DIY FREE Credit Repair & Restore Understanding & Repairing Credit the Safe and Legal Way. Know Your Rights, Delete Negative Items, 12 Step FICO Score Boosting Easy To Follow Process If anyone tells you that there is a way to repair your credit and delete all negative items in just 30 days, don't walk away but run away. Remember if it is too good to be true, it probably is right? There is a set procedure that all big three credit reporting agencies follow, and that procedure has a time frame, which is longer than 30 days, I can assure you that much. I have been working in the credit industry for last 28 years, and I have heard, seen, tried and done it all. But don't get me wrong, there is a rather simple process that anyone can follow and see an amazing result along with a huge boost in their credit score. Though it is not a yearlong process, but it is more than 30 days. Depending on your credit analysis, it may take you anywhere from 60-120 days to see some real results. The process I outlined in this book is 100% legal, within the federal fair credit laws and the results are exactly what you get if you hire an expensive attorney. In this book, that is exactly what I show you; I help you understand the process, the inner workings of all three agencies and their SOP (standard operating procedure). I take you step-by-step, guiding you from the recognition of errors and inaccuracies. You'll be surprised at what constitutes an error. I walk you through the dispute process, from how to dispute, advising you of your rights and responsibilities. The way this simple process works is first you analyze your credit report, identifying the errors, inaccuracies, and information and all other negative items. Next, you follow the simple dispute process which can be done either online or via a letter sent by U.S. mail. Once you are done these two steps, next, you follow up with them to make sure those disputes are removed from your report. I attached all the letters that you can just copy and put your name and other information and send them. Next, I show you how you can boost your credit score right now - without waiting for the completion of the process. Which can actually take place simultaneously as you wait for those negative items to disappear. But what good does it do if you repair your credit but don't change your fundamental relationship to money or financial obligations? You will end up right where you started, and in need of another lengthy process of credit repair again. I am sure we all have a love-hate affair with money and credit, I think it is vital to understand the nuts and bolts of the credit industry, especially the role of the credit bureaus, analyzing the five basic categories of your credit report. Finally, I will show you how these categories are weighted in order to create your score. So you can achieve the dream score you always wanted. This is a credit repair book for everyone, whether your score is low because of your poor relationship with money, your indiscretions of your younger years, unexpected medical costs, judgment, lien, foreclosure, bankruptcy, charge offs, late payments or just not having enough money to live on for years. Isn't it about time you get the credit you deserve?

The dividing line between getting approved or declined for credit is clearly measured by one important thing: your credit score. In today's lending system, the significance of your credit score has increased because of the convenience offered by technology. Now, it takes only a few seconds for a credit application to be approved or to be declined. However, like in all organized societies, not everyone is endowed with the same credit score. Within the lines that divide economic and social classes, differences in credit scores arise. These are the essential questions answered in this book. As you go through the simplified discussions, you will realize that the very first thing an individual needs to have to repair his credit is willingness to do so. Without willingness, change will not progress. The next thing is the proper information. Credit repair is well-ingrained in the financial side of things, and a lot of concepts need to be simplified so that ordinary people will understand what they mean. What follows after proper information is assessment of the individual's financial condition and identifying the tools he has so he can start the journey towards recovery.
