Research and scholarly communication is increasingly seen in the light of open science, making research processes and results more accessible and collaborative. This brings with it the chance to better connect research and society by introducing new avenues for engagement with citizens. This book presents the proceedings of the 19th International Conference on Electronic Publishing (Elpub), held in Valetta, Malta, in September 2015. This year's conference explores the interplay of two dimensions of electronic publishing - the ever growing volume of digital collections and the improved understanding of the widest user group, citizens. This exciting theme encompasses human, cultural, economic, social, technological, legal, policy-related, commercial, and other relevant aspects. Echoing the conference agenda, the book covers a wide range of topics, including engagement with

citizens and professionals, enhanced publishing and new paradigms, discovery and digital libraries, open access and open science, as well as the use and reuse of data. Addressing the most recent developments in these areas, the book will be of interest to practitioners, researchers and students in information science, as well as users of electronic publishing. Shows readers how to create PDF documents that are far more powerful than simple representations of paper pages, helps them get around common PDF issues, and introduces them to tools that will allow them to manage content in PDF, navigating it and reusing it as necessary. With the invention of desktop computers, electronic learning or e-learning has become a convenient learning tool of choice for individuals with busy schedules. For the past several years, there has been a continuous stream of much needed innovation in the use of e-learning and these have now become second nature to both e-learning providers and users. But as e-learning has enhanced and enriched our lives, challenges have increased as the creation of courses and e-learning material evolve. Technology, although it makes our lives easier, also comes with a 'not so affordable' price tag. As creators of e-learning content, after raising the cost to provide a costly e-learning initiative, how do we know if our customers or target audience are really learning? Who is going to maintain the technology? Who will subsidize the upkeep? How do we know if there is a better product on the horizon that can do it more cheaply? How do we know if there is a better product on the horizon that can do it more cheaply? more advanced technology infrastructure? E-learning and Business Plans: National and International Case Studies provides a comprehensive view on how to develop non-profit business plans for both small and large-scale e-learning projects. Editors Tiffini Travis and Elaina Norlin present both national and international case studies covering many elements of a typical non-profit business plan and reveal the experiences individuals have had while developing their project. This book will be useful to professionals, non-profit organizations, and academic researchers who are currently considering working on large-scale e-learning cost/high risk projects. While many issues are library-related, the book is relevant to librarians as well.

Much of the data available today is unstructured and text-heavy, making it challenging for analysts to apply their usual data wrangling and visualization tools. With this practical book, you'll explore text-mining techniques with tidytext, a package that authors Julia Silge and David Robinson developed using the tidy principles behind R packages like ggraph and dplyr. You'll learn how tidytext and other tidy tools in R can make text analysis easier and more effective. The authors demonstrate how treating text as data frames enables you to manipulate, summarize, and visualize characteristics of text. You'll also learn how to integrate natural language processing (NLP) into effective workflows. Practical code examples and data explorations will help you generate real insights from literature, news, and social media. Learn how to apply the tidy text format to NLP Use sentiment analysis to mine the emotional content of text Identify a document's most important terms with frequency measurements Explore relationships and connections between words with the ggraph and widyr packages Convert back and forth between R's tidy and non-tidy text formats Use topic modeling to classify document collections into natural groups Examine case studies that compare Twitter archives, dig into NASA metadata, and analyze thousands of Usenet messages

Here's what readers are saying about *Google Drive & Docs In 30 Minutes*: "I am so glad this was made! I've been using Google Docs for a while now and have been encouraging my teacher colleagues to do so as well to facilitate collaboration. It has become my go-to text book to help new users understand quickly. If you're new to Google Drive or Google Documents, this will help you. If you're experienced, and want something to help those who come to you with questions, this is a nice tool to help them remember what you show them. I highly recommend it." "I just got a new position that requires record keeping. Having used Google Docs in the past, I decided to update my knowledge. I googled "Docs for dummies" and this was one of the results. I liked the concept that the title implies - a concise guide that will distill what I need and allow me to complete a task quickly" "A clear and concise explanation of how to navigate your way through google docs." "Excellent introduction to Google drive. Well researched, easy to read, nicely organized."

This is one of the few books to cover integration and workflow in depth between Photoshop, Illustrator, InDesign, GoLive, Acrobat, and Version Cue. *The second edition of this best-selling Python book (over 500,000 copies sold!) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic *Automate the Boring Stuff with Python*, you'll learn how to use Python*

to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to:

- Search for text in a file or across multiple files*
- Create, update, move, and rename files and folders*
- Search the Web and download online content*
- Update and format data in Excel spreadsheets of any size*
- Split, merge, watermark, and encrypt PDFs*
- Send email responses and text notifications*
- Fill out online forms*

Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in Automate the Boring Stuff with Python, 2nd Edition.

Writers talk about their work in many ways: as an art, as a calling, as a lifestyle. Too often missing from these conversations is the fact that writing is also a business. The reality is, those who want to make a full- or part-time job out of writing are going to have a more positive and productive career if they understand the basic business principles underlying the industry. The Business of Being a Writer offers the business education writers need but so rarely receive. It is meant for early-career writers looking to develop a realistic set of expectations about making money from their work or for working writers who want a better understanding of the industry. Writers will gain a comprehensive picture of how the publishing world works—from queries and agents to blogging and advertising—and will learn how they can best position themselves for success over the long term. Jane Friedman has more than twenty years of experience in the publishing industry, with an emphasis on digital media strategy for authors and publishers. She is encouraging without sugarcoating, blending years of research with practical advice that will help writers market themselves and maximize their writing-related income. It will leave them empowered, confident, and ready to turn their craft into a career.
