The First Astronomers is the first book to reveal the rich knowledge of the stars and the planets held by First Peoples around the world. Our eyes have been drawn away from the skies to our screens. We no longer look to the stars to forecast the weather, predict the seasons or plant our gardens. Most of us cannot even see the Milky Way. But First Nations Elders around the world still maintain this knowledge, and there is much we can learn from them. These Elders are expert observers of the stars. They teach that everything on the land is reflected in the sky, and everything in the sky is reflected on the land. How does this work, and how can

Coyote Peterson has had over the course of his travels. The stories begin with his first snapping turtle catch as a kid and lead down a trail of incredible moments he and his camera crew have had while filming their Brave Wilderness shows.

From a giant alligator that nearly caught Coyote in its bone crushing jaws, to an 800 pound Grizzly Bear that helped him teach the audience what to do and NOT do if you ever encounter one of these enormous predators in the wild, every tale is laced with fast paced action and daring adventure. With the presence of danger often looming for Coyote, each story reminds the reader that animals rule the wild places of this planet, and if we

respect them from a safe distance, even the most frightening creatures are more likely to be afraid of us than we should ever be of them.

Exciting animal stories for kids of all ages: This collection of short stories aims to give the reader a first-person perspective into some of Coyote's most harrowing and heartwarming adventures.
