While cultural diversity and hybridity have often been celebrated, they also challenge traditional concepts of national and cultural identity OCo challenges which have caused considerable anxiety. Various disciplines have often investigated the impact of cultural hybridity, multiculture, and (post)colonialism in relative isolation and with a tendency towards over-theorization and loss of specificity. Greater interdisciplinary cooperation can counter this tendency and encourage sustained comparisons between different former empires and across language boundaries. This volume contributes to such developments by combining contributions from history, English and German studies, cultural geography, theatre studies, and film studies; by covering both the colonial and the postcolonial period; and by looking comparatively at two different (post)colonial contexts: the United Kingdom and Germany.The result is productive dialogue across the distinct colonial and migration histories of the UK and Germany, which brings out divergent concepts of cultural difference OCo but, importantly, without neglecting similarities and transnational developments. The interdisciplinary outlook extends beyond political definitions of identity and difference to include consumer culture, literature, film, and journalism OCo cultural and social practices that construct, represent, and reflect personal and collective identities. Section I discusses the historical and contemporary role of colonial experience and its remembrance in the construction of national identities. Section II follows on by tracing the reflections of (post)coloniality and twentieth-century migration in the specific fields of economic history and consumer culture. Section III centres on recent debates about multiculture and national/cultural identity in politics, literature, and film."

In interpreting contemporary Asian American poetry, it is important to understand the cultural hybridity of Asian America identity, located at the interstices of the fixed identifications 'American', 'Asian American', and 'Asian'. This rootedness in more than one culture exposes the inapplicability of binary concepts (foreigner/national, etc.). Hybridity, opposing essentialism and 'the original', favors multivocality and ambivalence. The exploration of Asian American cultural hybridity is linked both to material realities and poetic manifestations.Asian American hybrid subjectivity is explored through in-depth interpretations of works from well-established contemporary poets such as Kimiko Hahn, Marilyn Chin, Li-Young Lee, and Arthur Sze, as well as that of many new talents and hitherto neglected writers.This study examines how language and power interrelate, with translation and linguistic fusion being two approaches adopted by hybrid authors in their creation of alternative discourse. Culturally hybrid subjectivity is independent of and at the same time interconnected with more than one culture, thus enabling innovative political and identitarian positions to be articulated. Also examined are such traditional poetic forms as the zuihitsu, the sonnet, and the ghazal, which continue to be used, though in modernized and often subversive guise. The formal liminal space is revealed as a source of newness and invention deconstructing eurocentric hierarchy and national myth in American society and expanding or undercutting binary constructs of racial, national, and ethnic identities.A further question pursued is whether there are particular aesthetic modes and concepts that unite contemporary Asian American poetry when the allegiances of the practitioners are so disparate (ultimate geocultural provenience, poetic schools, regions in the USA, generations, sexual orientation, etc.). Wide-ranging interviews with Kimiko Hahn and Chitra Banerjee Divakaruni on identity and roots, language and power, feminism, and the American poetry scene provide illuminating personal yet representative answers to this and other questions.

Cultural hybridity has become one of the key buzz words of late twentieth century critical theory, cited and celebrated as a space of resistance and protest, on the one hand, and tolerance, cosmopolitanism and multiculturalism, on the other. But what are the limits of cultural hybridity? Why is it such a difficult - at times almost impossible - challenge to negotiate differences across cultures? In what ways does racism strike at the foundations of multiculturalism to create pathological cultural hybrids and ambivalences? This pathbreaking new book deconstructs established approaches and discloses why anti-racism and multiculturalism are hard roads to travel. It contains chapters by leading European sociologists and anthropologists.

Immigrants who travel and settle in foreign countries face challenges due to cultural differences or even deliberate segregation by dominant groups. In their attempt to negotiate their existence, some decide to stick to the culture of their mother nations and some stand in the middle, and blend some aspects of their mother culture and the new culture. Although immigrants who remain closer to their own cultures are easily spotted and relegated, they are assigned a place on the identity continuum, whereas immigrants who choose to stand in the middle run the danger of being neither this nor that, neither here nor there, and can undergo severe internal fragmentation. In this book, Cultural Hybridity and Fixity: Strategies of Resistance in Migration Literatures, Andrew Nyongesa delves into these two strategies of resistance and analyzes the merits and demerits of each with reference to Safi Abdi's fiction.

Essay from the year 2011 in the subject American Studies - Literature, grade: 1,7, TU Dortmund (American Studies), course: American Cultural Studies, language: English, abstract: One of the central concepts in the work of post-colonial writer Homi Bhabha is that of 'hybridity'. In the Introduction to The Location of Culture, Bhabha reflects on aspects of hybridity in the context of the 'in-between' of cultures. The essay will briefly discuss a passage taken out of this book in order to get a better idea about the significance of the term hybridity.

Afterwards, the idea of hybridity will be transferred to Derek Walcott's poem "A Far Cry from Africa". "The stairwell as liminal space, in-between the designations of identity, becomes the process of symbolic interaction [...]. This interstitial passage between fixed identifications opens up a possibility of a cultural hybridity that entertains difference without an assumed or imposed hierarchy. " (Bhabha 2004: 3) The term 'hybridity', which is a very frequently used construct in post-colonial studies, seeks to explain the melting of different cultural ideas into one entity.

This study examines the connections between literature and national identity in post-Soviet Ukraine. The author conceives of literary production as a social institution and analyzes such topics as gender, regionalism, language politics, and popular culture. This work also situates Ukraine's post-Soviet development within a broader regional context.

Hybridity in Spanish Culture is an anthology that explores hybridity in select works from the dawn of Imperial Spain to the twenty-first century. The phenomenon of hybridity has been pervasive throughout Spanish history. The hybrid literary and visual texts studied in this volume-ranging from aljamiado writings and the legacy from the convivencia to contemporary immigration narratives-blur or erase purportedly fixed boundaries: between history and fiction, story and History, nationality and transnationalism, subjectivity and objectivity, as well as between genres, cultures, languages and eras. Hybridity constitutes the state of simultaneously belonging to categories that had previously been considered exclusive. It renders the concept of pure as a construct, a chosen perception, a psychic imposition on experience. Implicit within hybridity is a fusion of two or more separate factors, entities or concepts, but the essential aspect of this fusion is that the hybrid text becomes an original. Hence, hybridity nods to the past, but points to the future. Hybridity in Spanish Culture, written both in Spanish and English, as a "metahybrid," is a collection about hybridity that is a hybrid itself. In hopes of blurring borders, dissipating taxonomies, and dehierarchizing binary oppositions, the European and US authors and editors contribute to cultural studies scholarship and underscore the omnipresence and ubiquity of interstitial conditions as they relate to national or cultural identity, linguistic crossings, inter-genre blendings and the conception of home and belonging.

Within the context of globalization, cultural transformations are increasingly analyzed as hybridization processes. Hybridity itself, however, is often treated as a specifically post-colonial phenomenon. The contributors in this volume assume the historicity of transcultural flows and entanglements; they consider the resulting transformative powers to be a basic feature of cultural change. By juxtaposing different notions of hybridization and specific methodologies, as they appear in the various disciplines, this volume's design is transdisciplinary. Each author presents a disciplinary concept of hybridization and shows how it operates in specific case studies. The aim is to generate a transdisciplinary perception of hybridity that paves the way for a wider application of this crucial concept

This book highlights the importance of diversity in overcoming issues of social and environmental degradation. It presents conceptual and practical strategies to celebrate local and Indigenous knowledge for improved community development and environmental management. David Harvey has proclaimed, "The geography we make must be a peoples' geography." This clarion call challenges geographers around the world to consider the power and potential of geographic knowledge as the basis for social action – a call this book answers, providing readers the theoretical and conceptual tools needed to understand the social world and empowering them to mobilize social change. The author uses empirical case studies of two environmental management and community development projects to document how knowledge generation is "essentially locally situated and socially derived." In doing so she charts a path for moving beyond what Vandana Shiva so aptly describes as "monocultures of the mind." The book argues that local and Indigenous knowledge must not be seen in opposition to scientific knowledge, as none of these knowledge traditions hold all the answers to localized socio-environmental problems. Rather, as the author explores through a set of processes and strategies to enable, support and celebrate 'cultural hybridity' at the local environmental governance scale, these respective knowledge systems can learn to speak to each other. Such dialogue has the potential to support more sustainable outcomes at multiple environmental governance locales. This book will be of interest to everyone involved in environmental policy, planning or politics, and for those who want to make this planet a more sustainable and just place.

Hybridity, the interaction of people and media from different cultures, is a communication-based phenomenon. Drawing on original research from Lebanon to Mexico and analyzing the use of the term in cultural and postcolonial studies (as well as the popular and business media), Marwan Kraidy offers readers a history of the idea and a set of prescriptions for its future use. Kraidy analyzes the use of the concept of cultural mixture from the first century AD to its present application in the academy and the commercial press. The case studies build an argument for understanding the importance of the dynamics of communication, power, and political-economy as well as culture, in situations of hybridity. Suggesting that such an approach will serve as a useful way to examine how media work in international context, he concludes the book by proposing a new method for studying cultural mixture: critical transculturalism.

Drawing on the long and varied history of discourses of cultural hybridity across the caribbean, this book explores the rich and fraught cultural crossings that are often theorized homogeneously in postcolonial studies as 'hybridity'. What is the relationship of cultural hybridity to social equality? Why have some forms of hybridity been enshrined in the caribbean imagination and others disavowed? What is the appeal of cultural hybridity to nationalist and post-nationalist projects alike? What can we learn from the hybridization of Afro-caribbean and Indo-caribbean cultures set in motion by slavery and indentureship? In answering these questions, this book intervenes in several important debates in postcolonial studies about cultural resistance and popular agency, feminism and cultural nationalism, the relations between postmodernism and postcolonialism, and the status of nationalism in an age of globalization.

A dynamic and original collection of essays on the transnational circulation and changing social meanings of Latin music across the Americas. The transcultural impact of Latin American musical forms in the United States calls for a deeper understanding of the shifting cultural meanings of music. Musical Migrations examines the tensions between the value of Latin popular music as a metaphor for national identity and its transnational meanings as it traverses national borders, geocultural spaces, audiences, and historical periods. The anthology analyzes, among others, the role of popular music in Caribbean diasporas in the United States and Europe, the trans-Caribbean identities of Salsa and reggae, the racial, cultural, and ethnic hybridity in rock across the Americas, and the tensions between tradition and modernity in Peruvian indigenous music, mariachi music in the United States, and in Trinidadian music.

Conceptualizing Cultural Hybridization

**The distinction between online and offline realities is becoming more and more difficult to sustain. As computer-mediated communication evolves and as interaction becomes more and more dependent on the Internet, social, cultural, and political aspects begin to get caught and entangled in the web of contemporary digital communication technologies. Digital tools and platforms for communication are progressively becoming commonplace, while the cultural conceptions that surround these technologies—mediacy, constant accessibility, availability—are becoming increasingly mainstream. Hybrid Media Culture is an interdisciplinary exploration of how the online and the offline interact in present-day culture. In the aftermath of all-encompassing perspectives on 'postmodernisation' and 'globalization', there is now a pressing need for scholars of new media and society to come to terms with issues of place, embodiment, and materiality in a world of 'virtual' flows and 'cyber' culture. This book explores ways of conceptualizing the intricate intermingling of the online and the offline through case studies of hybrid media places, including: user-generated videos about self-harm; visibility, surveillance and digital media; digital communication tools and politics; and physical and virtual churches. This interdisciplinary edited collection investigates the effects of the internet and digital culture on perceptions and uses of identities, bodies and localities. It will be of interest to students and scholars of digital culture, sociology, media and communications studies, new media, body studies, politics, and science and technology studies.**

**This book brings together a group of scholars from diverse disciplines to interrogate everyday life events in various interpersonal and organizational contexts so as to answer an age-old question: what happens when (carriers of) cultures meet, or, when East meets West? The contributors to this volume argue that, rather than assume clashes of civilizations, assimilation, conversion and essentialism to be the expected outcomes of cultural encounters, we should focus our analytical attention on processes rather than outcomes; on emergence, dialectics, contradictions, ironies and paradoxes, and complexity. We should focus on attempting to learn and grow, to synthesize and integrate, to create and innovate, to change and transform, at personal, micro, macro and global levels. Or, in one word: hybridity. Contexts of cultural encounters analyzed in this book range from business organizations, through individual travels, to personal philosophies, and from mechanical models to complex systems as social imaginaries. This book is based on a special issue of World Futures: The Journal of General Evolution.**

**Rethinking questions of identity, social agency and national affiliation, Bhabha provides a working, if controversial, theory of cultural hybridity - one that goes far beyond previous attempts by others. In The Location of Culture, he uses concepts such as mimicry, interstice, hybridity, and liminality to argue that cultural production is always most productive where it is most ambivalent. Speaking in a voice that combines intellectual ease with the belief that theory itself can contribute to practical political change, Bhabha has become one of the leading post-colonial theorists of this era.**

**Why is it still so difficult to negotiate differences across cultures? In what ways does racism continue to strike at the foundations of multiculturalism? Bringing together some of the world's most influential postcolonial theorists, this classic collection examines the place and meaning of cultural hybridity in the context of growing global crisis, xenophobia and racism. Starting from the reality that personal identities are multicultural identities, Debating Cultural Hybridity illuminates the complexity and the flexibility of culture and identity, defining their potential openness as well as their closures, to show why anti-racism and multiculturalism are today still such hard roads to travel.**

*Kipling's Imperial Boy opens by examining the significance of boyhood in the evolution of European modernity. Chapter one shows how closely the figure of the adolescent (the 'boy') is associated with questions of imperial expansion and consolidation. The chapters that follow take up Rudyard Kipling's fiction of the imperial boy, emphasizing the imaginative link between adolescence and cultural hybridity and offering detailed readings of The Jungle Book, Stalky & Co ., and Kim.*

*Bannermen Tales is the first book in English to offer a comprehensive study of zidishu (bannermen tales)—a popular storytelling genre created by the Manchus in early eighteenth-century Beijing. Contextualizing zidishu in Qing dynasty Beijing, this book examines both bilingual (Manchu-Chinese) and pure Chinese texts, recalls performance venues and features, and discusses their circulation and reception into the early twentieth century. With its original translations, musical score, and numerous illustrations of hand-copied and printed zidishu texts, this study opens a new window into Qing literature and provides a broader basis for evaluating the process of cultural hybridization. To go beyond readily available texts, author Elena Chiu engaged in intensive fieldwork and archival research, examining approximately four hundred hand-copied and printed zidishu texts housed in libraries in Mainland China, Taiwan, Germany, and Japan. Guided by theories of minority literature, cultural studies, and intertextuality, Chiu explores both the Han and Manchu cultures in the Qing dynasty through bannermen tales, and argues that they exemplified elements of Manchu cultural hybridization in the eighteenth and nineteenth centuries while simultaneously attempting to validate and perpetuate the superiority of Manchu identity. With its original translations, musical score, and numerous illustrations of hand-copied and printed zidishu texts, this study opens a new window into Qing literature and provides a broader basis for evaluating the process of cultural hybridization.*

*Hybridity and its Discontents explores the history and experience of 'hybridity' - the mixing of peoples and cultures - in North and South America, Latin America, Britain and Ireland, South Africa, Asia and the Pacific. The contributors trace manifestations of hybridity in debates about miscengenation and racial purity, in scientific notions of genetics and 'race', in processes of cultural translation, and in ideas of nation, community and belonging. The contributors begin by examining the persistence of anxieties about racial 'contamination', from nineteenth-century fears of miscegenation to more recent debates about mixed race relationships and parenting. Examining the lived experiences of children of 'mixed parentage', contributors*

ask why such fears still thrive in a supposedly tolerant culture? The contributors go on to discuss how science, while apparently neutral, is part of cultural discourses, which affect its constructions and classifications of gender and 'race'. The contributors examine how new cultural forms emerge from borrowings, exchanges and intersections across ethnic and cultural boundaries, and conclude by investigating the contemporary experience of multiculturalism in an age of contested national borders and identities.

*Immigrants who travel and settle in foreign countries face challenges due to cultural differences or even deliberate segregation by dominant groups. In their attempt to negotiate their existence, some decide to stick to the culture of their mother nations and some stand in the middle, and blend some aspects of their mother culture and the new culture. Although immigrants who remain closer to their own cultures are easily spotted and relegated, they are assigned a place on the identity continuum, whereas immigrants who choose to stand in the middle run the danger of being neither this nor that, neither here nor there, and can undergo severe internal fragmentation. In this book, Cultural Hybridity and Fixity: Strategies of Resistance in Migration Literatures, Andrew Nyongesa delves into these two strategies of resistance and analyzes the merits and demerits of each with reference to Safi Abdis fiction.*

*In recent years, archaeologists have used the terms hybrid and hybridity with increasing frequency to describe and interpret forms of material culture. Hybridity is a way of viewing culture and human action that addresses the issue of power differentials between peoples and cultures. This approach suggests that cultures are not discrete pure entities but rather are continuously transforming and recombining. The Archaeology of Hybrid Material Culture discusses this concept and its relationship to archaeological classification and the emergence of new ethnic group identities. This collection of essays provides readers with theoretical and concrete tools for investigating objects and architecture with discernible multiple influences. The twenty-one essays are organized into four parts: ceramic change in colonial Latin America and the Caribbean; ethnicity and material culture in pre-Hispanic and colonial Latin America; culture contact and transformation in technological style; and materiality and identity. The media examined include ceramics, stone and glass implements, textiles, bone, architecture, and mortuary and bioarchaeological artifacts from North, South, and Central America, Hawai'i, the Caribbean, Europe, and Mesopotamia. Case studies include Bronze Age Britain, Iron Age and Roman Europe, Uruk-era Turkey, African diasporic communities in the Caribbean, pre-Spanish and Pueblo revolt era Southwest, Spanish colonial impacts in the American Southeast, Central America, and the Andes, ethnographic Amazonia, historic-era New England and the Plains, the Classic Maya, nineteenth-century Hawai'i, and Upper Paleolithic Europe. The volume is carefully detailed with more than forty maps and figures and over twenty tables. The work presented in The Archaeology of Hybrid Material Culture comes from researchers whose questions and investigations recognized the role of multiple influences on the people and material they study. Case studies include experiments in bone working in middle Missouri; images and social relationships in prehistoric and Roman Europe; technological and material hybridity in colonial Peruvian textiles; ceramic change in colonial Latin America and the Caribbean; and flaked glass tools from the leprosarium at Kaluwao, Moloka'i. The essays provide examples and approaches that may serve as a guide for other researchers dealing with similar issues.*

*How does the concept of hybridity relevant to the history of electricity in the French colonial old city of Fez, Morocco (1912-56)? What were the historic glass electric fixture designs? This essay aims to answer these questions based on archival documents and photographs. 37 pages long, 8 black and white and color images. Key Words: history of technology, electricity, electrical infrastructure, electric power, French Colonial, Fez, old city, Morocco, globalization, cosmopolitanism available at <https://gumroad.com/UDjkkT> and <https://gum.co/DjkkT>*

*The language of contemporary cultural theory shows remarkable similarities with the patterns of thought which characterised Victorian racial theory. Far from being marked by a separation from the racialised thinking of the past, Colonial Desire shows we are operating in complicity with historical ways of viewing 'the other', both sexually and racially. Colonial Desire is a controversial and bracing study of the history of Englishness and 'culture'. Robert Young argues that the theories advanced today about post-colonialism and ethnicity are disturbingly close to the colonial discourse of the nineteenth century. 'Englishness', Young argues, has been less fixed and stable than uncertain, fissured with difference and a desire for otherness.*

Strategies For Entering And Leaving Modernity

Miniaturization and Cultural Hybridity

Cultural Hybridity and Fixity

Identity, Hybridity and Cultural Home

Crossover

Vision, Space, Desire

The period in which we live is marked by increasingly frequent and intense cultural encounters of all kinds. However we react to it, the global trend towards mixing or hybridization is impossible to miss, from curry and chips - recently voted the favourite dish in Britain - to Thai saunas, Zen Judaism, Nigerian Kung Fu, 'Bollywood' films or salsa or reggae music. Some people celebrate these phenomena, whilst others fear or condemn them. No wonder, then, that theorists such as Homi Bhabha, Stuart Hall, Paul Gilroy, and Ien Ang, have engaged with hybridity in their work and sought to untangle these complex events and reactions; or that a variety of disciplines now devote increasing attention to the works of these theorists and to the processes of cultural encounter, contact, interaction, exchange and hybridization. In this concise book, leading historian Peter Burke considers these fascinating and contested phenomena, ranging over theories, practices, processes and events in a manner that is as wide-ranging and vibrant as the topic at hand.

Explores identity formation and cultural home for generations of Chinese immigrants living in multicultural societies across the world.

This book explores recent developments in the concept of hybridity through a multi-disciplinary perspective, bringing ideas about legal plurality together with the fields of peace, development and cultural studies. Analysing the concepts of hybridity and hybridization, their history, their application in law and legal studies, and their implications for thinking and rethinking legal plurality, the book shows how the concept of hybridity can contribute to an understanding of the processes that occur when different normative or legal orders or frameworks confront each other.
