The passage of Citizens United by the Supreme Court in 2010 sparked a renewed debate about campaign spending by large political action committees, or Super PACs. Its ruling said that it is okay for corporations and labor unions to spend as much as they want in advertising and other methods to convince people to vote for or against a candidate. This book provides a wide range of opinions on the issue. Includes primary and secondary sources from a variety of perspectives; eyewitnesses, scientific journals, government officials, and many others.

This paper is one of a series being prepared for the National Research Council's Committee on International Conflict Resolution. The committee was organized in late 1995 to respond to a growing need for prevention, management, and resolution of violent conflict in the international arena, a concern about the changing nature and context of such conflict in the post-Cold War era, and a recent expansion of knowledge in the field. The committee's main goal is to advance the practice of conflict resolution by using the methods and critical attitude of science to examine the effectiveness of various techniques and concepts that have been advanced for preventing, managing, and resolving international conflicts. The committee's research agenda has been designed to supplement the work of other groups, particularly the Carnegie Corporation of New York's Commission on Preventing Deadly Conflict, which issued its final report in December 1997. The committee has identified a number of specific techniques and concepts of current interest to policy practitioners and has asked leading specialists on each one to carefully review and analyze available knowledge and to summarize what is known about the conditions under which each is or is not effective. These papers present the results of their work.

A Brookings Institution Press and the National University of Singapore Press publication This is the story of the Singapore healthcare system: how it works, how it is financed, its history, where it is going, and what lessons it may hold for national health systems around the world. Singapore ranks sixth in the world in healthcare outcomes, yet spends proportionally less on healthcare than any other high-income country. This is the first book to set out a comprehensive system-level description of healthcare in Singapore, with a view to understanding what can be learned from its unique system design and development path. The lessons from Singapore will be of interest to those currently planning the future of healthcare in emerging economies, as well as those engaged in the urgent debates on healthcare in the wealthier countries faced with serious long-term challenges in healthcare financing. Policymakers, legislators, public health officials responsible for healthcare systems planning, finance and operations, as well as those working on healthcare issues in universities and think tanks should understand how the Singapore system works to achieve affordable excellence.

These essays both illuminate the original texts and encourage active engagement with them.

Although many Civil War reference books exist, Civil War researchers have until now had no single compendium to consult on important details about the combatant states (and territories). This crucial reference work, the sixth in the States at War series, provides vital information on the organization, activities, economies, demographics, and laws of Civil War South Carolina. This volume also includes the Confederate States Chronology. Miller enlists multiple sources, including the statutes, Journals of Congress, department and state legislatures, and others, to illustrate the rise and fall of the Confederacy. In chronological order, he presents the national laws intended to harness its manpower and resources for war, the harsh realities of foreign diplomacy, the blockade, and the costs of states' rights governance, along with mounting dissent: the effects of massive debt financing, inflation, and loss of credit; and a growing raggedness within the ranks of its army. The chronology provides a factual framework for one of history's greatest not be won while 35 percent of the population was enslaved.

Cruising the Library offers a highly innovative analysis of the history of sexuality and categories of sexual perversion through a critical examination of the Library of Congress and its cataloging practices. Taking the publication of Eve Kosofsky Sedgwick ' s Epistemologies of the Closet as emblematic of the Library ' s inability to account for sexual difference, Melissa Adler embarks upon a detailed critique of how cataloging systems have delimited and proscribed expressions of gender, sexuality, ethnicity, and race in a manner that mirrors psychiatric and sociological attempts to pathologize non-normative sexual practices and civil subjects. Taking up a parallel analysis, Adler utilizes Roderick A. Ferguson ' s Aberrations in Black as another example of how the Library of Congress fails to account for, and thereby " buries, " difference. She examines the physical space of the Library as one that encourages forms of governmentality as theorized by Michel Foucault while also allowing for its utopian possibilities. Finally, she offers a brief but highly illuminating history of the Delta Collection. Likely established before the turn of the twentieth century and active until its gradual dissolution in the 1960s, the Delta Collection was a secret archive within the Library of Congress that housed materials confiscated by the United States Post Office and other federal agencies. These were materials deemed too obscene for public dissemination or general access. Adler reveals how the Delta Collection was used to regulate difference and squelch dissent in the McCarthy era while also linking it to evolving understandings of so-called perversion in the scientific study of sexual difference. Sophisticated, engrossing, and highly readable, Cruising the Library provides us with a critical understanding of library science, an alternative view of discourses around the history of sexuality, and an analysis of the relationship between governmentality and the cataloging of research and information—as well as categories of difference—in American culture.

Four decades of Democratic control of Congress abruptly came to an end with the 1994 elections, which propelled the Republican party to an unfamiliar role as the majority party in both houses of Congress. Second-term congressman from Ohio Sherrod Brown was thrust into this frenetic first 100 days which were very partisan and often very nasty. Congress from the Inside takes freshman Congressman Brown through the halls of the Capitol as he learns his job; depicts the inner-working and deal-making of Congress; shows how legislation is crafted; and visits the offices of other members and small meetings where much of the work of Congress is done. Brown's third term, still as a member of the minority party, exposes the strengths and weaknesses of Congress as an institution, its successes and failures, its diversity and its elitism. This account of the transition from a political majority status to minority status discloses the trauma felt by one party and the exhilaration experienced by the other as one era ended and a new one began.

Digital information and networks challenge the core practices of libraries, archives, and all organizations with intensive information management needs in many respectsâ€”not only in terms of accommodating digital information and technology, but also through the need to develop new economic and organizational models for managing information. LC21: A Digital Strategy for the Library of Congress discusses these challenges and provides recommendations for moving forward at the Library of Congress, the world's largest library. Topics covered in LC21 include digital collections, digital preservation, digital cataloging (metadata), strategic planning, human resources, and general management and budgetary issues. The book identifies and elaborates upon a clear theme for the Library of Congress that is applicable more generally: the digital age calls for much more collaboration and cooperation than in the past. LC21 demonstrates that information-intensive organizations will have to change in fundamental ways to survive and prosper in the digital age.

The Speaker of the House of Representatives is the most powerful partisan figure in the contemporary U.S. Congress. How this came to be, and how the majority party in the House has made control of the speakership a routine matter, is far from straightforward. Fighting for the Speakership provides a comprehensive history of how Speakers have been elected in the U. S. House since 1789, arguing that the organizational politics of these elections were critical to the construction of mass political parties in America and laid the groundwork for the role they play in setting the agenda of Congress today. Jeffery Jenkins and Charles Stewart show how the speakership began as a relatively weak office, and how votes for Speaker prior to the Civil War often favored regional interests over party loyalty. While struggle, contention, and deadlock over House organization were common in the antebellum era, such instability vanished with the outbreak of war, as the majority party became an "organizational cartel" capable of controlling with certainty the selection of the Speaker and other key House officers. This organizational cartel has survived Gilded Age partisan strife, Progressive Era challenge, and conservative coalition politics to guide speakership elections through the present day. Fighting for the Speakership reveals how struggles over House organization prior to the Civil War were among the most consequential turning points in American political history.

African American Communist B.D. Amis was a major figure in the black freedom struggle during the two decades between the world wars. At that time, the American Communist Party (CPUSA) played a significant role in fighting for the rights of African Americans. Amis was part of the small circle of black radicals leading the struggle for workers' rights and racial justice. This anthology of his key writings and speeches reveals the deep commitment to the working class by his generation of African American Marxists. His classics, such as 'Lynch Justice at Work' and 'They Shall Not Die!', as well as his speech nominating William Z. Foster for president at the 1936 CPUSA Convention in Chicago, are included. This work also features important documents penned by Amis and found in the former Soviet archives and in the private holdings of the Amis Family. It also includes many of Amis' theoretical works found in international documents, such as the CPUSA's International Press Correspondence, and a selected bibliography on the research scholarship pertaining to African Americans and communism

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

This remarkable work of scholarship addresses the difficulties inherent in the American Constitution's separation of legislative and executive powers. In his first book, Wilson argues that in the years following the Civil War, the legislature received unfair advantages from the system of checks and balances, threatening the effectiveness of the constitutionally mandated separation of powers.
