"Stern but compassionate, author Wendell Berry raises broader issues that environmentalists rarely focus on . . . In one sense Berry is the voice of a rural agrarian tradition that stretches from rural Kentucky back to the origins of human civilization. But his insights are universal because Our Only World is filled with beautiful, compassionate writing and careful, profound thinking."—Associated Press

The planet's environmental problems respect no national boundaries. From soil erosion and population displacement to climate change and failed energy policies, American governing classes are paid by corporations to pretend that debate is the only democratic necessity and that solutions are capable of withstanding endless delay. Late Capitalism goes about its business of finishing off the planet. And we citizens are left with a shell of what was once proudly described as The American Dream. In this collection of eleven essays, Berry confronts head-on the necessity of clear thinking and direct action. Never one to ignore the present challenge, he understands that only clearly stated questions support the understanding their answers require. For more than fifty years we've had no better spokesman and

London, spring 1939. 18-year-old Ada Vaughan, a beautiful and ambitious seamstress, has just started work for a modiste in Dover Street. A career in couture is hers for the taking - she has the skill and the drive - if only she can break free from the dreariness of family life in Lambeth. A chance meeting with the enigmatic Stanislaus von Lieben catapults Ada into a world of glamour and romance. When he suggests a trip to Paris, Ada is blind to all the warnings of war on the continent: this is her chance for a new start. Anticipation turns to despair when war is declared and the two are trapped in France. When the Nazis invade, Stanislaus abandons her and she is taken prisoner, sent to Germany as slave labour and forced to survive on her wits alone.

In this mystery novella, G. K. Chesterton does what he does best—spins a tale of intrigue and suspense, strewn with philosophical and theological commentary. The story revolves around Squire Vane, who has imported three "peacock trees," which, according to the locals, spread disease and eat people. The Squire dismisses these comments as mere superstition, but when three guests bring up the topic and anger the Squire, he storms off down to the trees to spend the night among them, to prove they aren't dangerous. The next morning he's gone. His guests

and a local doctor set out to discover what happened to him, and untangle a thoroughly knotted web. This is a brilliant exposition on a human's ability and desire to believe in the supernatural, all wrapped up in a story of pride and arrogance.

Veganville è una città ideale costruita sulla cima di una montagna, che accoglie chiunque voglia dare il proprio contributo per rendere il mondo un posto migliore. Un passo alla volta. Con chiarezza, pragmatismo e un pizzico di provocazione, Tobias Leenaert propone un nuovo modo di pensare all'attivismo animalista, più inclusivo e flessibile, che coinvolga tutti, vegani di lunga data, vegetariani, onnivori, singoli individui, organizzazioni e aziende. Solo collaborando e confrontandoci senza dogmatismo, possiamo unire le forze, aiutare gli animali e fare del bene al pianeta. Ricco di informazioni, consigli, esempi e riflessioni, In viaggio per Veganville è una vera e propria chiamata all'azione collettiva. A cura di Claudio Pomo, Responsabile campagne di Essere Animali.

This is the official cookbook for the groundbreaking documentary "What The Health", filled with astonishing insights and delicious, easy-to-make recipes that will leave you feeling satisfied, invigorated and most importantly - guilt-free! Similar to the film, this book reveals the hard truths about chronic diseases and why the nation's leading health organizations don't want us to know about it. Despite the plethora of evidence connecting a whole foods plant-based diet to increased health and decreased rates of diabetes, cancers and heart disease, most people think turning to a completely plant-based diet is too extreme a lifestyle choice. But with familiar and savory recipes like the Creamy Mac and decadent desserts like the Lemon Blueberry Custard, this book will make it easier than ever to transition into a plant-based lifestyle. Look forward to leading a longer, healthier and happier life!

This companion to the documentary "Cowspiracy" explores the impacts of the most environmentally destructive industry on the planet: animal agriculture. The award-winning documentary "Cowspiracy" presents alarming truths about the effects of animal agriculture on the planet. One of the leading causes of deforestation, greenhouse gas production, water use, species extinction, ocean dead-zones, and a host of other ills, animal agriculture is a major threat to the future of all species, and one

of the environmental industry's best-kept secrets. "The Sustainability Secret" expands upon "Cowspiracy" in every way. Journey with authors Kip Andersen and Keegan Kuhn as they discover one shocking statistic after another and interview leading businesses, environmental organizations, and political groups about the subject of animal agriculture and its disastrous effects. Extended transcripts, updated statistics, tips on becoming vegan, and comprehensive reading lists provide an in-depth overview of this planetary crisis and demonstrate effective ways to offset the damage through personal dietary choices. Firmly rooted in science and supporting research, "The Sustainability Secret" reveals the absolutely devastating environmental impact of the meat and dairy industry and offers a path to global sustainability for a growing population"

For decades it has been nearly universal dogma among environmentalists that livestock--goats, sheep, and others, but especially cattle--are Public Enemy Number One. They erode soils, pollute air and water, damage riparian areas, and decimate wildlife populations. The UN's Food and Agriculture Organization bolstered the credibility of this notion with its 2007 report that declared livestock to be the single largest contributor to human-generated climate-change emissions. But is the matter really so clear cut? Hardly. In her new book, *Defending Beef*, environmental lawyer turned rancher Nicolette Hahn Niman argues that cattle are not inherently bad for the Earth. The impact of grazing can be either negative or positive, depending on how livestock are managed. In fact, with proper oversight

livestock can actually play an essential role in maintaining grassland ecosystems by performing the same functions as the natural herbivores that once roamed and grazed there. She shows how dispersed, grass-based, smaller-scale farms can and should become the basis for American food production. And while no single book could definitively answer the thorny question of how to feed the Earth's growing population, *Defending Beef* makes the case that, whatever the world's future food system looks like, livestock can and must be part of the solution.

***'A book for children from 8 to 80. I love the humanity of this story and how one man's efforts can change the future for so many. It's a real message of hope.'* Michael Morpurgo Discover this beloved masterpiece of nature writing that is a hymn to creation and to the power of the individual to do their bit to change the world for the better. In 1910, while hiking through the wild lavender in a wind-swept, desolate valley in Provence, a man comes across a shepherd called Elzéard Bouffier. Staying with him, he watches Elzéard sorting and then planting hundreds of acorns as he walks through the wilderness. Ten years later, after surviving the First World War, he visits the shepherd again and sees the young forest he has created spreading slowly over the valley. Elzéard's solitary, silent work continues and the narrator returns year after year to see the miracle he is gradually creating: a verdant, green landscape that is a testament to one man's creative instinct. A beautiful story of hope, survival and selflessness, *The Man Who Planted Trees* resonates as strongly with readers today as when it was first**

Part memoir and part investigative report, *Eating Animals* is the groundbreaking moral examination of vegetarianism, farming, and the food we eat every day that inspired the documentary of the same name. Bestselling author Jonathan Safran Foer spent much of his life oscillating between enthusiastic carnivore and occasional vegetarian. For years he was content to live with uncertainty about his own dietary choices but once he started a family, the moral dimensions of food became increasingly important. Faced with the prospect of being unable to explain why we eat some animals and not others, Foer set out to explore the origins of many eating traditions and the fictions involved with creating them. Traveling to the darkest corners of our dining habits, Foer raises the unspoken question behind every fish we eat, every chicken we fry, and every burger we grill. Part memoir and part investigative report, *Eating Animals* is a book that, in the words of the *Los Angeles Times*, places Jonathan Safran Foer "at the table with our greatest philosophers" -and a must-read for anyone who cares about building a more humane and healthy world.

L'appello alla religione per legittimare la violenza e i conflitti ha

attraversato e attraversa ancora il mondo contemporaneo e le società secolarizzate. Per le confessioni tradizionali e per le cosiddette religioni politiche moderne ciò ha significato fare ricorso ad alcuni dispositivi retorici che già in passato sono stati associati alla sacralizzazione della violenza: la guerra santa, il martirio, il sacrificio. Sulla base di alcuni casi di studio che ruotano attorno a queste “figure del sacro” in diversi contesti religiosi e culturali, dall’Europa all’Estremo Oriente, il volume offre un contributo alla comprensione delle articolazioni assunte dal nesso tra religione e violenza negli ultimi due secoli.

Dorothy Parker captured early twentieth century American society like no one else could. She was a masterful observer of character, a witty, sharply exact composer of dialogue and a poignant reader of the subtleties of relationship. In these five stories, of relationships strained by ill-will, social distance or circumstance, all her strengths are clear.

Human ecology - the study and practice of relationships between the natural and the social environment - has gained prominence as scholars seek more effectively to engage with pressing global concerns. In the past seventy years most human ecology has skirted the fringes of geography, sociology and biology. This volume pioneers radical new directions. In particular, it explores the power of indigenous and traditional peoples' epistemologies both to critique and to complement insights

from modernity and postmodernity. Aimed at an international readership, its contributors show that an inter-cultural and transdisciplinary approach is required. The demands of our era require a scholarship of ontological depth: an approach that can not just debate issues, but also address questions of practice and meaning. Organized into three sections - Head, Heart and Hand - this volume covers the following key research areas: Theories of Human Ecology Indigenous and Wisdom Traditions Eco-spiritual Epistemologies and Ontology Research practice in Human Ecology The researcher-researched relationship Research priorities for a holistic world With the study of human ecology becoming increasingly imperative, this comprehensive volume will be a valuable addition for classroom use.

This ground-breaking work, voted one of the top ten books of 2010 by VegNews Magazine, offers an absorbing look at why and how humans can so wholeheartedly devote ourselves to certain animals and then allow others to suffer needlessly, especially those slaughtered for our consumption. Social psychologist Melanie Joy explores the many ways we numb ourselves and disconnect from our natural empathy for farmed animals. She coins the term "carnism" to describe the belief system that has conditioned us to eat certain

animals and not others. In *Why We Love Dogs, Eat Pigs, and Wear Cows* Joy investigates factory farming, exposing how cruelly the animals are treated, the hazards that meatpacking workers face, and the environmental impact of raising 10 billion animals for food each year. Controversial and challenging, this book will change the way you think about food forever.

Johan Galtung and Daisaku Ikeda are two major figures in international peace studies. Ikeda is a leading Buddhist, author and educator and is deeply rooted in the Mahayana Buddhism of Nichiren. Galtung is the founder of the Institute for Peace Research in Oslo and has developed a more general Buddhist orientation. Together, through dialogue, they search for ways of interfacing Buddhism and peace. Presented as a dialogue between the two men, *Choose Peace* explores practical solutions to many of the global problems afflicting the world today. Galtung and Ikeda identify sources of violence and unrest and consider the role of Buddhism in formulating peaceful solutions to violence. The implications of political forces such as nationalism and socialism are considered and the role of human rights, grassroots power and the United Nations in peacekeeping initiatives are explored.

In this 2002 book, Anna Elisabetta Galeotti examines the most intractable problems which toleration encounters and argues that what is really at stake is not religious or moral disagreement but the unequal status of different social groups. Liberal theories of toleration fail to grasp this and consequently come up with normative solutions that are inadequate when confronted with controversial cases. Galeotti proposes, as an alternative, toleration as recognition, which addresses the problem of according equal respect to groups as well as equal liberty to individuals. She offers an interpretation that is both a revision and an expansion of liberal theory, in which toleration constitutes an important component not only of a theory of justice, but also of the politics of identity. Her study will appeal to a

When the Pacific Coast League was founded in 1903, the Portland Beavers—then known as the Browns—played in the circuit's first game, a 3–1 road loss to the San Francisco Stars. When the PCL celebrated its centennial season in 2003, Portland was the only city in the league to have been there at the start. The team's alumni include Satchel Paige, Lou Piniella, and Louis Tiant, but even more familiar to Portland fans are players like Eddie Basinski, Roy Hesler, and Bernardo Brito, who spent much of their careers with the Beavers...and groundskeeper Rocky Benevento and broadcaster Rollie Truitt, who each spent over three decades with the ball club. The Portland Beavers samples the first century of the team's history: Walter McCredie's teams that won five pennants from 1906 to 1914; the championship clubs of 1932 and 1936; the last-to-first climb that ended with a PCL title in 1945; the 1983 pennant that came between the team's two departures from Portland; and the return in 2001 that re-

In this thought-provoking book, Tobias Leenaert leaves well-trodden animal advocacy paths and takes a fresh look at the strategies, objectives, and communication of the vegan and animal rights movement. He argues that, given our present situation, with entire societies dependent on using animals, we need a very pragmatic approach. How to Create a Vegan World contains many valuable ideas and insights for both budding advocates for animals and seasoned activists, organizational leaders, and even entrepreneurs.

Animal Philosophy is the first text to look at the place and treatment of animals in Continental thought. In his new book Michel Odent shows how farming and childbirth have been industrialized side by side during the 20th century - with dramatic and disturbing consequences. The similarities are striking. In both cases innovations have been presented as the long awaited solution to an old problem: the advent of powerful synthetic insecticides has, overnight, dramatically reduced the costs and increased agricultural productivity; the advent of the modern safe technique of caesarean section has offered serious new reasons to create gigantic obstetrical departments. In both spheres a small number of skeptics voiced doubts and fears concerning

the negative long-term consequences of the widespread use of novel, little tested practices; although these repeated warnings initially went unheeded, they have motivated the development of "alternative" approaches and movements. At the turn of the new century the history of industrialized farming has suddenly speeded up. A collective global awareness has been sparked by a series of disasters, particularly "mad cow" and foot and mouth diseases. Industrialized childbirth has not yet reached the same phase of its history, but the parallels between these two industries suggest that there is more to link the farmer and the obstetrician than we had all realized..

Asked to head up Robert F. Kennedy Jr.'s environmental organization's "hog campaign," Nicolette Hahn Niman embarked upon a fascinating odyssey through the inner workings of the "factory farm" industry. What she discovered transformed her into an intrepid environmental lawyer determined to lock horns with the big business farming establishment. She even, unexpectedly, found love along the way. A searing account of an industry gone awry and one woman's passionate fight to remedy it, Righteous Porkchop chronicles Niman's investigation and her determination to organize a national reform movement to fight the shocking practices of industrial animal operations.
