JFDP Reflections of Eurasian Scholars is a journey of exchange scholars from Russia, Ukraine, Tajikistan, Azerbaijan, Serbia, and Kazakhstan to USA. This anthology presents the interesting, shocking, and unforgettable moments of JFDP scholars' experiences. Anyone, who is interested to study in USA or going to any of the contributors' country, should read this book. This volume provides a rare perspective of observing the country from student's point of view to learn, share and cope with the cultural shock. The Junior Faculty Development Program (JFDP) is an exchange program tailored for early career scholars and professionals. JFDP program allows young scholars to experience and learn from American classrooms. The participants join American Universities and class room teaching to observe, share, and learn various subjects from diverse perspectives. The JFDP program also offers young scholars to participate in professional events like conferences, forums and discussions. These essays may not reflect the accurate picture of America, its society and people, but the reminiscences of these unofficial cultural ambassadors bring forward the interesting and surprising encounters that would interest anyone who is concerned with people, cultures, and diversity.

***In 1950, the open space lands from Hayward to Pleasanton in California were privately owned and sprawl development was booming. By 2020, the frontier was closed, and almost all the shorelands and ridgелands in this large area were protected as public open space and by regulation. The land was saved by many advocates and these are their stories, many narratives sometimes parallel to each other, other times connecting, involving elections, referendums, litigation, bond measures, lobbying, organizing, and campaigns. Each story is simple enough, but taken together they add up to a long and complex history.***

This book is a practical guide for medical professionals with little or no business experience who are interested in establishing health care facilities in developing countries. It is an introduction to the kinds of basic research and planning required to identify viable solutions and reduce the risk of failure.

Economic history bears evidences to confirm that entrepreneurship development is a pre-condition for industrial and economic development of any economy. That is why countries world over including India have been emphasizing on entrepreneurship development. Started since 1971, India's Entrepreneurship Development Programme, famously known as EDPs, has by now emerged as a movement and is being adopted by some of the developing countries of Asia and Africa. Realizing that the younger minds are more susceptible to mould and change, entrepreneurship as a subject has been offered in the course curricula right from school level to the higher education. Since the publication of the Seventh Edition of the book titled ' Entrepreneurship and Small Business Management ' , some significant changes taken place in the industrial economy of India have necessitated revising the subject matter to make the book, most presumptuous and contemporary.

Marketing is about placing a new product or service into the market. Projects are about delivering new products and services. The merger of these two fields holds great promise for delivering value to organizations and their clients. Project managers can serve many markets ranging from investors who fund projects to that of clients who use new products and services. Marketing Projects is a guide for helping project managers have projects funded or deliver value to end users. It is also a guide for marketing managers new to the world of project management. The book begins by presenting the basics of both marketing and project management and highlights the aspects that are unique and relevant to both areas. It then explores marketing project feasibility and presents tools for assessing feasibility, which include the 6Ps of project management strategy: The project 4Ps: plan, processes, people, and power PRO: pessimistic, realistic, and optimistic scenarios POVs: points of vulnerability POE: point of equilibrium POW: product, organization, and work breakdown structures PWP: work psychodynamics This book illustrates how to use these tools to market new projects to potential sponsors and investors. It then explores marketing projects to end users. Crucial to the success of projects are the relationships between project managers and clients and the way marketing experts implement their strategies. This book explains how project managers can develop meaningful relationships with clients to foster trust and have positive interactions. Project managers excel at managing the processes for delivering new products and services. Marketers are keenly aware of latent, or unconscious needs, as well as those developing and emerging, and can provide project promoters and managers with exciting ideas. This book will help improve the mutual understanding between marketing and project managers, an effort ultimately benefiting end users, whether they be investors or customers. A better work atmosphere and a closer fit between marketing and project management objectives can only serve the interests of investors and end users, for whom marketers and project managers conceive and realize projects, one way or the other.

The Southern Manhattan Coastal Protection Study: Evaluating the Feasibility of an MPL report (the "Feasibility Study") was conducted by a team led by ARCADIS U.S., Inc.. The team also included HR&A Advisors, Inc., FXFOWLE Architects, WXY Studio, Sive, Paget & Riesel P.C., AKRF, Inc., Ocean and Coastal Consultants, and Jesse M. Keenan (the "Study Team"). The Feasibility Study focused on an approximately 1.3-mile span of the eastern edge of Manhattan, from the Battery Maritime Building to Pier 35 (the "Study Area"). The Feasibility Study also analyzed adjacent areas that would be integral to a comprehensive flood protection solution for Southern Manhattan. The Feasibility Study concluded that: 1) An multi-protection levee (MPL) is technically feasible in the Study Area and will not induce flooding either in adjacent neighborhoods or across the East River. 2) An MPL is legally feasible within the existing regulatory framework. However, the required permitting/approvals processes will be complex and lengthy. 3) An MPL is financially feasible and could not only be self-financing, but could also help finance complementary flood protection investments in Southern Manhattan. The MPL options and conceptual development programs evaluated within the report were defined for feasibility analysis purposes; the findings within do not comprise a development proposal. The process to articulate, assess, and advance an actual development proposal for an MPL will be long and complex, and will require extensive local stakeholder engagement and coordination. The commitment to effectively address the known climate change risks must remain as the core driver of that process, especially regarding all future work that builds upon and follows up on this Feasibility Study. https://doi.org/10.5281/zenodo.5246133

***"With the overarching goal of preparing the analysts of tomorrow, Systems Analysis and Design offers students a rigorous hands-on introduction to the field with a project-based approach that mirrors the real-world workflow. Core concepts are presented through running cases and examples, bolstered by in-depth explanations and special features that highlight critical points while emphasizing the process of "doing" alongside "learning." As students apply their own work to real-world cases, they develop the essential skills and knowledge base a professional analyst needs while developing an instinct for approach, tools, and methods. Accessible, engaging, and geared toward active learning, this book conveys both essential knowledge and the experience of developing and analyzing systems; with this strong foundation in SAD concepts and applications, students are equipped with a robust and relevant skill set that maps directly to real-world systems analysis projects." -- Provided by publisher.***

*This book presents a set of tools that will aid in deciding whether a project should go ahead, be improved, or abandoned altogether by pinpointing its vulnerabilities. It offers a review of project feasibility analysis, and more critically, psychodynamic aspects that are often neglected, including how stakeholders interact. It provides a complement to the common techniques used for analyzing technical, financial, and marketing feasibility. The goal is to identify "hidden truths" and eliminate those gray areas that jeopardize the success of a given project. The focus is on uncovering points of vulnerabilities in four key aspects of a project: People, Power, Processes, and Plan.*
