

Course Project Management An Najah National University

Handbook of Research on Technologies and Cultural Heritage: Applications and Environments covers the many important uses information communication technology in enhancing the experience at cultural environments. From museums, to archaeological sites, to festivals and artistic events to even government institutions and public buildings, information communication technology is revolutionizing the way the public participates at and with these cultural sites, and this reference source provides both a thorough

exploration of this revolution and springboard for future discoveries. This open access book presents how Open Science is a powerful tool to boost Higher Education. The book introduces the reader into Open Access, Open Technology, Open Data, Open Research results, Open Licensing, Open Accreditation, Open Certification, Open Policy and, of course, Open Educational Resources. It brings all these key topics from major players in the field; experts that present the current state of the art and the forthcoming steps towards a useful and effective implementation. This book presents radical, transgenic solutions for recurrent and long-standing problems in Higher Education. Every chapter presents a

clear view and a related solution to make Higher Education progress and implement tools and strategies to improve the user's performance and learning experience. This book is part of a trilogy with companion volumes on Radical Solutions & Learning Analytics and Radical Solutions & eLearning. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

Now in a thoroughly revised 7th edition, Public Personnel Management focuses on the critical issues and common processes in the management of public sector personnel. In keeping with prior editions, the text centers on

the core processes within public human resource management: strategic workforce planning, effective recruitment and retention, workforce development, and employee relations. Designed to further address the ways in which expectations for human resource managers have changed and developed in recent years, the 7th edition includes several new features and improvements: Substantially restructured, updated, and additional case studies and student exercises. Coverage of how the field of Public HRM has been influenced by the two most recent national recessions, economic downturns at the state and local level, privatization and contracting trends at all levels of government, the growing presence of

millennial employees in the workplace, issues surrounding social media use within the workplace, the evolving goals of social equity and diversity, and the shifting role and influence of labor unions. Discussions of how the growth in information technology capabilities has influenced the major processes within HRM, from workforce analysis through big data analytics to the explosion in automated recruitment, assessment, and instructional technologies. For the first time, the text includes an online Instructor's Manual, PowerPoint slides, discussion questions, and suggestions for further reading to make it even easier to assign and use this classic text in the classroom. Providing the most up-to-date and

thorough overview of the history and practice of public human resource management for both undergraduate and graduate students, Public Personnel Management, 7e remains the beloved text it ever was, ideal for introductory courses in Public Personnel Management, Public Human Resource Management, and Nonprofit Personnel Management. Artificial Intelligence and COVID Effect on Accounting The RSP Report Catalysts for Ideas and Action Resources, Protection and Management EUDISED European Educational Research Yearbook 1998/99 The humanities and social sciences. A Liquid Assets shows that the

common view of water as an inevitable cause of future wars is neither rational nor necessary. Typically, two or more parties with claim to the same water sources are thought to play a zero-sum game with each side placing a high emotional and political value over the ownership of the water. However, Franklin Fisher and his coauthors demonstrate that when disputes in ownership are expressed as disputes about money values, in most cases, the benefits of ownership will be surprisingly small. By assigning an economic value

to water and treating water as a tradable resource, parties see that the gains from cooperation exceed the costs resulting from the change in ownership. A zero-sum game becomes a win-win situation. To support this new approach, Liquid Assets presents an innovative water allocation model that can be used to assist water management, the cost-benefit analysis of water infrastructure, and the resolution of disputes. The model takes system-wide effects into account and is the first to overcome the failure of actual water markets to cope

with the divergence between social and private benefits (as implied by agricultural subsidies), permitting the model-user to impose his or her own values or policies. Liquid Assets applies its methodology to Israel, Jordan, and Palestine, a region where water is scarce and water conflicts are often thought to be explosive. Indeed, this book is the result of a joint effort of Israeli, Jordanian, Palestinian, American, and Dutch experts. But the books message and methods are not restricted to the Middle East. They are applicable to water

management and water disputes around the globe. Delivering E-Learning describes a new and better way of understanding e-learning. The author looks at overcoming objections to e-learning and acknowledging poor past practice before presenting a new strategic approach. It places the emphasis firmly on learning, not the technology, demystifying the jargon and debunking industry myths. The current way most people look at e-learning is flawed, and this means they are missing its full potential. This book

provides a clear framework to better understand e-learning. Proposing a strategic approach to implementing e-learning, the author demonstrates how to align e-learning strategy with learning and business strategies. It offers a complete resource for applying e-learning to any organization.

This book addresses some of the challenges posed by the globalization of higher education. It examines the emergence and resulting challenges of English as Lingua Franca (ELF) and of the decision to use English as the

Medium of Instruction (EMI) as part of a strategic policy of internationalization. It looks at survival challenges caused by globalization and expansion, the diversity challenge, the concept of marginality and how marginality can lead to creativity, teaching and encouraging entrepreneurialism, the tools needed for internationalizing higher education in developing countries, innovative approaches, the intelligent use of technology, and finally, the value of non-constraint engagement in driving teaching and course

quality improvements. The expansion of higher education and the increasingly international body of students and staff continue to inspire and drive the development of global higher education systems. Whilst these systems began locally, many are now engaging with the challenges of retaining their local flavour whilst embracing the march of globalisation. The challenge is to find local solutions that also meet the requirements of the rapid development of what might be termed the ‘massification’ of international higher education.

This book reflects these contemporary challenges through its variety of topics taken from countries as diverse as Hong Kong, Panama, South Africa, USA and Saudi Arabia. The topics are as diverse as some of the local solutions but each chapter represents a response to a rapidly changing global landscape.

Perspectives on Global
Business Interaction in
Emerging Markets
Applications of Artificial
Intelligence in Business,
Education and Healthcare
Technical Publication Series**

Societal demands, needs, and perspectives of ethical and socially responsible behavior within business environments are a driving force for corporate self-regulation. As such, executives must consistently work to understand the current definition of ethical business behavior and strive to meet the expectations of the cultures and communities they serve. Ethical and Social

Perspectives on Global Business Interaction in Emerging Markets compiles current research relating to business ethics within developing markets around the world. This timely publication features research on topics essential to remaining competitive in the modern global marketplace, such as corporate social responsibility, corporate governance, consumer behavior understanding, and ethical leadership, and how all of these components attribute to the decision making process in business environments. Business executives and managers, graduate-level students, and academics will find this publication to be essential to

their research, professional, and educational needs.

Management Information Systems provides comprehensive and integrative coverage of essential new technologies, information system applications, and their impact on business models and managerial decision-making in an exciting and interactive manner. The twelfth edition focuses on the major changes that have been made in information technology over the past two years, and includes new opening, closing, and Interactive Session cases.

Praise for the first edition: “This book is an optimal tool for instructors and students of graduate

immigrants and refugees, this is the only book to address the intersection of legal, policy, and advocacy issues, in addition to the clinical skills needed to help these populations. This second edition has been updated to reflect key policy changes at the state and federal levels affecting social work with immigrants and refugees. The authors have expanded their coverage of transnationalism, microaggressions, and public health and community issues, and each chapter features updated case studies on the most critical issues immigrants face today: legal processes, physical and mental health issues, employment

difficulties, family conflicts, and more. Key Features: Completely updated to reflect the latest developments in immigration law and policy Includes updated case studies, discussion questions, and abundant reference material Provides the multidisciplinary perspective of lawyers, social workers, clinicians, administrators, and academics Addresses issues specific to elderly immigrants, immigrant children, LGBT immigrants, and victims of international trafficking All-new appendix features sample questions asked at naturalization interviews

Provides simplified MATLAB
codes for analysis of photovoltaic
systems, describes the model of
the whole photovoltaic power
system, and shows readers how
to build these models line by line.
This book presents simplified
coded models for photovoltaic
(PV) based systems using
MATLAB to help readers
understand the dynamic behavior

of these systems. Through the use of MATLAB, the reader has the ability to modify system configuration, parameters and optimization criteria. Topics covered include energy sources, storage, and power electronic devices. This book contains six chapters that cover systems' components from the solar source to the end-user. Chapter 1 discusses modelling of the solar source, and Chapter 2 discusses modelling of the photovoltaic source. Chapter 3 focuses on modeling of PV systems' power electronic features and auxiliary power sources. Modeling of PV systems' energy flow is examined in Chapter 4, while Chapter 5 discusses PV systems in electrical power systems. Chapter 6

presents an application of PV system models in systems' size optimization. Common control methodologies applied to these systems are also modeled. Covers the basic models of the whole photovoltaic power system, enabling the reader modify the models to provide different sizing and control methodologies Examines auxiliary components to photovoltaic systems, including wind turbines, diesel generators, and pumps Contains examples, drills and codes Modeling of Photovoltaic Systems Using MATLAB: Simplified Green Codes is a reference for researchers, students, and engineers who work in the field of renewable energy, and specifically in photovoltaic

This book considers the effects of COVID-19 on accounting, particularly with regard to the role of artificial intelligence in accounting in the post-pandemic business environment. The contributions in the book consider a variety of sectors that have been affected by the pandemic, such as the stock market, forensic accounting, Bitcoin, as well as the economic and educational responses to the pandemic and the aftermath felt by both developing and developed countries. This book will be a valuable read for academics, students and practitioners of accounting who are keen to explore the future of the field in light of the pandemic.

Government and individual policymakers throughout the developed and developing world face the common problem of bringing expert knowledge to bear in government decision making. Policymakers need understandable, reliable, accessible, and useful information about the societies they govern. They also need to know how current policies are working, as well as possible alternatives and their likely costs and consequences. This expanding need has fostered the growth of independent public policy research organizations, commonly known as think tanks. Think Tanks and Civil Societies analyzes their growth, scope, and constraints, while providing

institutional profiles of such organizations in every region of the world. Beginning with North America, contributors analyze think tank development past and future, consider their relationship to the general political culture, and provide detailed looks at such examples as the Heritage Foundation and the Institute for Research on Public Policy. A historical and subregional overview of think tanks throughout Europe notes the emphasis on European Union issues and points to a dramatic rise in the number and influence of free market institutes across the continent. Think tanks in Germany, Spain, and France are profiled with respect to national politics and cultures. Advanced

industrial nations of northern Asia are compared and contrasted, revealing a greater need for independent policy voices. Moving to countries undergoing economic transition, contributors deal with challenges posed in Russia and the former Soviet bloc and their think tanks' search for influence, independence, and sustainability. Other chapters deal with the developing countries of Africa, Asia, the Middle East, and Latin America, finding that the number, quality, and independence of think tanks is largely determined by the degree of democracy in individual nations.

**Higher education
institutions around the
world are increasingly
turning to e-learning as a
way of dealing with
growing and changing
student populations.
Education for the
knowledge society means
new skills and knowledge
are needed and it means**

that lifelong learning has become a necessity. Higher education institutions are looking to e-learning to provide convenient and flexible access to high quality education and training that is needed to meet these emerging demands. As they implement e-learning, however, institutions are struggling with the many pedagogical, organizational and technological issues. Making the Transition to E-learning: Strategies

and Issues provides insights and experiences from e-learning experts from around the world. It addresses the institutional, pedagogical, and technological issues that higher education institutions are grappling with as they move from conventional face-to-face teaching to e-learning in its diverse forms. Language learning is a complex and challenging endeavor. For students to achieve the desired proficiency in English as a

Foreign Language (EFL) their institutions need to invest time, effort and huge resources in order to cater for different learning styles. To be cost effective, many language-teaching institutions strive to provide intensive foreign language (FL) instruction to reduce the time period needed to learn the target language. This explains the current interest in combining differe...

East and North Africa. It is vital for socioeconomic growth and sustainability of the environment.

The editors present the latest research results related to the current water situation, as well as its significance for the peaceful coexistence of the neighbouring countries. The book focusses on the following topics: water resources, water protection, water management and water as a source of conflict. With regard to the protection of ground water and surface water in the respective areas, topics such as sewage disposal and soil protection, as well as the transfer of environmental technology are also discussed.

In the last decade, due to factors of ICT infrastructural and broadband maturation, rising levels of educational attainment and computer literacy, and diversification strategies, e-learning has exploded in the Middle East and North Africa (MENA) region. However, significant barriers remain in the region's e-learning development: lack of research on outcomes and effectiveness, paucity of Arabic language learning objects, monopolies and high cost of telecommunications, cultural taboos, accreditation, censorship, and teacher training. This unique volume is the first comprehensive effort to describe the history, development, and current

weakness of the family practice model in many countries in the Eastern Mediterranean Region. Focusing on engagement with the private health sector in scaling up family practice, the book explores why primary health care can make the difference and how it can be introduced and strengthened. Comparative experiences from around the world put the EMR in context, while the book also highlights where the EMR is special – in particular, the burden for health care of refugees and displaced persons, and the need of public-private partnerships.
