Focusing specifically on teaching in grades 7-12, this comprehensive resource guide/workbook involves readers interactively -- through discussions, exercises, vignettes, and case studies -- with the why, what, how, and how well of a performance-based, competency-based, criterion-referenced approach to teaching. Explores instructional planning, strategy implementation, discipline, legal issues, and both student and teacher evaluation. Reflects the latest developments in cognitive learning theory, the constructivist approach to learning, social/interactive learning, the current school funding environment, and the growing diversity of the student population. Emphasizes an eclectic model of teaching which encourages readers to choose effective approaches from a variety of possible teaching models. Connects strategies rather than teaching them as separate entities. For prospective secondary school teachers (grades 7-12).

Readings and Applications

Fourth Estate

Congressional Record

"This is a book of stories about teaching statistics. These stories are told by fourteen different instructors of innovative statistics courses, who demonstrate that learning statistics can be a positive, meaningful, and even exciting experience. Despite the prevailing opinion that statistics courses are dull and difficult for students, these stories paint quite a different picture. In the classes of the instructors whose stories fill this book, students are engaged in learning, are empowered to do statistics, and appreciate the instructional methods of their teachers. The instructors profiled in this book are inspiring, dedicated teachers who have devoted considerable effort to creating courses and materials that enable students to successfully learn statistics. Each chapter begins by describing how the author became a teacher of statistics, then provides details about the courses they currently teach, describing their teaching method, textbook, types of student assessments, and uses of technology. One typical class is described in detail, to provide a snapshot of what each person's teaching looks like. The writers then tell the story of the process they went through in developing an innovative course, and conclude their chapters with a discussion of their future plans for course revision or development. As you read these stories, you will learn about some great activities, some helpful technological tools and some innovative assessment methods. By reading these stories, teachers of statistics will understand and be motivated to try different ways to implement reform recommendations, so that these recommendations may continue to lead to a variety of new materials, activities, and teaching approaches. I hope that teachers of statistics may be inspired by these stories and feel encouraged to try new methods, leave behind more traditional approaches to teaching statistics, and carefully examine the effect of their teaching on student learning." -- Publisher.

Teaching in the Middle and Secondary Schools

Teaching at Its Best This third edition of the best-selling handbook offers faculty at all levels an essential toolbox of hundreds of practical teaching techniques, formats, classroom activities, and exercises, all of which can be implemented immediately. This thoroughly revised edition includes the newest portrait of the Millennial student; current research from cognitive psychology; a focus on outcomes maps; the latest legal options on copyright issues; and how to best use new technology including wikis, blogs, podcasts, vodcasts, and clickers. Entirely new chapters include subjects such as matching teaching methods with learning outcomes, inquiry-guided learning, and using visuals to teach, and new sections address Felder and Silverman's Index of Learning Styles, SCALE-UP classrooms, multiple true-false test items, and much more. Praise for the Third Edition of Teaching at Its Best Everyone—veterans as well as novices—will profit from reading Teaching at Its Best, for it provides both theory and practical suggestions for handling all of the problems one encounters in teaching classes varying in size, ability, and motivation."—Wilbert McKeachie, Department of Psychology, University of Michigan, and coauthor, McKeachie's Teaching Tips This new edition of Dr. Nilson's book, with its completely updated material and several new topics, is an even more powerful collection of ideas and tools than the last. What a great resource, especially for beginning teachers but also for us veterans!"—L. Dee Fink, author, Creating Significant Learning Experiences This third edition of Teaching at Its Best is successful at weaving the latest research on teaching and learning into what was already a thorough exploration of each topic. New information on how we learn, how students develop, and innovations in instructional strategies complement the solid foundation established in the first two editions."—Marilla D. Svinicki, Department of Psychology, The University of Texas, Austin, and coauthor, McKeachie's

Sovereignty, Property and Indigenous People

A Guide to Methods and Resources : Planning for Competence

Teaching at Its Best

This book provides a new approach to the historic treatment of indigenous peoples' sovereignty and property rights in Australia and New Zealand. By shifting attention from the on European claims of possession to a comparison of the ways in which British players treated these matters later, Bain Attwood not only reveals some startling similarities between and New Zealand cases but revises the long-held explanations of the differences. He argues that the treatment of the sovereignty and property rights of First Nations was seldom by the workings of moral principle, legal doctrine, political thought or government policy. Instead, it was the highly particular historical circumstances in which the first encounters natives and Europeans occurred and colonisation began that largely dictated whether treaties of cession were negotiated, just as a bitter political struggle determined the significance Treaty of Waitangi and ensured that native title was made in New Zealand.
