Most young students of American culture believe many of the cultural assumptions they grow up with are universal. As insiders, speaking a common language, following the accepted patterns of behavior embedded in a particular way of life, most of us take our own social actions for granted, and it is a challenge to realize the strangeness and wonder of our own behaviors. The distinct aim of each edition of this popular classroom supplement has been to enable students to better understand themselves by casting American culture into sharper relief—offering other mirrors, other reflections. The latest edition's twenty-one personalized narratives, of which seven are new, unveil fresh portrayals of American culture. Each contribution offers unique ethnographic perspectives of various aspects of American culture that enable us to better understand ourselves.

The Eighth Edition has been thoroughly updated and reorganized to emphasize contemporary issues around social and economic inequality, gender identity, and more.

There is surprisingly little fieldwork done on the United States by anthropologists from abroad. America Observed fills that gap by bringing into greater focus empirical as well as theoretical implications of this phenomenon. Edited by Virginia Dominguez and Jasmin Habib, the essays collected here offer a critique of such an absence, exploring its likely reasons while also illustrating the advantages of studying fieldwork-based anthropological projects conducted by colleagues from outside the U.S. This volume contains an introduction written by the editors and fieldwork-based essays written by Helena Wulff, Jasmin Habib, Limor Darash, Ulf Hannerz, and Moshe Shokeid, and reflections on the broad issue written by Geoffrey White, Keiko Ikeda, and Jane Desmond. Suitable for introductory and mid-level anthropology courses, America Observed will also be useful for American Studies courses both in the U.S. and elsewhere.

At once a digital ethnography of smartphones and a classically conceived village-based ethnography, this book relocates the study of digital technologies to rural Melanesia, with a focus on the Lau of Malaita, Soloman Islands. In this 'technography', Geoffrey Hobbis studies the materiality and functional attributes of smartphones and their object biographies—modes of acquisition, maintenance, uses, limitations and the problems specific to this region in adopting and adapting smartphones in everyday life. As he examines the various uses of smartphones, as both telephone and multimedia device, Hobbis also explores the social and cultural transformations, the hopes and uncertainties, with which they are associated. Ultimately, in bringing together a study of digital technologies with classical anthropological theory, The Digitizing Family develops a theory of smartphones as kinship technologies and supercompositional objects.

CULTURAL ANTHROPOLOGY: AN APPLIED PERSPECTIVE, Canadian Edition, goes beyond providing a comprehensive overview of the discipline and fully integrates the application of the theories, insights, and methods of cultural anthropology to contemporary situations. The authors recognize that cultures—Canadian and abroad—are in a constant state of flux and are continually interacting with each other both locally and globally. To capture this dynamic and to enhance student learning and illustrate the relevance of cultural anthropology in our everyday lives, current topics include the growth of information technologies, innovations such as multi-sited field research, reflexive and intersubjective approaches, human relations with the environment, religious and political conflict, medical anthropology, climate change, international migration, urbanization, development, and business anthropology. Student engagement is reinforced with strong pedagogical features and themes that encourage readers to reflect and think critically about issues like community and social responsibility, economics, and the environment. MindTap, a fully online learning solution, combines all learning tools—readings, multimedia, activities, and assessments—into a single Learning Path that guides the student through the curriculum and brings anthropology to life!

On Being Different provides an up-to-date, comprehensive, and interdisciplinary account of diversity and multiculturalism in the United States and Canada. Kottak and Kozaitis

We live in a world of oppositional relationships and increasing in-group/out-group divisions. Christian sociologist Matthew Vos explains how the problem of the stranger lies at the root of many problems humanity faces, such as racism, sexism, and nationalism. He applies classic sociological theory on "the stranger" to matters of faith and social justice, showing that an identity in Christ frees us to love strangers as neighbors and friends. The book also includes two guest chapters, one on intersex persons and the church and one on stranger-making in the "correctional" system.

The most current and comprehensive Canadian introduction that shows students the relevance of anthropology in today's world. This streamlined second edition of Anthropology asks what it means to be human, incorporating answers from all four major subfields of anthropology - biological anthropology, archaeology, linguistic anthropology, and cultural anthropology - as well as applied anthropology. Reorganized to enhance accessibility, this engaging introduction continues to illuminate the major concepts in the field while helping students see the relevance of anthropology in today's world.

THE ESSENCE OF ANTHROPOLOGY features an experienced and diverse author team with expertise in all subfields of anthropology. With an eye to visual and written clarity, the authors present anthropology from an integrated, holistic perspective. They use three unifying themes as a framework to tie the book together and keep students focused: systemic adaptation to emphasize that every culture, past and present, is an integrated and dynamic system of adaptation; biocultural connections that highlight the integration of human culture and biology in the steps humans take to meet the challenges of survival; and the emergence of globalization and its disparate impact on peoples and cultures around the world. Pedagogical elements support these main themes and give deeper insight into the meaning and relevance of a wide range of topics covered in the general narrative by tying examples to behavior today. Insightful questions foster critical thinking, additional Visual Counterpoints widen the book's array of compare-and-contrast examples, and a new Digging into Anthropology feature provides a hands-on approach to anthropological methods by giving active learning opportunities related to each chapter's content. In addition, the authors have broadened viewpoints to offer explanations and examples from different points of view. Routledge Handbook of Critical Indigenous Studies

Written specifically for students, this ethnography provides an engaging, real-life account of the transition from a traditional to a modern culture. It uses vibrant, poignant stories and examples to connect developments among Gebusi to topics widely discussed in anthropology courses, including comparative aspect of subsistence, kinship, politics, religion, gender, ethnicity, nationalism, and applied anthropology. When first studied by Bruce Knauft, the Gebusi of Papua New Guinea conducted

ritual dances and spirit séances, practiced alternative sexual customs, and endured a high rate of violence. By the late 1990s, Gebusi had converted to Christianity and actively pursued market activity, schooling, government programs, sports leagues, and disco music. By 2008, however, their public services and cash economy had deteriorated, and Gebusi relied increasingly, once again, on indigenous customs and practices. Some aspects of change, however, remained enduring. More recently, problems of economic hardship have persisted—as has the resilience of Gebusi culture. This third edition of the The Gebusi has been updated and streamlined throughout and has new material as well as “Broader Connections” sections following each chapter.

This concise and accessible introduction establishes the relevance of cultural anthropology for the modern world through an integra

ethnographically informed approach. The book develops readers' understanding and engagement by addressing key issues such as: What it means to be human The key characteristics of culture as a concept Relocation and dislocation of peoples The conflict between political and ethnic boundaries The concept of economic anthropology Cultural Anthropology: 101 includes case studies from both classic and contemporary ethnography, as well as a comprehensive bibliography and index. It is an essential guide for students approaching this fascinating field of study in a new time.

In the Fourth Edition of *Cultures and Societies in a Changing World*, author Wendy Griswold illuminates how culture shapes our social lives and how society shapes culture. Through this book, students will gain an understanding of the sociology of culture and explore stories, ideas, art, religious practices, fashions, and rituals from a sociological perspective. Cultural examples from multiple countries and times will broaden students' global understanding. Students will develop a deeper appreciation of culture and society from this text, gleaned from a perspective that will help them overcome cultural misunderstandings, conflicts, and ignorance and that will help equip them to live their professional and personal lives as effective, wise citizens of the world.

Organized around anthropological questions, this contemporary text demonstrates how anthropological thinking can be used as a tool for deciphering everyday experiences. Designed to stimulate students' anthropological imaginations, this concise foundation of cultural anthropology can be enriched by the use of ethnographies, a reader, articles, field-based activities, and more.

Taking a unique, problem-based approach, the fourth Canadian edition of this text encourages students to apply a critical mindset to the concepts and methods outlined throughout the textbook. Each chapter is organized around an intellectual "problem" and then further developed into a series of questions that addresses them from an anthropological perspective. This approach, along with discussion of current and contemporary issues, encourages students to imagine what it is like to be an anthropologist in the field, bridging the gap between classroom and fieldwork.
