Diplomarbeit aus dem Jahr 2017 im Fachbereich Informatik - Internet, neue Technologien, Note: 1, , Sprache: Deutsch, Abstract: Wearable Computing Technology Solutions kurz „Wearables“, wie Smartwatches, Smartglasses oder Fitnessarmbänder haben sich in den vergangenen Jahren als Trend im privaten Umfeld vieler Menschen etabliert. Im beruflichen Kontext finden Wearables – vor allem in Österreich – bisher nur sehr vereinzelt Anwendung. Dank der ständigen Weiterentwicklung und dem technologischen Fortschritt von mobilen Technologien sind die Einsatzmöglichkeiten von Wearables im Unternehmen jedoch vielfältig. Besonders große Industrieunternehmen setzen auf den Einsatz von Wearables in der Logistik und Produktion. Wearables schaffen neue Möglichkeiten zur Kommunikation

und zum Informationsabruf. Die Verbesserung der Geschäftsprozesse, sowie die Erhöhung der Mobilität im Unternehmen sind weitere mögliche Vorteile. Dem gegenüber stehen Bedenken hinsichtlich technischer Anforderungen, Datensicherheit und geeigneter Einsatzszenarien. Vor diesem Hintergrund ist das primäre Ziel dieser Arbeit das Potential von Wearables, abseits von großen Industrieunternehmen, in österreichischen Klein- und Mittelunternehmen (KMU) zu untersuchen. Dafür wurden zunächst mögliche Einsatzmöglichkeiten aufgezeigt. Anhand eines Online Fragebogens wurde anschließend die generelle Einstellung bzw. das Wissen über Wearables abgefragt.

The year 2019 marked four decades of cluster computing, a history that began in 1979 when the first cluster systems using Components Off The Shelf (COTS) became operational. This achievement resulted in a

rapidly growing interest in affordable parallel computing for solving compute intensive and large scale problems. It also directly lead to the founding of the Parco conference series. Starting in 1983, the International Conference on Parallel Computing, ParCo, has long been a leading venue for discussions of important developments, applications, and future trends in cluster computing, parallel computing, and high-performance computing. ParCo2019, held in Prague, Czech Republic, from 10 - 13 September

2019, was no exception. Its papers, invited talks, and specialized mini-symposia addressed cutting-edge topics in computer architectures, programming methods for specialized devices such as field programmable gate arrays (FPGAs) and graphical processing units (GPUs), innovative applications of parallel computers, approaches to reproducibility in parallel computations, and other relevant areas. This book presents the proceedings of ParCo2019, with the goal of making the many fascinating topics discussed at the
