Éif my present reader happens to be a Boy Scout or a scout-master who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot but where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to bind the joints with pliable roots, or cordage made of bark or withes; but as this is not will suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight polesNthat is, as straight as he can get. The poles should be about four and one half inches in diameter at their base and sixteen and one half feet long. After all the branches are trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed, they will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.

General Loring was one of many Confederate officers who after the close of the War of the Rebellion offered their services to foreign rulers. A number of these officers took their way to Egypt, and the author of this book was one of the most successful of them all. He was made Pasha by the Khedive, and he rendered that ruler honorable and efficient service. It was natural that Loring Pasha should have been led to give his Egyptian experiences durable shape, and his book gives a clear and agreeably written account of the country. Such a writer has much more authority than the mere traveler. General Loring lived long in the country, and in intimate relations with persons at the centre of affairs; being withal a man of thought and intelligence he could not, with his opportunities, fail to acquire and retain impressions and facts of interest and value.
