Research Methods for Criminal Justice and Criminology 3e is about how to do research and investigate various types of research questions that arise in criminology and criminal justice. A complete discussion of research ethics—including ethical issues relating to the Nuremberg Code, research sponsorship, rights of human subjects and deception — helps readers understand their ethical responsibilities as researchers. This book explores the entire criminal justices and criminology research process from beginning to end including: sampling procedures; data collection techniques; measurement, validity and reliability issues; the role of ethics in the research process; and writing and documenting research papers. Presents a practical guide for conducting research in criminal justice and criminology careers.

This edited book promotes and facilitates cybercrime research by providing a cutting-edge collection of perspectives on the critical usage of online data across platforms, as well as the implementation of both traditional and innovative analysis methods. The accessibility, variety and wealth of data available online presents substantial opportunities for researchers from different disciplines to study cybercrimes and, more generally, human behavior in cyberspace. The unique and dynamic characteristics of cyberspace often demand cross-disciplinary and cross-national research endeavors, but disciplinary, cultural and legal differences can hinder the

ability of researchers to collaborate. This work also provides a review of the ethics associated with the use of online data sources across the globe. The authors are drawn from multiple disciplines and nations, providing unique insights into the value and challenges evident in online data use for cybercrime scholarship. It is a key text for researchers at the upper undergraduate level and above.

Prisons are everywhere. Yet they are not everywhere alike. How can we explain the differences in cross-national uses of incarceration? *The Politics of Punishment* explores this question by undertaking a comparative sociological analysis of penal politics and imprisonment in Ireland and Scotland. Using archives and oral history, this book shows that divergences in the uses of imprisonment result from the distinctive features of a nation's political culture: the different political ideas, cultural values and social anxieties that shape prison policymaking. Political culture thus connects large-scale social phenomena to actual carceral outcomes, illuminating the forces that support and perpetuate cross-national penal differences. The work therefore offers a new framework for the comparative study of penality. This is also an important work of sociology and history. By closely tracking how and why the politics of punishment evolved and adapted over time, we also yield rich and compelling new accounts of both Irish and Scottish penal cultures from 1970 to the 1990s. *The Politics of Punishment* will be essential reading for students and academics interested in the sociology of punishment, comparative penology, criminology, penal policymaking, law

Wisconsin-Milwaukee Research Methods in Criminal Justice and Criminology connects key concepts to real field research and practices using contemporary examples and recurring case studies that demonstrate how concepts relate to students' lives. Authors Callie M. Rennison and Timothy C. Hart introduce practical research strategies used in criminal justice to show students how a research question can become a policy that changes or influences criminal justice practices. The book's student-driven approach addresses both the why and the how as it covers the research process and focuses on the practical application of data collection and analysis. By demonstrating the variety of ways research can be used and reinforcing the need to discern quality research, the book prepares students to become critical consumers and ethical producers of research.

*This remarkable guide to delinquency studies was co-winner of the 1968 C. Wright Mills Award for the best book in the field of social problems. The work is in effect three books in one: a forthright account of how to analyze survey data, a penetrating critique of delinquency research, and a set of original essays on methodology. It is a landmark work that continues to serve as an essential tool for those who both study and want to learn about deviance. In the new introduction, Travis Hirschi describes the setting in which 'Delinquency Research' was written, noting that it exudes a confident optimism that well-conducted research and analysis will quickly lead to important advances in the field.*

*Hirschi maintains that twenty-eight years after 'Delinquency Research' was first published the validity of its optimistic view has been confirmed by the fact that the field of criminology is among the leading producers of high quality research. As a result, we know more about crime and delinquency than ever before. 'Delinquency Research' forms the basis for present and future studies of criminology and is a necessary addition to the libraries of sociologists, criminologists, scholars in the area of delinquency, and students interested in research methods.*

Statistics for Criminal Justice and Criminology in Practice and Research is an engaging and comprehensive introduction to the study of basic statistics for students pursuing careers as practitioners or researchers in both Criminal Justice and Criminology programs. This student-friendly text shows how to calculate a variety of descriptive and inferential statistics, recognize which statistics are appropriate for particular data analysis situations, and perform hypothesis tests using inferential statistics. But it is much more than a "cook book." It encourages readers to think critically about the strengths and limitations of the statistics they are calculating, as well as how they may be misapplied and misleading. Examples of statistics and statistical analyses are drawn from the worlds of the practitioner as well as the policymaker and researcher. Students will also gain a clear understanding of major ethical issues in conducting statistical analyses and reporting results, as well as insight into the realities of the life of researchers and practitioners as they use statistics and statistical analyses in their day-to-day activities.

potential for new graphic approaches to collect, analyze, and present data; and provides some analysis of the use of images in teaching, to spur social critique, and guide policy translation. The collection visually connects theory and practice by highlighting the work of criminologists who have embraced the visual turn. Contributors explore the use of cognitive maps, concept and mind maps, life history calendars, CCTV, life plots, GIS and hot spot research, policy graphs, visual abstracts and research summaries, and other visual tools in the context of criminology. Approaches building on visual sociology are also featured, including a discussion of developments in documentary photography and film, visual ethnography, and sensory phenomenology. The book is organized thematically, with each chapter following logically upon the last, introducing readers to a variety of visual approaches and their application in criminology. The goals of this collected volume are three-fold. The first is to highlight how the visual has been used in criminology historically to present data, contest meaning and complicate social control, and make more transparent the research process. The second is to work toward some sort of definitional consistency. While a worthy endeavor, this remains elusive given the assortment of uses and varying traditions from which visual criminology has emerged. The third is to try to think clearly about the role of humility. This means a willingness to acknowledge an epistemological framework and note the variety of limitations associated with trying to understand in deep and meaningful ways. For visual criminology specifically, it involves the recognition that part of the power of images (whatever their construction), comes from whether we think they are beautiful or whether and/or to what extent they disrupt our understanding in one way or another.

Some jurisdictions have elaborate constitutional and legal structures for pardoning or commuting a sentence while virtually never doing so, while others have little formal process and yet grant clemency frequently. Using examples from Asia, Europe, Latin America, the Caribbean, and the USA, this comparative analysis of the law and the practice of clemency sheds light on a frequently misunderstood executive power. This book builds on existing academic scholarship and expands the limited geographical scope of prior research, which has tended to focus on North America, the UK, and Australia. It relays the latest state of knowledge on the topic and employs case studies, doctrinal legal analysis, historical research, and statements by clemency decision-making authorities, in explaining why clemency varies so considerably across global legal and political systems. ***Criminology has experienced tremendous growth over the last few decades, evident, in part, by the widespread popularity and increased enrollment in criminology and criminal justice departments at the undergraduate and graduate levels across the U.S. and internationally. Evolutionary paradigmatic shift has accompanied this surge in definitional, disciplinary and pragmatic terms. Though long identified as a leading sociological specialty area, criminology has emerged as a stand-alone discipline in its own right, one that continues to grow and is clearly here to stay. Criminology, today, remains inherently theoretical but is also far more applied in focus and thus more connected to the academic and practitioner concerns of criminal justice and related professional service fields. Contemporary criminology is also increasingly interdisciplinary and thus features a broad variety of ideological orientations to and perspectives on the causes, effects and responses to crime. 21st Century Criminology:***

***Criminology is a booming discipline, yet one which can appear divided and fractious. In this rich and diverse collection of 34 essays, some of the worlds leading criminologists respond to a series of questions designed to investigate the state, impact and future challenges of the discipline: What is criminology for? What is the impact of criminology? How should criminology be done? What are the key issues and debates in criminology today? What challenges does the discipline of criminology face? How has criminology as a discipline changed over the last few decades? The resulting essays identify a series of intellectual, methodological and ideological borders. Borders, in criminology as elsewhere, are policed, yet they are also frequently transgressed; criminologists can and do move across them to plunder, admire, or learn from other regions. While some boundaries may be more difficult or dangerous to cross than others it is rare to find an entirely secluded locale or community. In traversing ideological, political, geographical and disciplinary borders, criminologists bring training, tools and concepts, as well as key texts to share with foreigners. From such***

Research Methods in Crime and Justice, 2nd Edition, is an innovative text/online hybrid for undergraduate Criminal Justice Research Methods courses. This material uniquely addresses the fundamental teaching issue for this course: how to show students that success as criminal justice practitioners is linked to their acquisition of research skills. Brian Withrow, a widely published academic researcher and former Texas State Trooper, developed this approach for his own undergraduate Research Methods class. He persuasively demonstrates that research skills aren't just essential to university academic researchers but to successful criminal justice practitioners as well. More than 80 short, sharply focused examples throughout the text rely on research that is conducted by, on behalf of, or relevant to criminal justice practitioners to engage students' interest like no other text of its kind. Extensive web materials all written by the author provide an array of instructor support material, including a Researcher's Notebook that provides students (and their instructors) with a series of structured exercises leading to the development of a valid research project. Withrow systematically walks students through defining a question, conducting a literature review, and designing a research method that provides the data necessary to answer the research question—all online, with minimal instructor supervision.
