? It is the time to plot, plan & draw! No need to be a fine artist or a landscape architect. You know what your yard looks like & you have ideas for what you want it to look like. ? How to Get Started? First, grab that graph paper. Second, get out your measuring tape and measure the length and width of your garden. Map that out on the graph paper, including any curves or dips, so you have an accurate representation of the shape of your garden. We prefer using a 1? to 1? ratio, using each square inch on the paper as a square foot in the garden. Plants like breathing room as they grow, so we must consider the mature size of a plant when plotting. ? Useful information to record includes:
