These guidelines provide guidance on the diagnosis of human immunodeficiency virus (HIV) infection, the use of antiretroviral (ARV) drugs for treating and preventing HIV infection and the care of people living with HIV. They are structured along the continuum of HIV testing, prevention, treatment and care. This edition updates the 2013 consolidated guidelines on the use of antiretroviral drugs following an extensive review of evidence and consultations in mid-2015, shared at the end of 2015, and now published in full in 2016. It is being published in a changing global context for HIV and for health more broadly.

Most Federal employees work hard, and their performance is considered good or even exceptional. However, at times Federal supervisors are faced with employees whose performance is not acceptable. This purpose of this book, Addressing and Resolving Poor Performance: A Guide for Supervisors, is to help you address and resolve poor performance. This guidance should be used in concert with the technical advice you receive from your agency's human resources staff. You should also be aware that most agencies have specific procedures and requirements that must be followed, whether they are part of a negotiated bargaining agreement or other internal agency regulation. Addressing and resolving poor performance is a three-step process. These three steps are: 1) communicating expectations and performance problems; 2) providing an opportunity to improve; and 3) taking action. This booklet is organized accordingly into three steps. At the end of each section, you will find a checklist as well as answers to commonly asked questions. In the appendix, you will find samples of documents that can be used throughout this process. Dealing with performance problems is a real challenge for any supervisor. Experienced supervisors often say it is one of the toughest parts of their jobs. Nevertheless, it is a key supervisory responsibility, and failure to address poor performance can have a greater impact than you may appreciate. Some of the reasons supervisors often give for not addressing poor performance include: dealing with poor performance can be time consuming; if action is taken against an employee, it will lower morale among other employees and create a less productive work environment; telling employees that they are not performing satisfactorily is unpleasant and requires special human relations skills; the procedural steps involved in addressing poor performance are complex and highly technical; if a formal performance-based action is taken, it is likely to be appealed and ultimately overturned; and upper management will not support the action taken to address poor performance. The focus of this booklet is to help supervisors address and resolve poor performance. The best way for supervisors to handle poor performance issues is to take action to avoid performance problems before they occur.~

The U.S. Navy is ready to execute the Nation's tasks at sea, from prompt and sustained combat operations to every-day forward-presence, diplomacy and relief efforts. We operate worldwide, in space, cyberspace, and throughout the maritime domain. The U.S. Navy will remain a maritime nation, and our security and prosperity are inextricably linked to our ability to operate naval forces on, under and above the seas and oceans of the world. To that end, the Navy executes programs that enable our Sailors, Marines, and civilians to meet existing and emerging challenges at sea with confidence. Six priorities guide today's planning, programming, and budgeting decisions: (1) maintain a credible, modern, and survivable sea based strategic deterrent; (2) sustain forward presence, distributed operations, and sea control; (3) develop the capability and capacity to win decisively; (4) focus on critical afloat and ashore readiness to ensure the Navy is adequately funded and ready; (5) enhance the Navy's asymmetric capabilities in the physical domains as well as in cyberspace, electromagnetic spectrum; and (6) sustain a relevant industrial base, particularly in shipbuilding.

A Child's Garden of Standards

A call for better child care policies, exploring the reasons why there has been so little headway on a problem that touches so many families. Working mothers are common in the United States. In over half of all two-parent families, both parents work, and women ' s paychecks on average make up 35 percent of their families ' incomes. Most of these families yearn for available and affordable child care—but although most developed countries offer state-funded child care, it remains scarce in the United States. And even in prosperous times, child care is rarely a priority for U.S. policy makers. In In Our Hands: The Struggle for U.S. Child Care Policy, Elizabeth Palley and Corey S. Shdaimah explore the reasons behind the relative paucity of U.S. child care and child care support. They examine the history of child care advocacy and legislation in the United States, from the Child Care Development Act of the 1970s that was vetoed by Nixon through the Obama administration ' s Child Care Development Block Grant. The book includes data from interviews with 23 prominent child care and early education advocates and researchers who have spent their careers seeking expansion of child care policy and funding and an examination of the legislative debates around key child care bills of the last half-century. Palley and Shdaimah analyze the special interest and niche groups that have formed around existing policy, arguing that such groups limit the possibility for debate around U.S. child care policy.
