiar combat tasks and skills more often associated with nonmilitary agencies, with the balance between them varying depending on the local situation. This is not easy. Leaders at all levels must adjust their approach constantly, ensuring that their elements are ready each day to be greeted with a handshake or a hand grenade, to be nation builders as well as warriors, to help reestablish institutions and local security forces, to assist in the rebuilding of infrastructure and basic services, and to facilitate the establishment of local governance and the rule of law. The list of such tasks is long one and involves extensive coordination and cooperation with a myriad of intergovernmental, indigenous, and international agencies. Indeed, the responsibilities of leaders in a counterinsurgency campaign are daunting – and the discussions in this manual endeavor to alert them to the challenges of such campaigns and to suggest general approaches for grappling with those challenges.

Conducting a successful counterinsurgency campaign thus requires a flexible, adaptive force led by agile, well-informed, culturally astute leaders. It is our hope that this manual provides the needed guidelines to succeed in such a campaign, in operations that inevitably, are exceedingly difficult and complex. Our Soldiers deserve nothing less.

Marine Battle Skills Training (MBST) Handbook

Donald Rumsfeld's vision of a transformed U.S. military has been discussed by many and understood by few, and this lack of understanding has resulted in both significant simplifications and sweeping generalizations. If Rumsfeld's Transformation is indeed dead, does this mean that Transformation as a greater process is dead as well? This report discusses the answers to this question, which requires one to understand first that Rumsfeld's Transformation Vision (RTV) is the result of multiple influences that predate his time in office. Second, RTV is actually an umbrella term for 3 different things: a new way of war, a process, and a defense strategy. And third, the military services shaped, and at times limited, the effectiveness of his program. Illus. Dr. Wilson and Patricia Berry did a masterful job outlining the resilience of the military spouse by highlighting some of the consistent challenges of the military spouse. This book is a practical guide to living and understanding Leadership collaboration that must take place behind the awards, promotion, multiple deployments and frequent moves that spouses endure. We all take different paths in life, but no matter where we go, we take a little of each other everywhere. " This was an amazing time and I took a bit of each one of you with me. Boy did we give them a run for their money during this course. Lol, Pamela A. Wilson, PhD was a great instructor and did a good job in keeping us in line. We are each others strength & wisdom, blessed to have served this great nation w/ such blessed souls! I miss you all so much!! But I will always carry you all in my HEART!!
