**Since 1989, there have been over 200 post-conviction DNA exonerations in the United States. On the surface, the release of innocent people from prison could be seen as a victory for the criminal justice system: the wrong person went to jail, but the mistake was fixed and the accused set free. A closer look at miscarriages of justice, however, reveals that such errors are not aberrations but deeply revealing, common features of our legal system. The ten original essays in *When Law Fails* view wrongful convictions not as random mistakes but as organic outcomes of a misshaped larger system that is rife with faulty eyewitness identifications, false confessions, biased juries, and racial discrimination. Distinguished legal thinkers Charles J. Ogletree, Jr., and Austin Sarat have assembled a stellar group of contributors who try to make sense of justice gone wrong and to answer urgent questions. Are miscarriages of justice systemic or symptomatic, or are they mostly idiosyncratic? What are the broader implications of justice gone awry for the ways we think about law? Are there ways of reconceptualizing legal missteps that are particularly useful or illuminating? These instructive essays both address the questions and point the way toward further discussion. *When Law Fails* reveals the dramatic consequences as well as the daily realities of breakdowns in the law's ability to deliver justice swiftly and fairly, and calls on us to look beyond headline-grabbing exonerations to see how failure is embedded in the legal system itself. Once we are able to recognize miscarriages of justice we will be able to begin to fix our broken legal system. Contributors: Douglas A. Berman, Markus D. Dubber, Mary L. Dudziak, Patricia Ewick, Daniel Givelber, Linda Ross Meyer, Charles J. Ogletree, Jr., Austin Sarat, Jonathan Simon, and Robert Weisberg. *Emphasizing sustainability, balance, and the natural, green dominates our thinking about ecology like no other color. What about the catastrophic, the disruptive, the inaccessible, and the excessive? What of the ocean's turbulence, the fecundity of excrement, the solitude of an iceberg, multihued contaminations? Prismatic Ecology moves beyond the accustomed green readings of ecotology and maps a colorful world of ecological possibility. In a series of linked essays that span place, time, and discipline, Jeffrey Jerome***

Cohen brings together writers who illustrate the vibrant worlds formed by colors. Organized by the structure of a prism, each chapter explores the coming into existence of nonanthropocentric ecologies. "Red" engages sites of animal violence, apocalyptic emergence, and activism; "Maroon" follows the aurora borealis to the far North and beholds in its shimmering alternative modes of world composition; "Chartreuse" is a meditation on postsustainability and possibility within sublime excess; "Grey" is the color of the undead; "Ultraviolet" is a potentially lethal force that opens vistas beyond humanly known nature. Featuring established and emerging scholars from varying disciplines, this volume presents a collaborative imagining of what a more-than-green ecology offers. While highlighting critical approaches not yet common within ecotheory, the contributions remain diverse and cover a range of topics including materiality, the inhuman, and the agency of objects. By way of color, Cohen guides readers through a reflection of an essentially complex and disordered universe and demonstrates the spectrum as an unfinishable totality, always in excess of what a human perceives. The Dangerous Rise of the SUV

Following on from the merger between AMG and DaimlerChrysler in 1999, things

really began to happen for AMG Mercedes-Benz enthusiasts. The special touch of the AMG engineers was being seen on every model in the entire vast Mercedes-model range, from the prosaic C-Class through to the S-Class and the SLK sports cars, as well as the ML and G-Class off-roader wagons. Not to be left out was the exotic Mercedes-Benz SLR McLaren with its supercharged 5.5 litre quad-cam V8 engine that was fettled by the AMG people. Included are road and comparison test model releases, technical and performance data, plus advice on buying a Mercedes-Benz AMG. Models covered include the C30, 32 & 55, CLK430, 55, TDM & GTR, CL55 & 65, CLS55, E55, G55, ML55, S55 & 65, SL55 & 65, SLK32 & 55 Plus S McLaren.

SUVs have taken over America's roads. Ad campaigns promote them as safer and "greener" than ordinary cars and easy to handle in bad weather. But very little about the SUV's image is accurate. They poorly protect occupants and inflict horrific damage in crashes, they guzzle gasoline, and they are hard to control. Ken Bradsher has been at the forefront in reporting the calamitous safety and environmental record of SUVs, including the notorious Ford-Firestone rollover controversy. In *High and Mighty*, he traces the checkered history of SUVs, showing how they came to be classified not as passenger cars but as light trucks, which are subject to less strict regulations on safety, gas mileage, and air pollution. He makes a powerful case that these vehicles are even worse than we suspect--for their occupants, for other motorists, for pedestrians and for the planet itself. In the tradition of *Unsafe at Any Speed* and *Fast Food Nation*, Bradsher's book is a damning exposé of an industry that puts us all at risk, whether we recognize it or not.

"Injections + Appointments + Egg Retrieval + Embryo Transfer = Resources (Energy x Time x Emotion)" That's the equation that was projected onto the screen when Beth Kohl and her husband first showed up at the in vitro fertilization (IVF) clinic. "Good evening," the program's psychologist told the gathered infertile couples. "Before you begin your treatment, you should know that this program is emotionally and psychologically stressful." And how. In this marvelously unconventional account of her struggles to bear children, Kohl leads the reader on an oh-so-up-close tour of fertilization in America, and the ways in which science, miracle, technology and faith, converge to create life in the twentyfirst century. Along the way, Kohl wrestles with a new world of medical ethics: Should she "selectively reduce" the number of embryos successfully implanted in the womb in order to prevent a potentially complicated pregnancy? How much genetic testing of fertilized eggs is too much? What is she supposed to do with the seven embryos

over from the IVF process? When Andrew Solomon wrote *The Noonday Demon*, he opened the world of depression to readers as no writer had done before. And when Stephen L. Carter wrote *Reflections of an Affirmative Action Baby*, many readers were forced to completely rethink race and prejudice. Kohl's spirited and rich exploration of "embryo culture" will completely revise how we see modern motherhood.

'From the Fury of the Northmen deliver us, O Lord.' Between the eighth and eleventh centuries, the Vikings surged from their Scandinavian homeland to trade, raid and invade along the coasts of Europe. Their influence and expeditions extended from Newfoundland to Baghdad, their battles were as far-flung as Africa and the Arctic. But were they great seafarers or desperate outcasts, noble heathens or oafish pirates, the last pagans or the first of the modern Europeans? This concise study puts medieval chronicles, Norse sagas and Muslim accounts alongside more recent research into ritual magic, genetic profiling and climatology. It includes biographical sketches of some of the most famous Vikings, from Erik Bloodaxe to Saint Olaf, and King Canute to Leif the Lucky. It explains why the Danish king Harald Bluetooth lent his name to a twenty-first century wireless technology; which future saint laughed as she buried foreign ambassadors alive; why so many Icelandic settlers had Irish names; and how the last Viking colony was destroyed by English raiders. Extending beyond the traditional 'Viking age' of most books, A Brief History of the Vikings places sudden Scandinavian population movement in a wider historical context. It presents a balanced appraisal of these infamous sea kings, explaining both their swift expansion and its supposed halt. Supposed because, ultimately, the Vikings didn't disappear: they turned into us.

*“Chicago is a tale of two cities,” headlines declare. This narrative has been gaining steam alongside reports of growing economic divisions and diverging outlooks on the future of the city. Yet to keen observers of the Second City, this is nothing new. Those who truly know Chicago know that for decades—even centuries—the city has been defined by duality, possibly since the Great Fire scorched a visible line between the rubble and the saved. For writers like Alex Kotlowitz, the contradictions are what make Chicago. And it is these contradictions that form the heart of *Never a City So Real*. The book is a tour of the people of Chicago, those who have been Kotlowitz’s guide into this city’s – and by inference, this country’s – heart. Chicago, after all, is America’s city. Kotlowitz introduces us to the owner of a West Side soul food restaurant who believes in second chances, a steelworker turned history teacher, the “Diego Rivera of the projects,” and the lawyers and defendants who populate Chicago’s Criminal Courts Building. These empathic, intimate stories chronicle the city’s soul, its lifeblood. This new edition features a new afterword from the author, which examines the state of the city today as seen from the double-paned windows of a pawnshop. Ultimately, *Never a City So Real* is a love letter to Chicago, a place that Kotlowitz describes as “a place that can tie me up in knots but a place that has been my muse, my friend, my joy.”*

A rich volume of Southern urban noir exploring sides of Memphis that only the locals know, but often don't reveal.

Ruth Galm's spare, poetic debut novel, set in the American West of early Joan Didion, traces the drifting path of a young woman as she skirts the law and her own oppressive anxiety. "Into the Valley" opens on the day in July 1967 when B. decides to pass her first counterfeit check and flee San Francisco for the Central Valley. Caught between generations and unmarried at 30, B. doesn't understand the new counterculture youths. She likes the dresses and kid gloves of her mother's generation, but doesn't fit into that world either. B. is beset by a disintegrative anxiety she calls the carsickness, and the only relief comes in handling illicit checks and driving endlessly through the valley. As she travels the bare, anonymous landscape, meeting an array of other characters an alcoholic professor, a bohemian teenage girl, a criminal admirer B.'s flight becomes that of a woman unraveling, a person lost between who she is and who she cannot yet be."

Gemma is a woman whose never been sure of what exactly it is that she wants, but she knows what she doesn't want. One of those things is being told what to do by men who are far too hot and far too self-involved to be real. Devon Bluewing has it all. He's one of the most eligible bachelors in the world, he's

the head of his family and most important of all, he's a dragon. And dragons know exactly what they want. Right now, what he wants and what he needs might just be the same thing. Or the same person, more like. When Devon's place in the dragon council is questioned, he must act fast. Luckily, the curvy, sexy goldsmith from the town his family lords over is just at the right place at the right time. She will be made his bride, and whether or not she has a say in it remains yet to be seen. When dangers swirl around them, Devon and Gemma must decide fast what they are and what they will become. Wenn der Ermittler in einem erstmals 1937/38 erschienenen Schweizer Krimi kiffen darf und diese neue Erfahrung begeistert mit einem "cheibe suber isch es gsy" kommentiert -- dann kann nur Friedrich Glauser der Autor sein...In der "Fieberkurve" geht es nicht nur die Aufklärung zweier aktueller und eines lange vergangenen ungeklärten Todesfalles -- es geht auch um Studers Jugendtrüme, die er nun, gerade eben Großvater geworden, von einer anderen Seite sieht: Ein Teil der Handlung spielt im Maghreb, bei der Fremdenlegion. Und es geht um arme Teufel, die das Schicksal über Gebühr gebeutelt hat.Zunächst aber beginnt alles in Paris, wo Studer ein eigenartiger Geistlicher, ein "père blanc" vorgestellt wird, dem in einem Fremdenlegion-Posten vom "Hellseherkorporal" zwei Morde prophezeit worden waren. Studer lernt bald auch Marie Cleman kennen, ein "suubers Meitschi", das seine verterlichen Gefühle weckt -- aber auch sie ist in den Fall verwickelt. Und er findet heraus, dass es um viel Geld geht -- und darum, dass längst nicht alle Beteiligten das sind, das sie scheinen -- oder doch? Vieles spielt außerdem noch mit hinein, z.B. innerschweizerische Animositäten und der französische Geheimdienst -- eine etwas wirre Geschichte, zugegeben, die aber doch völlig logisch endet. Man merkt allerdings, dass der Roman erstmals in Fortsetzungen erschienen ist.
