For the purpose of making easier transactions, the world, throughout history, has assigned pressed coins in old times to trade products and in present, printed currency was invented. However, this has increased the number of countries that are getting trapped into debt or for sure are facing difficulties in meeting the needs of their fiscal targets in modern era's functions of mass Demand and Supply on an international level. The trend towards a financial society that is more centralized has changed towards seeking decentralized money that could sidestep regulations of a specific nation towards the needs of international market. It is a system of payment that eliminates the requirement of a financial intermediary between two parties wanting to transmit money using the internet. It is a less costly method and at times, it's totally free. The transaction is kept unnamed as well. A man named Satoshi Nakamoto invented a new type of digital currency that could use the method of Peer-to-Peer (P2P) System, in 2008. This network itself is commonly referred as individual's network that is decentralized and these individuals don't need to know each other essentially. This system would allow the network that is decentralized, to work mutually cracking Algorithms by using high-powered rearranged Graphics Cards probably cracking a block that yielded the reward of cryptocurrency. Here Satoshi wanted to be the first one to crack and collect the profits of the famous "Genesis Block" in 2009. After his hard work and huge reward, a number of enthusiasts of computer hardware are attracted to it and are seeking to obtain a piece from this newly discovered digital gold pit for themselves.**
