How to get good with money, even if you have no idea where to start. The Financial Diet is the personal finance book for people who don't care about personal finance. Whether you're in need of an overspending detox, buried under student debt, or just trying to figure out how to live on an entry-level salary, The Financial Diet gives you tools to make a budget, understand investments, and deal with your credit. Chelsea Fagan has tapped a range of experts to help you make the best choices for you, but she also knows that being smarter with money isn't just about what you put in the bank. It's about everything—from the clothes you put in your closet, to your financial relationship habits, to the food you put in your kitchen (instead of ordering in again). So The Financial Diet gives you the tools to negotiate a raise and the perfect cocktail recipe to celebrate your new salary. The Financial Diet will teach you: • How to get good with money in a year. • The ingredients everyone needs to have a budget-friendly kitchen. • How to talk about awkward money stuff with your friends. • The best way to make (and stick to!) a budget. • How to take care of your house like a grown-up. • What the hell it means to invest (and how you can do it).

In fact, young readers will come away from this book with basic knowledge of every important area of personal finance. Ideal for teens and young adults, the volume will prove useful to parents who want to educate their children about the wise use of money, preparing them to make independent financial decisions. As the leading cause of chronic illness in the United States, more than fifty million Americans suffer from allergies, and they spend an estimated \$18 billion coping with them. Yet despite advances in biomedicine and enormous investment in research over the past fifty years, the burden of allergic disease continues to grow. Why have we failed to reverse this trend? Breathing Space offers an intimate portrait of how allergic disease has shaped American culture, landscape, and life. Drawing on environmental, medical, and cultural history and the life stories of people, plants, and insects, Mitman traces how America's changing environment from the late 1800s to the present day has led to the epidemic growth of allergic disease. We have seen a never-ending stream of solutions to combat allergies, from hay fever resorts, herbicides, and air-conditioned homes to numerous potions and pills. But, as Mitman shows, despite the quest for a magic bullet, none of the attempted solutions has succeeded. Until we address how our changing environment—physical, biological, social, and economic—has helped to create America's allergic landscape, that hoped-for success will continue to elude us.

Financial struggles of American families are headline news. In communities across the nation, families feel the pinch of stagnant and sometimes declining incomes. Many have not recovered from the Great Recession, when millions lost their homes and retirement savings. They are bombarded daily with vexing financial decisions: Which bills to pay? Where to cash checks? How to cover an emergency? How to improve a credit report? How to bank online? How to save for the future? Low- and moderate-income families have few places to turn for guidance on financial matters. Not many can afford to pay a financial advisor to help navigate all their own household financial needs. For students, graduates, or recently married couples, this resource shows how they can get their financial act together, spend their money effectively, use credit cards appropriately, and live debt free. Professionals are too often unprepared to address the full range of financial troubles of ordinary working families. Financial Capability and Asset Building in Vulnerable Households prepares social workers, financial counselors, and other human service professionals for financial practice with vulnerable families. Building on more than 20 years of research, the book sets the stage with key concepts, historical antecedents, and current financial challenges of families in America. It provides knowledge and tools to assist families in pressing financial circumstances, and offers a lifespan perspective of financial capability and environmental influences on financial behaviors and actions. Furthermore, the text details practice principles and skills for direct interventions, as well as for designing financial services and policy innovations. It is an essential resource for preparing the next generation of practitioners who can enable families to achieve economic security and development.

Kazimir Malevich's painting Black Square is one of the twentieth century's emblematic paintings, the visual manifestation of a new period in world artistic culture at its inception. None of Malevich's contemporary revolutionaries created a manifesto, an emblem, as capacious and in its own way unique as this work; it became both the quintessence of the Russian avant-garde's own art—which he called Suprematism—and a milestone on the highway of world art. Writing about this single painting, Aleksandra Shakhshid sheds new light on Malevich, the Suprematist movement, and the Russian avant-garde. Malevich devoted his entire life to explicating Black Square's meanings. This process engendered a great legacy: the original abstract movement in painting and its theoretical grounding; philosophical treatises; architectural models; new art pedagogy; innovative approaches to theater, music, and poetry; and the creation of a new visual environment through the introduction of decorative applied designs. All of this together spoke to the tremendous potential for innovative shape and thought formation concentrated in Black Square. To this day, many circumstances and events of the origins of Suprematism have remained obscure and have spawned arbitrary interpretations and fictions. Close study of archival materials and testimonies of contemporaries synchronous to the events described has allowed this author to establish the true genesis of Suprematism and its practical meaning.

This book provides young married couples with a wealth of biblical and commonsense advice for building a solid financial foundation. He also focuses on common financial pitfalls that can cause marital problems.

Provides information on credit histories, budgeting, borrowing, banking, investing, and avoiding common financial mistakes.
