

Commando The Royal Marine Space Commandos Book 1

Every father experiences the anxiety of knowing that one day his daughter is going to do the inevitable and start dating. In addition to he can become her date's worst nightmare by also arming himself with the body language and interview skills necessary to figure out if a boyfriend is in less than ten minutes. In *Not with My Daughter!*, Terry Vaughan gives dads vital information on how to decode the gestures, expressions, and verbal statements of all prospective boyfriends. With two daughters of his own rapidly coming of age, Vaughan realized he had to board every new boyfriend who came through his door. He came up with strategy that all dads can use to effectively "interview" and assess new men in their daughters' lives. With Terry's help, dads will learn how to: Master the checklist of items that will accurately assess a date in seconds? Recognize how his utilization of space and volume could be indicators of aggression? Uncover words that are used to hide secrets that reflect sincerity? Based on his extensive military training, Vaughan provides dads with the skills and information they need to interpret signals boyfriends are sending out, and then do something smart and positive with the information.

With Hitler's army rampaging across Europe, Winston Churchill ordered the creation of a special fighting force - the Commandos. These volunteers drawn from the ranks of the British Army, formed into a Special Service Brigade and put through a rigorous but highly effective programme. Over the course of World War II they would see action in every major theatre of operation and are credited with numerous successes during the D-Day landings. Although many units were disbanded after the war, the Royal Marine Commandos have maintained the standard fighting formation to the present day. Angus Konstam explores the history of the Commandos during their formative years, providing details of their training, weapons and equipment. Battle reports are accompanied by specially commissioned Osprey artwork and historical photographs. Readers are given an in-depth analysis of some of the most famous fighting units in the British Army's history.

"...the level of research, the quality of graphics, and the readability are exceptional. [...] It is a subject area not covered often and it is a welcome addition to the bookshelves of readers with an interest in early Southwest Pacific air campaigns of World War Two." — Sir Henry Beverley Lieutenant Colonel, official document *Amphibious Warfare Handbook No. 10a: The Organisation, Employment and Training of Commandos* is a unique piece of Royal Marines Commando doctrine, never before published, or quoted at length. Prepared in 1951 at the height of the Korean War by the Chief of Amphibious Warfare and the Commandant General Royal Marines, this seventy-page aide memoir is, in essence, the distillation of major lessons learned from wartime Combined Operations Headquarters regarding amphibious warfare, raiding, cliff assaults, sabotage, intelligence-gathering, special operations, guerrilla warfare and Commando tactics. In addition, it offers its readership a delineation of the characteristics, skills and qualities of the Royal Marines Commando. Published to mark the seventieth anniversary of its official issue, this rare example of bespoke Commando doctrine is a highly relevant and highly relevant addition to a growing body of work on The Corps of Royal Marines. Currently undergoing significant institutional change through the Future Commando Force (FCF) program, the Royal Marines are having to challenge their existing operating concept, force structure and organizational design to meet the emerging defense challenges of the 21st century. It serves to remind those currently evolving the FCF of Sir John Hackett's advice, namely, "To see where we are going, we must know where we are, and to know where we are, we need to document our progress here."

Each ship in the fleet has a team of five resident Space Marines. It's not easy getting that job. The training alone is enough to deter thousands of candidates. But some have no choice. Unless, of course, they don't want to prove themselves to their mothers. But they all do. ~ This is the story set in the *Space Danger!* universe. Well, galaxy really.

House of Commons official report

Life wasn't easy for Tony Collins as he grew up in the mean streets of the East End of London in the years before the Second World War. After his mother died when he was still only seven years old, his father, unable to hold down a job while coping alone with four young children, was forced to send them to an orphanage. But Tony came through the hardships and graduated with flying colours from the school of hard knocks, to head straight for a career as a commando with the Royal Marines. During a stint in Malta Tony fell head over heels for a local beauty, and after marrying her he soon began to regard the island as his home. He went on to rise through the ranks to become a warrant officer, turning down the opportunity to become a regimental sergeant major back in the UK because it would have meant uprooting his family from the island he had grown to love. The Cockney Commando is a heart-warming story of triumph in adversity and of challenges overcome through love and courage.

A young lieutenant. A fleet of alien invaders. Will first contact be humanity's last stand? In his short military career, Lieutenant Warden has already battled insurgent groups, criminal gangs, and intergalactic pirates. When a distant colony sends out a distress signal, he and his fellow space commandos can't wait to transfer their consciousness and launch their clone bodies into action. But no amount of enthusiasm could've prepared Warden for humanity's first alien encounter and the ensuing bloodbath. After his captain falls to the attack, Warden feels both pride and fear as he assumes command. Outmanned and outgunned, the confident commando must find a way to eliminate the aliens before they slaughter an entire human colony. Will Warden's troops prove they are made of tougher stuff, or have they finally met their fatal match? Commando is the first book in the Royal Marines Space Commando military sci-fi series. If you like fast-paced action, interstellar battles, and characters with nerves of steel, then you'll love Jon and James Evans's thrilling saga. Buy Commando to brace yourself for an exhilarating page-turner today!

In the post-1945 era, the aircraft carrier has remained a valued weapon despite the development of nuclear weapons, cruise and ballistic missiles, and highly capable submarines. At times, as in the early days of the Korean and Vietnam Wars and in the Falklands conflict, carriers alone could deploy high-performance aircraft to the battlefield. In other operations, such as enforcing the no-fly zones and the U.S. invasions of Afghanistan and Iraq, only carriers could provide the bases needed for sustained combat and support operations. This second volume of Norman Polmar's landmark study details the role of carriers in the unification of the U.S. armed forces and strategic deterrence, fiscally constrained Great Britain, the development of British Commonwealth and ex-colonial navies, and the efforts of France and the Netherlands to rebuild their fleets. The role of the modern carrier-nine nations currently possess them-is discussed, as are the issues confronting nations that might acquire them. Chapters on

the Soviet Union's effort to produce carriers are included for the first time. The development of both carrier planes and the many "oddball" aircraft that have flown from carriers—such as the U-2 spy plane—are also examined. Appendixes include comprehensive data on all carriers built and converted through 2006. This volume is a valuable companion to the critically acclaimed Volume I, which covers aircraft carrier development and operations from 1909 to 1945.

This is the story of a fighting force. In the words of the marines themselves, Robin Neillands, formerly of 45 Commando RM, describes what it is really like to wear the legendary green beret, in peace and in war. This vivid account charts the story of the Royal Marine Commandos from their bloody baptism on the beaches of Dieppe to the final yomp into Stanley at the end of the Falklands War in 1982.

Interactive advertising and new media have come a long way from simple pop-up ads and banners. Among the winners in this year's 2008 One Show Interactive Awards, you'll find work that inspires, entertains, and continually pushes the boundary between the real and virtual realms. One Show Interactive, Volume XI showcases the best of this past year's winners from around the world. Featuring an all-new format, this latest edition includes more in-depth analyses of the Pencil-winning work, more descriptions, and a new look. With more than 1,200 four-color images in a lush package, One Show Interactive, Volume XI is an important reference source for creatives, producers, and students alike. Categories covered include e-commerce, corporate image, direct marketing, self-promotion, and more.

Military fitness means being fit for anything. As a member of an elite military team you could be hacking through dense jungle one day, cross country skiing the next and battling through the urban sprawl of a city ruined by heavy shelling the day after that. Being military fit means you have to be versatile. Strength without fitness or fitness without agility and quickness are of little use and your all-round fitness may be all that ensures your survival.

This publisher's pack contains Commando & Guerrilla, the first two books in The Royal Marine Space Commando series. Commando A young lieutenant. A fleet of alien invaders. Will first contact be humanity's last stand? In his short military career, Lieutenant Warden has already battled insurgent groups, criminal gangs, and intergalactic pirates. When a distant colony sends out a distress signal, he and his fellow space commandos can't wait to transfer their consciousness and launch their clone bodies into action. But no amount of enthusiasm could've prepared Warden for humanity's first alien encounter and the ensuing bloodbath. After his captain falls to the attack, Warden feels both pride and fear as he assumes first in command. Outmanned and outgunned, the confident commando must find a way to eliminate the aliens before they slaughter an entire human colony. Will Warden's troops prove they are made of tougher stuff, or have they finally met their fatal match? Guerrilla A ruthless invasion. An outmatched colony. A Commando's last chance offensive. Lieutenant Warden just barely survived a relentless attack on the New Bristol colony. The Royal Marine Space Commando has orders to defend his post until support arrives. But when Lt. Warden learns of a nearby enemy base that could wipe out far more than the colony, his mission transforms from protective to suicidal... To save countless lives, Lt. Warden must raid an unstoppable enemy and take out one of the most powerful warships in the galaxy. No pressure or anything. Avoiding huge walking tanks and technology far beyond their own, the RMSC has one chance to get this right. Can Lt. Warden pull off the incredible, or will losing the battle cost them the war? Commando & Guerrilla are the first two books in the Royal Marines Space Commando military sci-fi series. If you like fast-paced action, interstellar battles, and characters with nerves of steel, then you'll love Jon and James Evans's thrilling saga. Buy The Royal Marine Space Commandos Vol 1 to join the Space Marine offensive today!

The Royal Marines were originally formed under the auspices of the Royal Navy to guard its sailing ships from harm. They are proud of their history and origins but the Navy heritage is fading. John Parker charts how the units have moved away from their nautical beginnings to develop, over time, into the most versatile force in the British military, containing one of their most elite brigades. The Royal Marines Commandos have, over the past few years, developed into the premier fighting organisation on land, sea and air. This history deals with events associated with the Royal Marines and subsequently in their commando role, starring in all major conflicts including Italy, Malaysia, the Borneo confrontation with Indonesia, and more recently Afghanistan.

Parliamentary Debates (Hansard).

When her world is destroyed by seemingly unstoppable planet pirates and her family is slaughtered, former commando leader Alicia DeVries turns pirate herself, steals a cutting-edge ship from the Empire, and launches a campaign to seek revenge on those responsible, only to find that her fellow veterans are equally determined to stop her, in an expanded new version of the classic novel Path of the Fury.

“ Kindness flourishes in an Afghan war zone, where British Royal Marine Farthing begins rescuing the starving strays nosing their way onto his compound...Readers will come to know and love each mutt and to admire Farthing, whose caring doesn't end when his tour does. ” —People The remarkable true story of one man's fight to save the stray dogs of Afghanistan. In the remote outpost of Now Zad, Afghanistan, Pen Farthing and his troop of young Royal Marines survive frequent engagements with the Taliban and forge links with the local community. Appalled by the horrors of local dog fighting, Pen has no choice but to intervene. Then one of the dogs he frees finds his way into the Marine compound—and into Pen's heart. Soon other strays are drawn into the sanctuary provided by the makeshift pound, including one young mother who crawls under the compound fence carrying her newborn pups to safety. As his tour of duty draws to an end, Pen cannot leave the dogs of Now Zad to their fates. He begins hatching plans to help them escape to a better life. One Dog at a Time is the gripping account of one man's courage and humanity, and his fight to make a difference in the most hostile and dangerous environments, one dog at a time.

With a heritage dating back to the mid-seventeenth century, the Royal Marines have accrued a rich history of rituals, artefacts and material culture that is consciously deployed in order to define and shape the institution both historically and going forward into an uncertain future. Drawing upon this heritage, Mark Burchell offers a unique method of understanding how the Royal Marines draw upon this material culture in order to help transform ordinary labour power to political agency comprising acts of controlled and sustained violence. He demonstrates how a barrage of objects and items - including uniforms, weapons, landscapes, architecture, personal kit, drills, rituals, and iconography - are deployed in order successfully to integrate the recruits into the Royal Marines' culture. It is argued that this material culture is a vital tool with which to imprint the military's own image on new recruits as they embark on a process of de-individualisation. Having been granted unprecedented access to the Commando Training Centre at Lympstone as an anthropologist, Burchell observed an intake of recruits throughout their demanding and exhausting year-long training programme. The resulting book presents to the academic community for the first time, a theorised in-depth account of a relatively unexplored social community and how its material culture creates and reifies new military identities. This path-breaking interdisciplinary analysis provides fresh understanding of the multiple processes of military enculturation through a meticulous revision of the relationships that exist between disciplinary and punishment practices; violence and masculinity; narratives and personhood; and will explore how these issues are understood by recruits through their practical application of body to physical labour, and by the cues of their surrounding material culture.

First published in 1948 as Commando Men- The Story Of A Royal Marine Commando in North-West Europe, the book tells the story of the men of General Section 45 Royal Marine Commando in N.W. Europe. Samain was the Intelligence Officer of No. 45 Royal Marine Commando, and in this revised edition the book gives a complete yet concise account of their operations from D-Day until VE-Day, through Northern France to the Baltic.

*'A practical and no-nonsense guide on dealing with the toughest situations, from someone who has been there and done it.' -- Levison Wood 'It will help you to navigate life.' -- The Times *** Historical recruitment campaigns to become a Royal Marines Commando drew on a harrowing but intriguing narrative: 99.9% Need Not Apply. In 2005, only one in a thousand applications for the Royal Marines were successful in reaching the end of training, earning the Coveted Green Beret - a world renowned symbol of excellence. Becoming the 0.1% is the first-ever diary account of this training regime, charting the odds-stacked journey of Gareth Timmins, a 20-year-old recruit at the time, and providing a psychological framework for understanding how he was able to cultivate the mental strength and resilience needed to push through to success. Each week of training is accompanied by lessons on his short-comings and growth to peak performance. It uses real-life and often terrifying experiences to describe to the reader the edge you need to cultivate a 0.1% mindset and succeed in life and work, by learning how to: Visualise achievements Combat fatigue and burnout Stay motivated by not losing sight of the end goal Eradicate complacency and achieve mastery Redefine expectation and regulate disappointment Live without convenience Thrive under pressure Break down self-imposed limitations Be held accountable to others The Royal Marines are renowned for their military skill and also for having one of the finest military bands in the world. These highly trained and talented musicians are equally at home parading at Buckingham Palace, playing at the Royal Albert Hall, or on the flight deck of an aircraft carrier in a foreign port. Why then when the Argentines invaded the Falklands in April 1982 did these superb musicians get involved in what became a serious and deadly military campaign? The answer is that, in addition to their musical expertise, the RM Band Service members are trained for military service and fully qualified in a multitude of military and medical skills, providing support to their comrades, the fighting commandos. The Band That Went to War is a graphic first-hand account of the Falklands War as it has never been told before. It describes the roles played by Royal Marine musicians in the conflict; unloading the wounded from helicopters, moving tons of stores and ammunition, burying their dead at sea and guarding and repatriating Argentine prisoners of war. These and other unseen tasks were achieved while still ready to provide morale boosting music to their commando brethren and other frontline troops. These men are not just musicians; they are Royal Marines.*

FSpaceRPG is a science fiction roleplaying game in the classic mould. This rulebook is a slightly modified version of the one released in 1995 for the KAPCON 95 game convention. It was updated in various places for use with the universe to be used as the basis of the ongoing commercial universe. The noticeable change is the change from the presence of the Silterans to the Aratani. An edition of our rules that gives a glimpse of a indie roleplaying game at the early stages of it's life before the team learnt some of the professional skills to take it to the next level. What you get: The FSpace Roleplaying Rulebook v3.1 is a 157 page rulebook suited for use by GMs or players. Ebook is a mix of scanned pages from original KAPCON 1995 edition with changed pages reset.

Indian Defense Review

In Fury Born

The Militarized Body as Artefact

One Show Interactive, Volume XI

A colony is under invasion. It's time to send in the Commandos. When the Royal Marines are called to New Bristol, they're expecting their mission will be just another insurgent hunt. What they face when they arrive is anything but a spot of local trouble though. After a brutal firefight, Lieutenant Warden finds himself leading the remaining Commandos in defence of the colonists. Their enemy has superior numbers, weaponry and armour. They see the colony as a soft target, but they weren't counting on facing the Royal Marine Space Commandos. Warden must bring the fight to the enemy, and bring it with all the fire and fury he can summon. With only their basic weapon packages and equipment available, it'll be a tough fight. Can one young Lieutenant and a score of Marines bring an end to the invasion? Few people realise that Ian Fleming, the creator of the greatest fictional spy the world has ever known, James Bond, was also instrumental in the creation and the running of a TOP SECRET World War Two unit. A unit created from the cream of British Military men, Royal Navy Officers, Royal Marine Officers, the British Army and some Royal Airforce Officers, all backed up by the specially trained fighting men of the Green Berets, the Royal Marine Commandos. This units remit was to 'Attain by Surprise' to move ahead of the Allies frontline forces and capture by any means possible enemy intelligence and personel. These men were also under strict orders of secrecy and to 'Eliminate' any witnesses to the intelligence captured, 'Licenced to Kill'. This book gives a facinating insight into the relms of the Allied Nations at war and the means those nations will go to to achieve their objectives. Some of these records prove conclusively that those Allied Governments hid some very important facts, facts which could even undermine the very foundation of the US space program.

"This volume presents a collection of 47 articles describing different aspects of U.S. Marine Corps participation in Operation Iraqi Freedom during 2003." ... [from Foreword].

The first documented, systematic study of a truly revolutionary subject, this 1937 text remains the definitive guide to guerrilla warfare. It concisely explains unorthodox strategies that transform disadvantages into benefits.

' I was on a train, and a German soldier began shouting at me and poking me in the ribs with his machine gun. I just thought that was it, the game was up . . . ' Downed airman Bob Frost faced danger at every turn as he was smuggled out of France and over the Pyrenees. Prisoner of war Len Harley went on the run in Italy, surviving months in hiding and then a hazardous climb over the Abruzzo mountains with German troops hot on his heels. These are just some of the stories told in heart-stopping detail as Monty Halls takes us along the freedom trails out of occupied Europe, from the immense French escape lines to lesser-known routes in Italy and Slovenia. Escaping Hitler features spies and traitors, extraordinary heroism from those who ran the escape routes and offered shelter to escapees, and great feats of endurance. The SAS in Operation Galia fought for forty days behind enemy lines in Italy and then, exhausted and pursued by the enemy, exfiltrated across the Apennine mountains. And in Slovenia Australian POW Ralph Churches and British Les Laws orchestrated the largest successful Allied escape of the entire war. Mixing new research, interviews with survivors and his own experience of walking the trails, Monty brings the past to life in this dramatic and gripping slice of military history.

Steven Preece was a Royal Marine Commando from 1983 to 1990, serving first at entry-level and then as a lance-corporal. Amongst the Marines is Steven's first-hand account of his years as an elite soldier, focusing directly on the excessive and often shocking lifestyle of the Marines during this time, and impact this had on his own personality and behaviour. Preece fulfilled his childhood ambition by earning the coveted Green Beret when he was 18. He was unaware, however, of the brutal rite of passage that awaited him and all the other 'pieces of skin' [new recruits]. Violence in the Marines, as Steven discovered, was not limited to the battlefield but a continual part of a pervasive culture of bullying and aggression. It did not take long for Preece to be accepted into this culture and to adopt it as his own. On duty he was fit, committed and loyal, while off duty he displayed a mammoth capacity for drinking, fighting and womanising. On home leave, Steven found it increasingly hard to adapt to civilian life. His drinking sessions in local pubs frequently ended in fights with the locals and even in violence against members of his own family. Preece earned a reputation amongst his fellow Marines for pranks and dangerous behaviour; and this eventually led him to be court-maritalled. To his relief and surprise, however, Preece was fully acquitted by the court. Amongst the Marines is an unflinching expos é of the culture of the Marines, from foul practical jokes and rough justice to the off-duty orgies of drink, sex and violence. It is a no-holds-barred account of the many shocking incidents Preece witnessed and participated in, from his first day as a new recruit to his exit from the Marines with his reputation intact and his scores settled once and for all.

Beau Bête

The Royal Marines Mountain and Arctic Warfare Cadre in Action During the 1982 Conflict

A remarkable story of true events. Devastated by the death of my grandfather, Ron, I'm amazed to discover what I thought were the ravings of an unbalanced mind may actually be true. Captivated by the family portrait of Granddad, entitled BEAU BÊTE (Beautiful but Stupid Beast). I set out to learn more about the wartime unit Ron was always so reticent to talk about. From the scribbled and sometimes manic memoirs of Ron's and the very men that he served with, I decipher the incredible story of a Commando Sniper and the history of Ian 'James Bond' Fleming's TOP SECRET intelligence gathering unit - 30AU, a unit Fleming himself called his 'Red Indians'. From my Nan's treasured love letters her past is revealed, as member of the Maquis (French Resistance - FFI) helping downed Allied Airmen escape and the wealthy family who disowned her for loving a poor English soldier. Her brother's struggle against the Nazi regime and untimely, suspicious death and Ron's involvement in covert missions to capture Hitler's scientists, ahead of the Russians and the Americans, including the real story of how the Nazi/NASA scientists actually ended up in the USA, working on their space/weapons rocket research programme.

Whether you are interested in the career of an individual Royal Marine or just want to know more about the part played by the Marines in a particular battle or campaign, this book will point you in the right direction. Assuming that the reader has no prior knowledge of the Royal Marines, their history or organization, Richard Brooks and Matthew Little explain which records survive, where they can be found and how they can help you in your research. They also describe in vivid detail the evolution of the Royal Marines, from the tentative beginnings of the service in the seventeenth century to their present position as a key part of the British armed forces.

"Casemate has a long history of publishing high quality military history non-fiction. Lately, they have expanded their range of work to include well written novels using wartime settings." - WWII History Magazine Follows the story of two US Marines sent to learn from the British Commando training regime in Scotland, 1942. Summer 1942. Defeatism hangs in the air. Britain stands alone. Winston Churchill is determined to strike back and has ordered the formation of a special operations force, dubbed "Commandos," with the mission to "set Europe ablaze." U.S. Marine Captain Jim Cain and his Gunnery Sergeant Leland Montgomery are surprised to receive orders to the British Commando training center in the Scottish Highlands. There they are put through the brutal specialized training that will hone their fighting skills. Pitiless forced marches, dangerous live fire exercises and hazardous assault courses building their physical endurance, and a strong sense of brotherhood develops between the British soldiers and the two Marines. Lucky to be quartered in the spacious home of the Commandos' commanding officer, Cain has the pleasure of meeting his daughter, Loreena. Bright and stunning, Loreena is secretive about her work in London. Before Cain can learn more about her, the training course is interrupted and the commando squad is sent on a special mission to destroy a German radar station on Nazi-held Alderney, off the coast of France. While the site is defended by a squad of second-rate garrison soldiers who are no match for the highly trained and motivated commandos, a reaction force of infantry, led by a German combat veteran, joins the fight. The action is fierce and bloody and there are heavy losses on both sides. The surviving raiders withdraw to Royal Navy motor torpedo boats, but a marauding squadron of Schnellboots (E-Boats) lies in wait.

Sunset, 8 June 1982, East Falkland. Eight specially trained Royal Marines infiltrate Goat Ridge, a long rocky hilltop between Mount Harriet and Two Sisters which are occupied by a battalion of 600 Argentine infantry. The next day, from their hiding place just metres away from the enemy, they note and sketch the Argentine positions, then withdraw as stealthily as they had come. Their daring patrol provides essential intelligence that guided the British assault which overwhelmed the Argentine defences two days later. This was just one example of the missions undertaken by the Royal Marines Mountain and Arctic Warfare Cadre during the Falklands War, all of which are described in graphic detail in Rod Boswell's eyewitness account. Using his own recollections and those of his comrades, he describes their operations in the Falklands - the observation posts set up in the no man's land between San Carlos and Port Stanley, their role in the raid at Top Malo House, and the reconnaissance patrols they carried out close to the Argentine lines during the conflict. His first-hand account gives a fascinating insight into the operational skills of a small, specially trained unit and shows the important contribution it made to the success of the British advance. It also records the entire experience of the Falklands War from their point of view - the long voyage south through the Atlantic, the landings, the advance and the liberation of Stanley.

The Famous von Braun brothers 'surrender' was a staged event! A remarkable story based on true events. Devastated by the death of my grandfather, Ron, I'm amazed to discover what I thought were the ravings of an unbalanced mind may actually be true. Discovering the FFI called him BEAU BÊTE (Handsome but stupid Beast) I set out to learn more about the wartime unit Ron was always so reticent to talk about. From the scribbled and sometimes manic memoirs of Ron's and the very men that he served with, I decipher the incredible story of a Commando Sniper and the history of Ian 'James Bond' Fleming's TOP SECRET intelligence gathering unit - 30AU, a unit Fleming himself called his 'Red Indians'. From my Nan's treasured love letters her past is revealed, as member of the Maquis (French Resistance - FFI) helping downed Allied Airmen escape and the wealthy family who disowned her for loving a poor English soldier. Her brother's struggle against the Nazi regime and untimely, suspicious death and Ron's involvement in covert missions to capture Hitler's scientists, ahead of the Russians and the Americans, including the real story of how the Nazi/NASA scientists actually ended up in the USA, working on their space/weapons rocket research programme. The Famous von Braun brothers 'surrender' was a staged event!

Australia invoked the ANZUS Alliance following the Al Qaeda attacks in the United States on 11 September 2001. But unlike the calls to arms at the onset of the world wars, Australia decided to make only carefully calibrated force contributions in support of the US-led coalition campaigns in Afghanistan and Iraq. Why is this so? Niche Wars examines Australia's experience on military operations in

Afghanistan and Iraq from 2001 to 2014. These operations saw over 40 Australian soldiers killed and hundreds wounded. But the toll since has been greater. For Afghanistan and Iraq the costs are hard to measure. Why were these forces deployed? What role did Australia play in shaping the strategy and determining the outcome? How effective were they? Why is so little known about Australia's involvement in these campaigns? What lessons can be learned from this experience? Niche Wars commences with a scene-setting overview of Australia's military involvement in the Middle East over more than a century. It then draws on unique insights from many angles, across a spectrum of men and women, ranging from key Australian decision makers, practitioners and observers. The book includes a wide range of perspectives in chapters written by federal government ministers, departmental secretaries, service commanders, task force commanders, sailors, soldiers, airmen and women, international aid workers, diplomats, police, journalists, coalition observers and academics. Niche Wars makes for compelling reading but also stands as a reference work on how and why Australia became entangled in these conflicts that had devastating consequences. If lessons can be learned from history about how Australia uses its military forces, this book is where to find them.

The Green Berets. The Navy SEALs. The secret Delta Force. The British SAS. The Israeli Mossad. Almost every country has a special force unit in their military. But what do they do, whom do they recruit, and how do they train? Robin Neillands, renowned military historian and himself a former Royal Marine Commando, tells the story of special forces since the end of the World War II, where possible in the words of the soldiers themselves. He describes the operational successes and failures, advances in military technology crucial to special force effectiveness, and the achievements, challenges, and exploits of a wide range of special force units. From the intense cold of the Korean winter, the mountains of Cyprus, and the Libyan night, to the jungle heat of Vietnam and the green hills of Northern Ireland, In the Combat Zone provides a compelling and revealing portrait of these highly trained troops, without the by-now banal glorification so characteristic of such discussions. As Neillands writes, "A great many special forces soldiers have helped me with this book, on the understanding that I told it straight and did not use their accounts to produce yet another 'gung-ho heroes' epic." In a world plagued by terrorism and small wars, interest in special forces has never been higher and In the Combat Zone couldn't be more timely.

Little has been written about Royal Marines rotary aviation, the small and select unit which operated light helicopters between 1965 and 1995. Officer and senior non-commissioned officer pilots had the unique privilege of being both Commandos and aviators, flying from warships and operating ashore in support of the Royal Marines. Initially called Unit Air Troops, which then coalesced into 3 Commando Brigade Air Squadron Royal Marines, they operated in hostile environments, including the Arctic, mountains, jungles and deserts. Robert Wilsey served in the Royal Marines from 1969 to 2000. Having qualified as a pilot he served through much of the existence of the Royal Marines Air Squadron, from a junior pilot right up to becoming its commanding officer. In this unique book, the author tells of the evolution and technological advances of Royal Marines aviation, flying the Westland Sioux, Scout, Gazelle, and, ultimately, Lynx helicopters. He describes the rigorous training undertaken, including flying from ships at sea, and of operating globally from Malta, Northern Ireland, the jungles of Brunei, the Pyrenees, Arctic Norway and, in 1991, Northern Iraq, protecting the Kurds during Operation Haven. Colonel Wilsey also describes the challenges of the British military's basic and advanced rotary flying training, from both a student's and flying instructor's perspectives. He explains the pressures of leading a flying display team and relates stories of accidents and incidents, many amusing, several chaotic and some tragic, previously unknown to the general public. This is a vivid first-hand account of military rotary wing flying which will appeal to aircrew both civil and military, aviation enthusiasts and military historians.
