This book presents the new Precariat - the rapidly growing number of people facing lives of insecurity, on zero hours contracts, moving in and out of jobs that give little meaning to their lives. The delivery driver who brings your packages, the uber driver who gets you to work, the security guard at the mall, the carer looking after our elderly...these are The Precariat. Guy Standing investigates this new and growing group, finding a frustrated and angry new underclass who are often ignored by politicians and economists. The rise of zero hours contracts, encouraged by fat cat corporations as risk-free employment, and by silicon valley as a way of outsourcing costs and responsibility, has been exacerbated by the COVID pandemic. At the same time, in its experience of lockdown, the western world is realizing the true value of these nurses, carers and key workers. The answer? The return of income security and meaningful work - the principles 20th century capitalism was built on. By making the fears and desires of the Precariat central to economic thinking, Standing shows how concepts like Basic Income are not just desirable but inevitable, and plots the way to a better future.

Longlisted for the National Book Award New York Times Bestseller A former Wall Street quant sounds an alarm on the mathematical models that pervade modern life -- and threaten to rip apart our social fabric We live in the age of the algorithm. Increasingly, the decisions that affect our lives--where we go to school, whether we get a car loan, how much we pay for health insurance--are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: Everyone is judged according to the same rules, and bias is eliminated. But as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and uncontestable, even when they're wrong. Most troubling, they reinforce discrimination: If a poor student can't get a loan because a lending model deems him too risky (by virtue of his zip code), he's then cut off from the kind of education that could pull him out of poverty, and a vicious spiral ensues. Models are propping up the lucky and punishing the downtrodden, creating a "toxic cocktail for democracy."

Welcome to the dark side of Big Data. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a society. These "weapons of math destruction" score teachers and students, sort resumes, grant (or deny) loans, evaluate workers, target voters, set parole, and monitor our health. O'Neil calls on modelers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change. -- Longlist for National Book Award (Non-Fiction) -- Goodreads, semi-finalist

On June 23, 2014, the long-time CEO of a popular New England supermarket chain was ousted by his board of directors, led by his cousin. What transpired over the next two months is an inspiring tale of epic loyalty to a man who had impacted his community far beyond that of providing groceries. In *We Are Market Basket*, readers will learn more than simply the story of the strike heard round the world. How did a single CEO garner so much respect from his company's managers and rank-and-file workers that they walked out of the stores and protested? How did the ousting of an executive result in customers leaving the stores and joining protest rallies? Politicians were forced to take sides, and media were left stunned at the unprecedented and united show of support for this lone businessman. What was so special about this CEO and how he ran his business that provoked such ferocious loyalty? How does a company spread across three states maintain a culture that embraces everyone--from cashier to customer--as family? Can a company really become an industry leader by prioritizing stakeholders over shareholders? With its arresting firsthand accounts from the streets and executive suites, *We Are Market Basket* is as inspiring as it is instructive as it chronicles the epic rise, fall, and redemption of an iconic and uniquely American company.

Data is fundamental to the modern world. From economic development, to healthcare, to education and public policy, we rely on numbers to allocate resources and make crucial decisions. But because so much data fails to take into account gender, because it treats men as the default and women as atypical, bias and discrimination are baked into our systems. And women pay tremendous costs for this bias, in time, money, and often with their lives. Celebrated feminist advocate Caroline Criado Perez investigates shocking root cause of gender inequality and research in Invisible Women†, diving into women's lives at home, the workplace, the public square, the doctor's office, and more. Built on hundreds of studies in the US, the UK, and around the world, and written with energy, wit, and sparkling intelligence, this is a groundbreaking, unforgettable exposé that will change the way you look at the world.

Around the World In 80 Months: Travels and Reflections In Four Continents 2007-2014

Begins with the history of the FMLA, and goes on to thoroughly cover the responsibilities of employees and employers under the Act. The areas covered include provisions of the FMLA; regulations promulgated by the Department of Labor (DOL); how DOL opinion letters have interpreted FMLA provisions; case law developed under the FMLA during the first 10 years the Act has been in effect; and how FMLA rights are coordinated with other legal rights of employees.

Part reminiscence, part commentary, Around the World in 80 Months presents the author's 'take' on people and places in widely differing cultures during the period 2007-2014. Being based in three continents afforded opportunities to observe social and cultural realities in a variety of countries, while catching up with family and friends enabled him and his wife to roam through a fourth. Around the World in 80 Months is a celebration of sharing the joys of retirement and un-retirement, of negotiating the unexpected and of finding common cause with others.

In this searing meditation on the bonds of family and the allure of extremist faith, one of today's most celebrated Christian writers recounts his unexpected journey from a strict fundamentalist upbringing to a life of compassion and grace—a revelatory memoir that "invites comparison to Hillbilly Elegy" (Publishers Weekly, starred review). "This stunning tale reminds us that the only way to keep living is to ask God for the impossible: love, forgiveness, and hope."—Kate Bowler, New York Times bestselling

author of Everything Happens for a Reason Raised by an impoverished widow who earned room and board as a Bible teacher in 1950s Atlanta, Philip Yancey and his brother, Marshall, found ways to venture out beyond the confines of their eight-foot-wide trailer. But when Yancey was in college, he uncovered a shocking secret about his father's death—a secret that began to illuminate the motivations that drove his mother to extreme, often hostile religious convictions and a belief that her sons had been ordained for a divine cause. Searching for answers, Yancey dives into his family origins, taking us on an evocative journey from the backwoods of the Bible Belt to the bustling streets of Philadelphia; from trailer parks to church sanctuaries; from family oddballs to fire-and-brimstone preachers and childhood awakenings through nature, music, and literature. In time, the weight of religious and family pressure sent both sons on opposite paths—one toward healing from the impact of what he calls a “toxic faith,” the other into a self-destructive spiral. Where the Light Fell is a gripping family narrative set against a turbulent time in post–World War II America, shaped by the collision of Southern fundamentalism with the mounting pressures of the civil rights movement and Sixties-era forces of social change. In piecing together his fragmented personal history and his search for redemption, Yancey gives testament to the enduring power of our hunger for truth and the possibility of faith rooted in grace instead of fear. “I truly believe this is the one book I was put on earth to write,” says Yancey. “So many of the strands from my childhood—racial hostility, political division, culture wars—have resurfaced in modern form. Looking back points me forward.”
