Repair and Score Increase Tactics Includes real credit letters and disputes as always. There's no need to hire attorneys or credit repair firms. All they do is send out a templated letter anyways, and creditors get those all the time...BIG DEAL. When the actual DEBTOR (You) sends a serious letter...whoa, watch out..Consumer Laws being brandished on the collector/creditor!! They don't like that and will do whatever necessary to get rid of you fast, if you reach the right person and say the right things. These proven strategies can work for anyone. This book will show you how to take action and restore or improve your credit. When doing credit repair...you want your negative information DELETED, do not settle for any other status. Let's face the facts here, without good credit you spend A LOT more money on things like mortgages, car loans, INSURANCE and cell phone plans. Even

healthcare can cost a lot more. And let's not forget that nowadays employers usually will check your credit to ensure you aren't a financial risk to them. If your credit sucks, and it's a job you really want, how awful would that be if you get passed over because of your credit score or credit report?

Having a low credit score can be very expensive and cause you to miss out on opportunities. In my case, I was trying to refinance my \$300,000 mortgage. My credit score was 620 because I had some negative items on my credit that I wasn't aware of, and extra debt on my credit cards that I could not afford to pay off. I was quoted an interest rate of 6.25% because of my low credit score. Instead of taking the loan, I repaired my credit by removing the incorrect items and paid down some of the debt on my credit cards. I waited a month, and my credit score jumped to 725. I reapplied for the loan and got a quote of 4.5%. If you have one mortgage, buy 3 cars over the 30 year period, and carry \$10,000 credit card debt over the 30 year period, you will spend an extra \$238,500 on additional interest, or another way to look at it, you will throw away \$238,500 to have the same things had you not maintained a healthy credit history and score. If you need to increase your credit score to move into a new apartment, house, buy a car, or get loans for business. This book has a complete game plan on how to get started and get the end results you're looking for. If you're in a bind and need quick results, this book will show you how to increase your credit score in hours! This book will teach you the fundamentals of credit repair, how the credit system works, and how to maximize your credit benefits. Plus, we offer recommendations on how to develop a monthly cash flow system that can generate thousands of dollars per month and use your credit cards to buy real assets like real

estate. This credit guide will teach you how to make money with your credit like a professional investor and help you build new streams of income. Success is learnable, follow the strategies in this book, and open yourself to a new world of opportunities. "Dr. Ernesto Martinez offers a wealth of advice and information that any consumer would do well to follow and implement. I highly recommend this book for anyone interested in fixing their finances and generating new forms of income." Justin Degeneffe, Credit Counselor

**Are you looking for a guide to fix your personal credit? Then keep reading... Having bad credit affects not just what you want now, but also what you can have in years to come. Your credit score will affect everything from hire purchasing to getting a mortgage. That is why it is vital you keep any good credit that you have and keep the bad credit ratings away. Bad credit ratings generally come from missed payments on things such as loans, mortgages, and credit card payments. To sum it all up, bad credit comes from any time that you do not pay back any money that you have borrowed from banks, building societies or other lenders. But just imagine, if you were in the prime sector of ratings you may not drop any points whatsoever. That might not sound fair, but it is true. Also, there is no way to know for sure how many points you will drop for missing payments. It is completely unpredictable, and you never know exactly what is happening. This book covers the following topics: Basics of credit repair Is credit repair ethical? Self-credit repair step The debt snowball What is section 609 General advice to see success with 609 How to proceed with the letters The templates you need (609 letter) How to boost your credit score 100+ points? How to find credit cards with guaranteed approval? What the credit bureaus and the lawyers do not want you to know How credit scores are calculated Right mindset for credit management And Much More! Credit company bosses are getting fat on the profits you give them in interest payments each month. Do not let that happen! That is why you should never have more debt than a quarter of what you earn per year. This way you can be sure you can make the payments on time. Other than a mortgage or maybe a business loan, you should never get yourself into any more debt for whatever reason. Remember: Any such debit will hang around your neck for months, maybe even years. If you need to build up credit because you do not have any or because you have extremely bad credit, then you need a plan to get back on the right track. Pretty much everything you do in your life affects your credit rating, even things that you would never imagine If you have no credit but you manage to get a credit card, do you think it is better to pay the balance all off at once every month, or pay it off in installments? Many people would say pay it off every month. After all, that way you have no debt, pay no interest, and establish yourself as a reliable person, right? But think about it: If you pay it off in full every month you are effectively not borrowing any money; therefore, you do not have any score on your credit rating. If you pay the debt off in installments you are building up your good credit rating-provided you make the minimum payment on time. Ready to get started? Click "Buy Now"!**

Living with bad credit in America today is possible, but it's tough. Bad credit makes many things difficult, impossible, or more expensive. For example, did you know insurance companies often charge a higher interest rate for drivers that have bad credit scores? If you're getting new utilities turned on in your name, the company will check your credit to decide whether you should pay a security deposit.<sup>1</sup> We all know that banks check credit scores before they give you a credit card or a loan. As years go by, the list of companies who check your credit will probably grow instead of shrink. Why Pursue Credit Repair Credit repair is critical to saving money on insurance, loans, and credit cards, but that's not the only reason to repair your credit. A better credit score opens up new employment opportunities, even promotions and raises with your current employer. If you dream of starting your own business or just want the security of knowing you can borrow money when you want to, you should repair your credit sooner rather than later.

Picture this: You hear your phone ring. You check to see who's calling but you notice it is an unknown number so you let it go into voicemail. A few minutes later, you check the person's message only to find out that it is another bill collector. Then you block the number, not because you don't want to talk to the collector, but because you want to pay your bills and you don't have the money to pay all your credit cards. This is a story many people around the world can relate to. Some have withdrawn or used too many credit cards and are now struggling to make minimum payments. It's not that they don't want to make the payments, but they just can't pay them. ? If this story sounds familiar, Credit Repair Secrets is a book to read! ?
