From a small town in Southeast Oklahoma I learned how to be real good at two things Cooking Methamphetamines and Playing "games" with God. Then one day my life changed forever! I went from cooking meth that day to on life support that night. While on life support God allowed me to see a vision that I was in Hell. Spiritually I walked in hell and I had physical medical proof of everything I experienced. Some people may think that I'm crazy but I know what I experienced was real enough I never Cooked Meth again. Not only was I involved in Meth, my world consisted of a whole lot of chaos- Alcoholism-Domestic Violence-Racism- the list goes on... Today I love the Lord! I'm not perfect but I'm sure not who I used to be! My prayer is that this book will touch your heart and if there's any doubt weather Hell is real this changes your mind! Don't let your time run out- JESUS IS COMING SOON- If YOU DIED TODAY IS IT HEAVEN OR HELL FOR YOU?

The sensational German bestseller on the overwhelming role of drug-taking in the Third Reich, from Hitler to housewives. Bursting with interesting facts' Vice Extremely interesting ... a serious piece of scholarship, very well researched' Ian Kershaw The Nazis presented themselves as warriors against moral degeneracy. Yet, as Norman Ohler's gripping bestseller reveals, the entire Third Reich was permeated with drugs: cocaine, heroin, morphine and, most of all, methamphetamines, or crystal meth, used by everyone from factory workers to housewives, and crucial to troops' resilience - even partly explaining German victory in 1940. The promiscuous use of drugs at the very highest levels also impaired and confused decision-making, with Hitler and his entourage taking refuge in potentially lethal cocktails of stimulants administered by the physician Dr Morell as the war turned against Germany. While drugs cannot on their own explain the events of the Second World War or its outcome, Ohler shows, they change our understanding of it. Blitized forms a crucial missing piece of the story.

A groundbreaking guide for women of all ages that shows their natural moodiness is a strength, not a weakness!As women, we learn from an early age that our moods are a problem, an annoyance to be stuffed away. But our bodies are wiser than we imagine. Moods are a finely tuned feedback system that allows us to be more empathic, intuitive, and aware of our own capabilities. If we deny our emotionality, we deny the breadth of our talents. Yet millions of American women are medicating away their emotions with psychiatric drugs whose effects are more far-reaching than most of us realize.

And even if we don't pop a pill, women everywhere are numbing their emotions with food, alcohol, and a host of addictive behaviors that deny the wisdom of our bodies and keep us from addressing the real issues we face. Psychiatrist Julie Holland knows there is a better way. In Moody Bitches, she shares insider information about the drugs we're being offered and the direct link between food and mood, and she offers practical advice on sex, exercise, and sleep strategies, as well as some surprisingly effective natural therapies. In the tradition of Our Bodies, Our Selves, this groundbreaking guide will forge a much needed new path in women's health—and offer women invaluable information on how to live better, and be more balanced, at every stage of life.

Translated from the Coptic, Pig Latin, Aramaic and Greek by Yq Cuartz, "The Song Itself" is the memoir of a nameless and sexless messenger whose memory and world are set ablaze by contact with an ancient Gnostic codex. After witnessing the aftermath of a brutal murder ignited by the codex, the protagonist must face a cult of arson-loving linguists, a luthier-psychomp, an Egyptian alchemist and a Dionysian ghost. Religious, mystical and philosophical elements burn in dreams, conversations and events while the narrator seems to be withholding a ghostly truth. Sacreligious and controversial, "The Song Itself" is a caffeine ingesting, chain smoking tour through an absurd world that is about to explode into flames.

Join the Creatures in side the smoke filled rooms and through the colors of insanity to find some Meth Smoke Monsters. A collection of intriguing looking characters that should make you think twice before using Meth. I had the genius idea to take pictures of the smoke because of the lighting in the room at the time of smoking. When i had that film developed i saw alot of ugly faces in the smoke. Not all pictures had faces in them. But most of them did and it was "on" from that point to take pictures whenever i smoked. That was a long time ago. I have lots of pictures to choose from. Literally thousands of shots. I started to change the light bulbs i was using to get the smoke to change colors. Then the backgrounds changed also. I came up with some great interesting shots. I have put a lot of good ones together and here you have the results of my efforts. Along with the pictures i put together some short stories and or poems to read. Some of them are motivational and maybe the right story for someone out there struggling with addiction. I hope this book does somebody some good. Maybe, maybe not. Either way some stories you will find completely unrelated to the picture its next to. These are more like embellished riddles that will entertain the mind. But i will tell you they all have a special theme or subject that motivates me. Maybe some people out there can identify and relate to what it is i am trying to get across to you. Other writings i am straight out to confuse the reader and question their own mind to see if i am crazy or not. You decide. In conclusion and keen eyesight for the future enjoy the book and lets see if we need to watch out in the blackout.

The supernatural has this in common with nature: you may drive it out with a pitchfork, but it will constantly come running back. At a time when science and technology are proving ambivalent in their effects and institutionalized religion is weakened by self-inflicted wounds, interest in its manifestations is insatiable. This sweeping anthology presents material in which, touchingly, eerily or bizarrely, the supernatural and the natural meet and ignite, illuminating our deepest anxieties, frailties, and hopes. While chiefly concerned with specific instances, it gives due weight to the views of philosophers and fanatics, of men of letters and the man in the street, and of lovers and lost souls. Mixing what is advanced as fact with what is offered as fiction, it takes in hauntings both malignant and benign, magic, vampires and other popular monsters, witches and fairies, the devil seeking whom he may devour, sex and the supernatural, dreams and coincidences, daemonic influences in art, comedies of the occult, near-death, experiences and after-death expectations. The closing section sums up the war between believers and disbelievers and touches on the processes of reading and of writing about the subject. Testimonies cited are ancient and modern, drawn from East and West, from Christian, Islamic, and Buddhist sources, and range from Homer to Hardy, Pliny to Primo Levi, Apuleius to A. S. Byatt, through Rabelais, Shakespeare, Johnson, Goethe, Dickens, George Eliot, Flaubert, Kipling, Yeats, Rebecca West, and many others, including some who, like Browning's medium, Mr Sludge, find a little cheating comparable to the china egg that prompts a hen to lay a real one. For fervent believers andsceptics alike, there can be no more magical compendium than this.

If you're going to have a life worth living, you're going to have to walk through some pain... I wrote this book for YOU, the hopeless one in a hotel room who wants to end your life. I wrote this for YOU, the drug addict that wants to give up because you can't overcome the addictions. I wrote this for YOU, the one who thinks the world is out to get you because of the life you were handed. Rejection, addiction, emptiness, brokenness, and hopelessness can destroy our lives. I know this because I was broken beyond hope, but today I am victorious! This is my journey from meth to ministry. If God can transform a life like mine, He can do it for you no matter what your story is. You just have to surrender. You have to choose to trust in the midst of the pain. I am crazy enough to believe that by you reading this book, God can grab ahold of your heart and remind you that you are loved, valued and believed in. I believe that you will start to see that God has a plan and your story isn't over. It is just about to start. If He did it for me, He can do it for you. It is my prayer that one day you too will be able to say, "It is worth the pain." And I promise, the life God has for you, it is Worth the Pain

The four plays that make up this collection Thabo Mbeki and Other Nightmares by Tsepo wa-Mamatu; Circles by Tau Maserumule; Comrade Babble by Allan Kolski Horwitz; My Life in the Bush of Ghosts by Lesego Rampolokeng/Liepollo Rantekoa, Stacy Hardy and Jaco Bouwer; The Life and Times of Brett Kebble by Patrick Bond, have, as a linking thread, their confrontation with the ongoing corruption and mismanagement that characterizes the not-so-new liberated South Africa. Stylistically quite different, each breaks new ground in presenting these debilitating features and while tackling political themes head-on, never degenerates into mere sloganeering or counter-propaganda. Indeed, they take contemporary South African playwrighting to new heights of 'committed theatre'.

Here's a book of four intriguing short stories entwined with threads of chance and probability. Set in Mumbai, these takes are a heady mix of facts and fantasies. Filled with abstract concepts and unrivaled in content, each short story deals with timely coincidences and untimely encounters. A herpetologist who explores the therapeutic effects of snake venom is drawn into a roller coaster ride when his friend accidentally walks into the aftermath of a drug deal gone askew. A local drug lord and his aide hunt for a cocaine deal worth many crores while their real intention is to cause mayhem in New York by detonating dirty bombs. An honest police officer heading the Anti-Narcotics Cell refuses to swallow the karma pill as he fights and suffers from a rare insidious disease which affects his voluntary muscle movements. And, in the exclusive first story, a maverick scientist, inspired by the idea of projecting thoughts as images, creates an improved version of Tesla's theoretical thought camera. Later, he curses himself for being in the wrong place at the wrong time when a wealthy liquor baron urges him to recreate his remarkable invention and drags him to a world where immortality and wickedness are the unwritten norms. So do you want to struggle into the boring world of determinism or do you want to plunge into the rough seas of randomness and chaos?
